

ADMIN GUIDE

Mangoi · MANGOI

Admin User Guide

Everything about running your academy, in one book

 Admin User Guide

What is the Admin Page?

The admin page gathers everything you need to run an academy — students, teachers, payments, parents and content — on one screen. In particular, the AI Operations Assistant looks things up and even handles tasks when you tell it by voice or text, making operations much faster. Menus and data scope adjust automatically based on your role (permissions).

AI Ops Assistant

Tell it by voice/text; it finds and handles it.

Feature search · card menus

Type part of a name to jump right there.

Retention Center

Churn risk · contagion · settlement · coaching hub.

Org settlement

HQ → branch → agency auto-settlement.

Today's Key Metrics (example)

Revenue (10k KRW)		82
Enrolled		312
Attendance (%)		94

01

 Admin Login & Permissions

Data scope by role, automatically

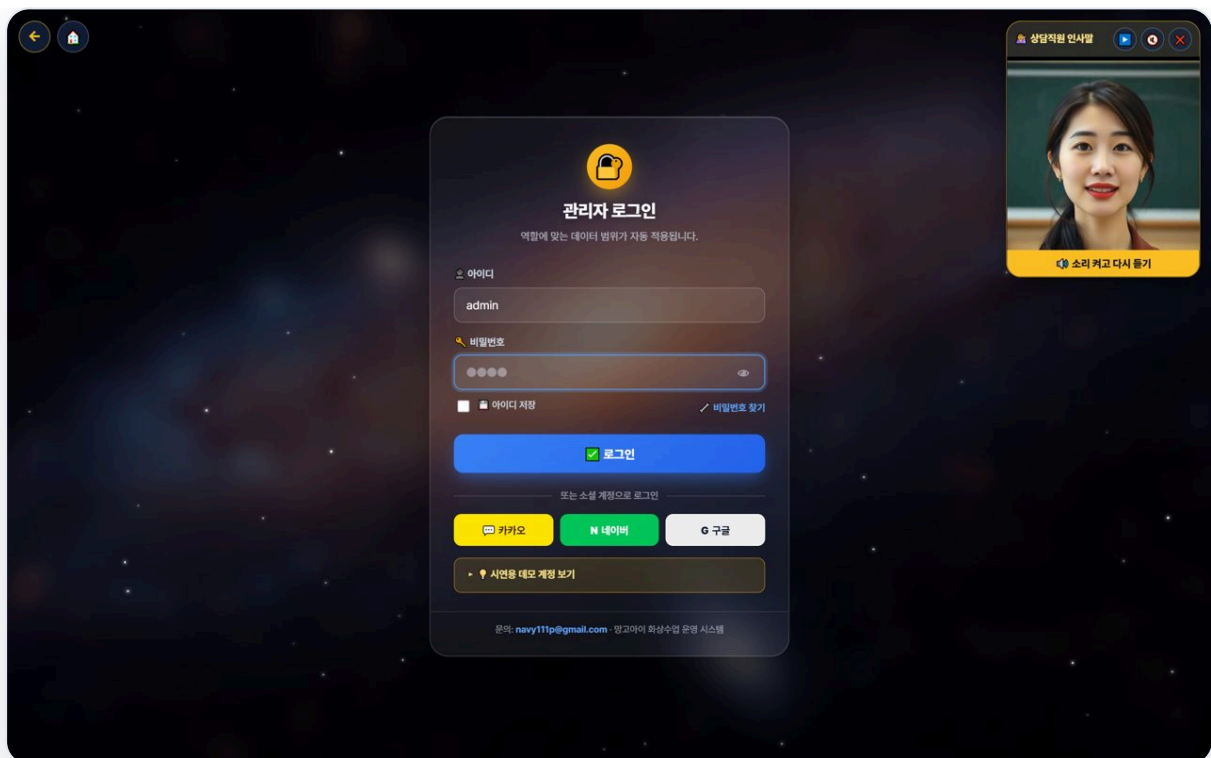

Admin

Logging in with an admin account shows only the menus and data that match your role (director, HQ, staff, etc.). Social login and password reset are supported.

How to use

1 ID and passwo... > 2 'Find passwor...' > 3 Visible menus... > 4 'View demo ac...'

- 1 Log in with **ID and password** (Kakao, Naver, Google also work).
- 2 Forgot your password? Reset via **'Find password'** (SMS/email/Kakao).
- 3 **Visible menus and data scope** change automatically by role.
- 4 New here? Preview with **'View demo account'**.

 Key Points

- ✓ Permission settings let you split access per staff member.
- ✓ Turn on 'Save ID' only on your own trusted PC.

 **Tip** On shared PCs, turn off auto-login and always log out when done.

02

Dashboard & Feature Search

Every feature as a card

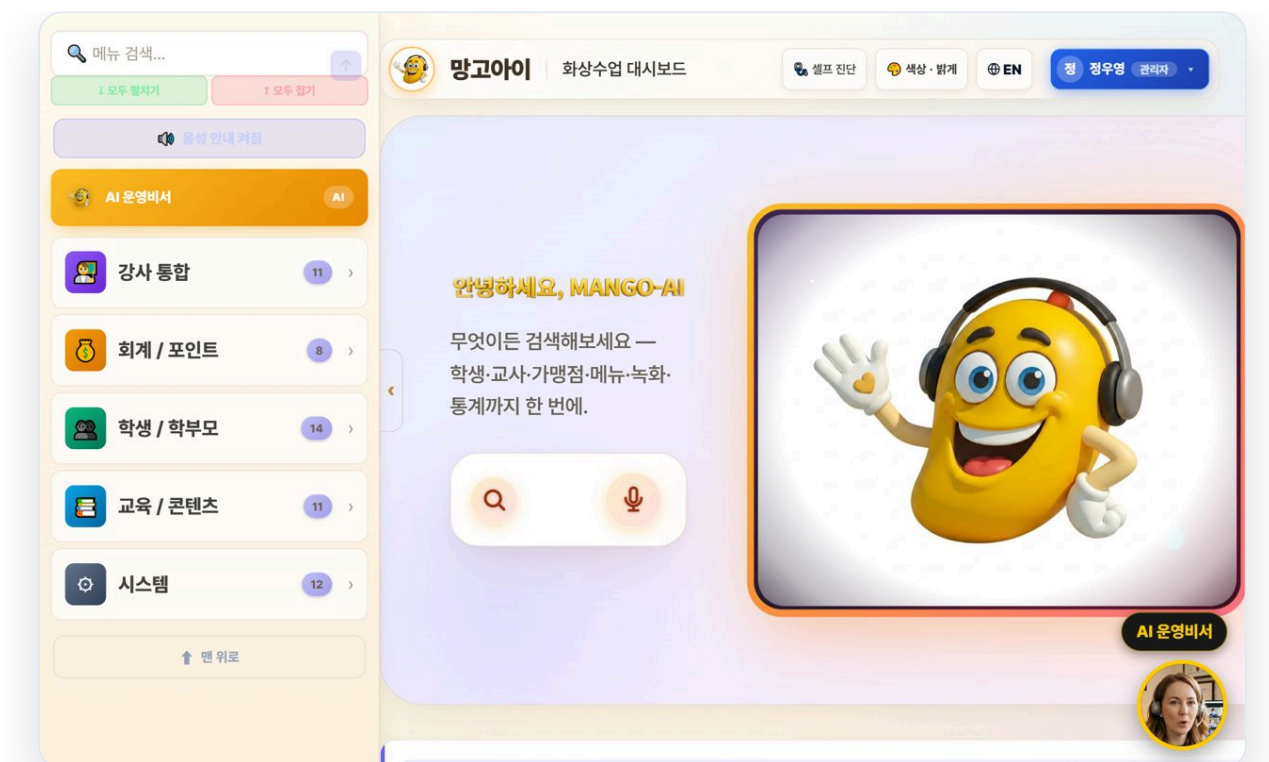

Admin

After login, categories (Teachers, Accounting, Students, Content, System) are organized as cards. Just type a word in the top search box to jump straight to a feature.

How to use

- 1 From the cate... > 2 feature search... > 3 number > 4 Self-check ...

- 1 From the category cards (Teachers-Accounting-Students-Content-System), tap the feature you want.
- 2 Type a word in the **feature search box** to jump right there.
- 3 The **number** beside each category is how many features it holds.
- 4 Use **Self-check · Color/Bright · EN** at the top to change screen and language.

✓ Key Points

- ✓ If you can't find a feature, search is fastest.
- ✓ You can also tell the AI assistant 'open ○○' to jump there.

💡 **Tip** Remember search terms for features you use often to cut clicks.

03

AI Operations Assistant

Admin

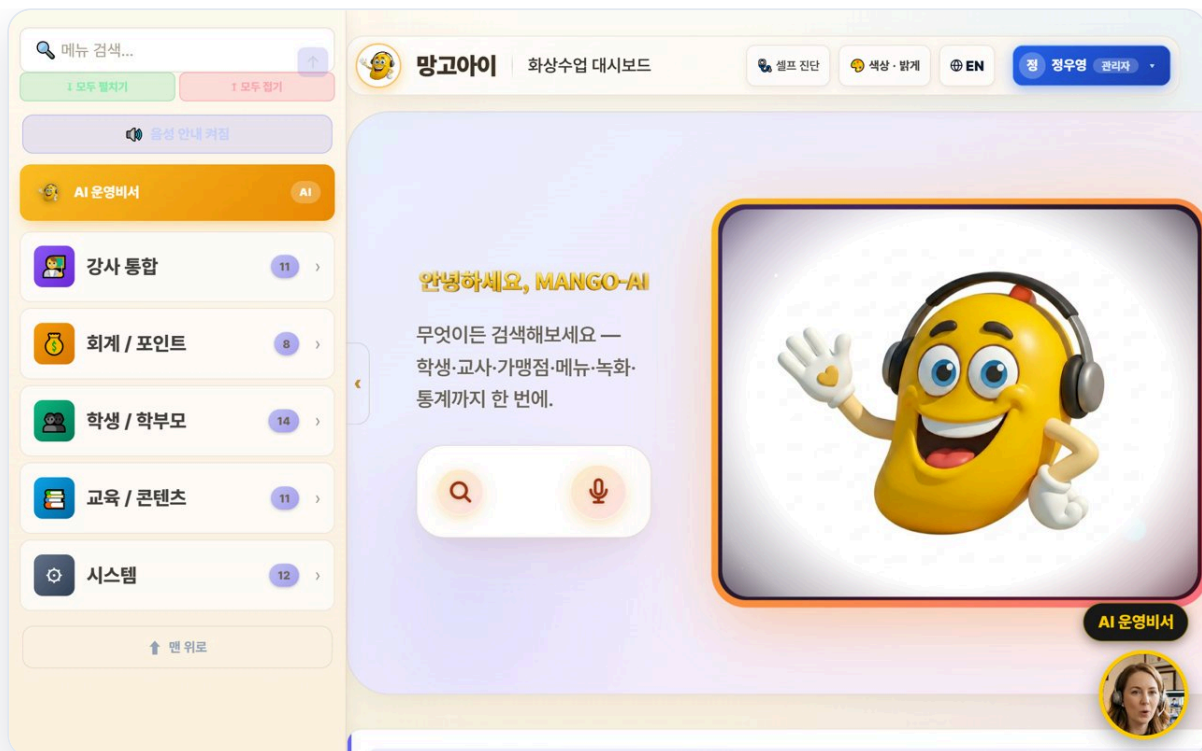

Tell it by voice/text; it acts

Speak or type into the search/mic and the AI looks up numbers or opens screens. Important actions are confirmed first, and it only does what your permissions allow — so it's safe.

How to use

- 1 search/mic > 2 looks up numb... > 3 confirmed wit... > 4 tasks you hav...

- 1 Speak or type into the center **search/mic**. e.g. 'How's today's revenue?'
- 2 The AI **looks up numbers** or **opens a screen**. e.g. 'Open student management.'
- 3 Important actions are **confirmed with 'Shall I?'** first. e.g. 'Push Jung Woo-young's next lesson by 1 hour.'
- 4 The assistant only executes **tasks you have permission for**.

✓ Key Points

- ✓ Can't find a button? Just say 'show me ○○'.
- ✓ Voice and text both work the same.

💡 **Tip** When busy, telling it by voice is much faster than clicking.

04

Understand Lesson Entry

To support students & teachers

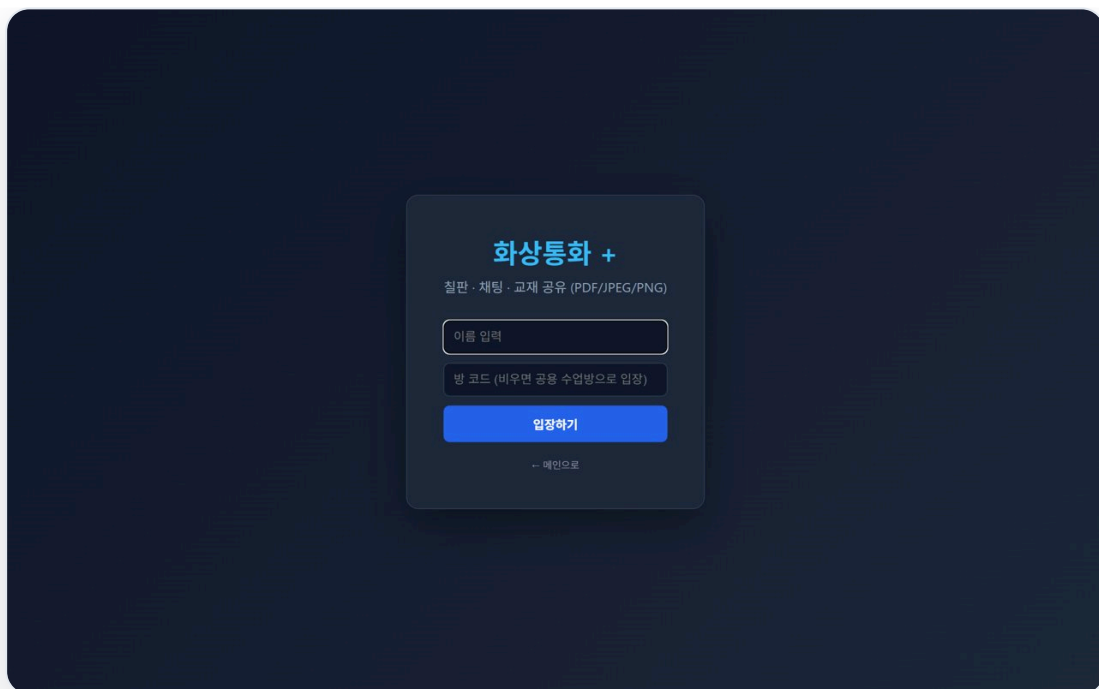

Admin

Even without teaching, admins should know how students and teachers enter so you can answer questions and fix problems. Entry uses a name and a room code (or the shared room).

How to use

1 name > 2 shared lesson... > 3 camera/mic pe... > 4 reconnecting...

- 1 On the entry screen, enter a **name** and **room code**, then press **Enter**.
- 2 If the room code is empty, you go to the **shared lesson room**.
- 3 Advise that the browser's **camera/mic permission** is required.
- 4 For trouble, first advise **reconnecting in Chrome/Edge**.

✓ Key Points

- ✓ KakaoTalk's in-app browser blocks the camera — 'open in an external browser' is needed.

- ✓ Lessons needing room/token management can be checked from the admin screen.

Good to know Most 'can't enter' tickets are browser permission issues — check permissions and browser first.

Tip Turn frequent entry questions into an FAQ to cut support load.

05

 Understand the Classroom Layout

Admin

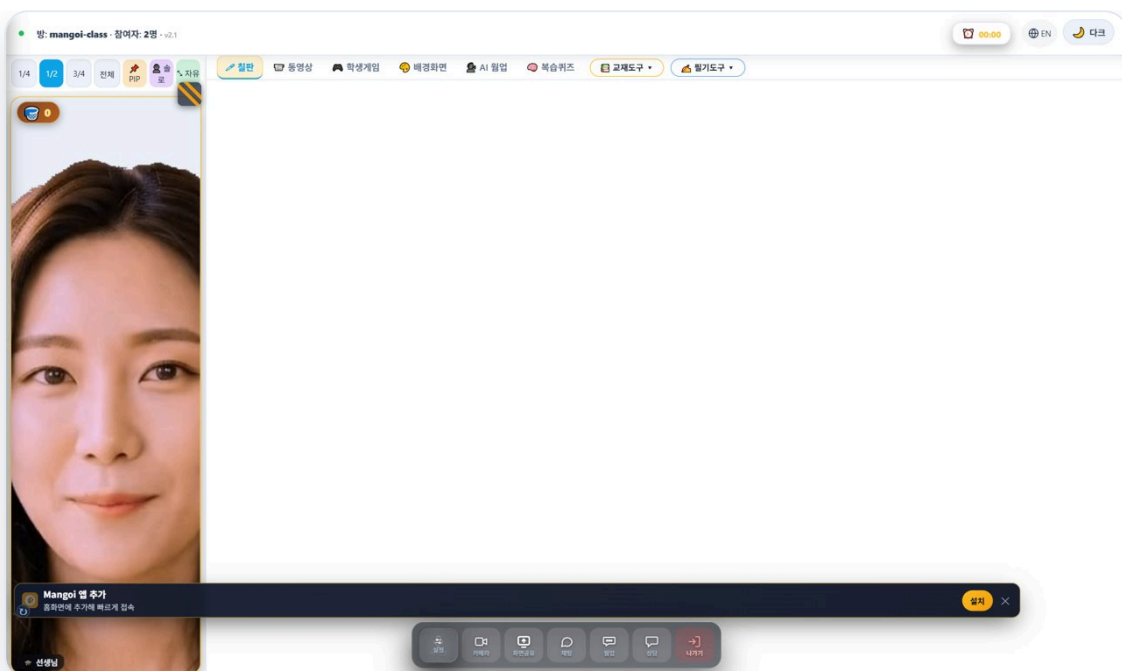

Screen structure for support

Admins don't teach, but knowing the classroom layout makes support easy. It has a top bar (room info, timer, REC, EN, dark), a center workspace (tab tools), and a bottom control dock (camera, screen share, chat, leave).

How to use

1 Top bar > 2 Center tabs > 3 Bottom dock > 4 praise basket

- 1 **Top bar:** room name · user count · timer · recording (REC) · language (EN) · dark mode.
- 2 **Center tabs:** Board · Video · Games · Background · AI Warm-up · Review Quiz + Materials Tools · Writing Tools.
- 3 **Bottom dock:** Settings · Camera · Screen Share · Chat · Native · Leave.
- 4 The 🏆 **praise basket** at the top-left collects praise during class.

 Key Points

- ✓ For 'no sound/video' tickets, tell users to check the dock's camera/mic and ⚙️ Settings.
- ✓ The REC indicator shows whether a lesson is being recorded.

💡 **Tip** Turn common classroom questions into an FAQ with these screenshots.

06

 Understand the Classroom Tools

Board · materials · background · video

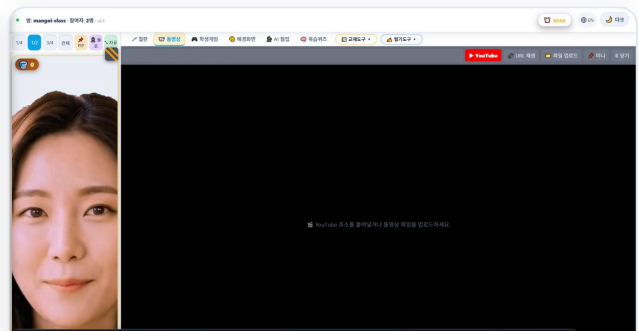

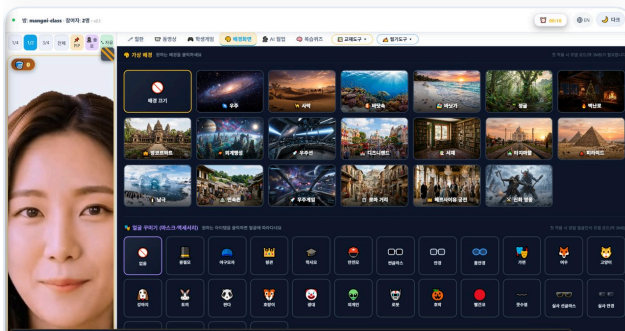

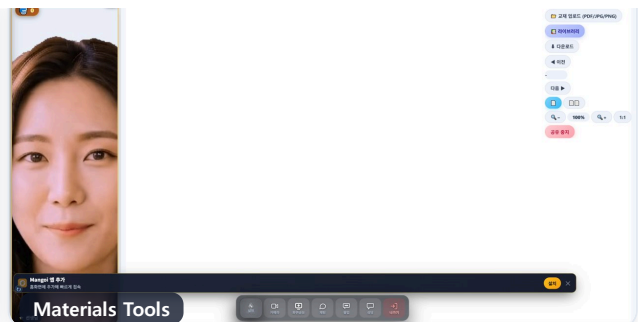

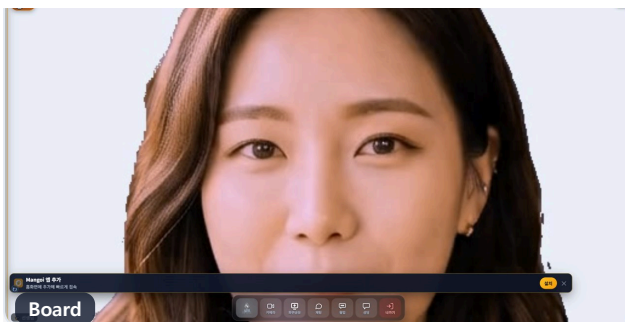

Admin

Knowing the tools students and teachers use makes guidance easier. The core ones are the board (draw/save), materials tools (upload PDF/photos, library), background (backdrop & face decorations), and video (YouTube/file).

How to use

1 Board > 2 Materials Too... > 3 Background > 4 Video

- 1  **Board:** pen, shapes, text, AI shapes, save.
- 2  **Materials Tools:** upload (PDF/JPG/PNG), library, page turning, fit-to-screen.
- 3  **Background:** change backdrop, decorate face.
- 4  **Video:** share YouTube links / video files.

 **Key Points**

- ✓ The materials 'Library' shows textbooks the admin uploaded — it ties into content management.
- ✓ Coach teachers on the 'pre-upload materials → share in class' flow.

 **Tip** A well-stocked textbook library helps teachers prep faster.

07

★ In-class Praise Points (give & accrue)

Admin

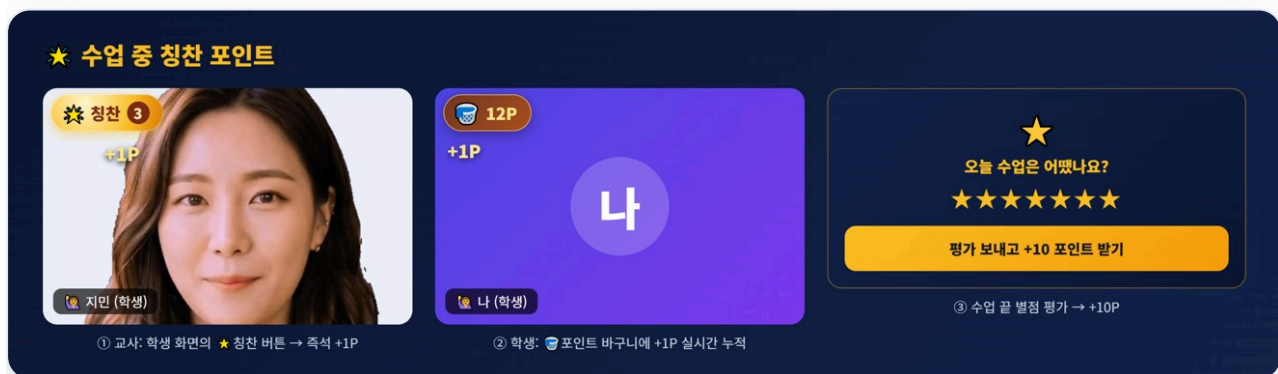

Teacher gives → adds to student points

During class the teacher instantly gives praise points (+1P) to students, and a post-class star rating adds +10P. These sum into the student's total points and are spent in the point shop, roulette, etc. Admins manage the points policy and shop.

How to use

- 1 teacher > 2 It accrues in... > 3 post-class st... > 4 point shop /... > 5 Accounting/Po...

- 1 The **teacher** gives **+1P** instantly via the ★ praise button on a student's video.
- 2 It accrues in real time in the student's 🛒 point basket and sums into their total (P).
- 3 A **post-class star rating** gives the student an extra **+10P**.
- 4 Accrued points connect to rewards in the **point shop / roulette**.
- 5 Admins manage accrual/usage policy under **Accounting/Points**.

✓ Key Points

- ✓ Instant rewards help participation and re-enrollment.

- ✓ Shaping shop rewards lets you tune learning motivation.

Good to know Praise points are given by the teacher; the points policy and shop are the admin's job.

💡 **Tip** Periodically check that points flow well (given & spent) to manage motivation.

08

 Teacher Management

Payroll · matching · reviews · MBTI

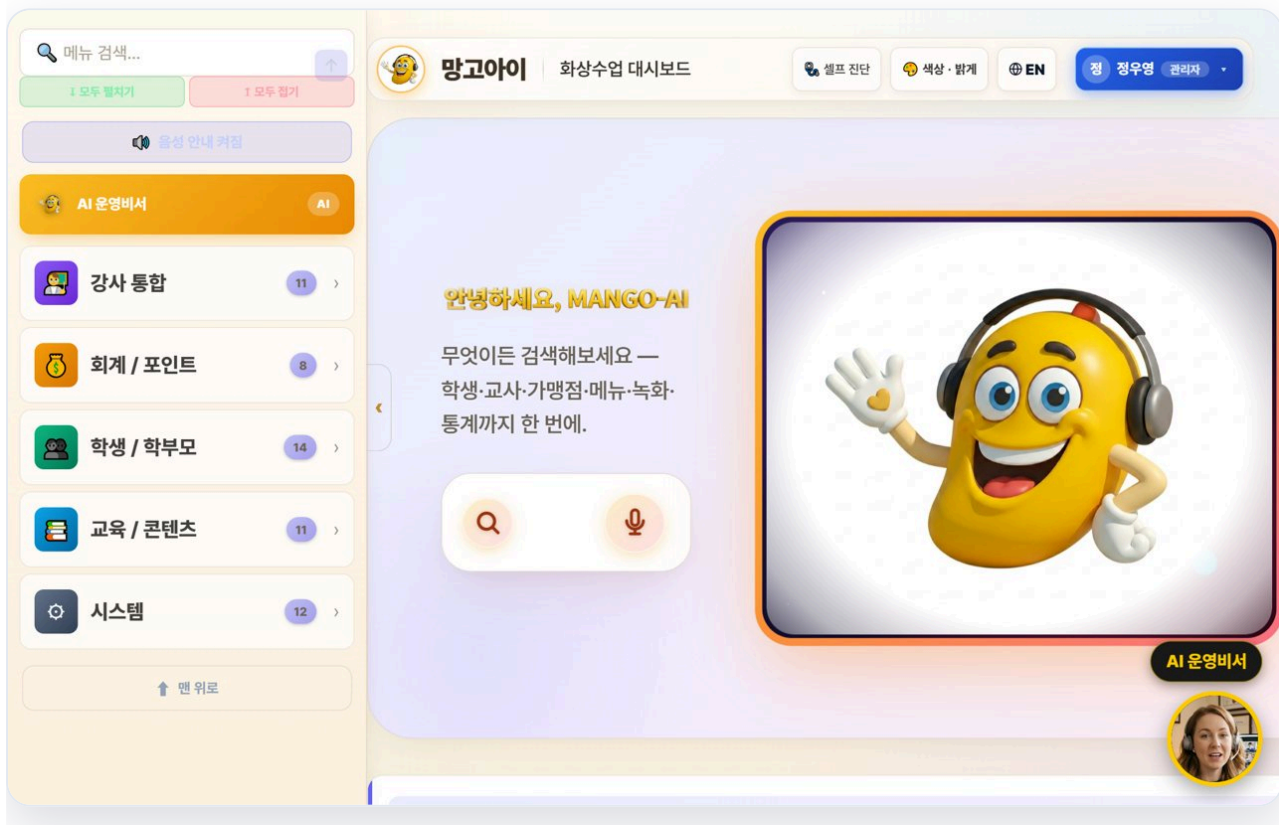

Admin

Manage the teacher list, profiles, payroll, matching and reviews in one place. Gather star ratings students leave, by teacher, to use in coaching.

How to use

- 1 Teachers > 2 payroll > 3 lesson review...

- 1 In **Teachers**, check the teacher list, profiles and matching.
- 2 Manage **payroll**, **MBTI/style** and student↔teacher **matching**.
- 3 Gather each teacher's **lesson reviews (stars)**.

 Key Points

- ✓ Better matching raises re-enrollment.
- ✓ Link low-rated teachers to the coaching tab.

 **Tip** Assign top teachers to popular slots first to boost satisfaction.

09

 Accounting · Points

Payments · overdue · points · gifts

Admin

Manage payments, overdue balances and refunds, plus point/gift accrual and use. Amounts are auto-calculated by policy to reduce mistakes.

How to use

- 1 Accounting/Po... > 2 point/gift > 3 alert-talk/SM...

- 1 In **Accounting/Points**, process payments, overdue balances and refunds.
- 2 Check **point/gift** accrual and usage history.
- 3 Notify overdue items via **alert-talk/SMS**.

1. 환불 기준표

환불 요구 시기	환불 금액(%)	예) 수강료 100,000원 지불
수업 시작 전	납부금액의 100%	100,000원 환불
총 수업시간의 1/3 이전	납부금액의 70%	70,000원 환불
총 수업시간의 1/2 이전	납부금액의 50%	50,000원 환불
총 수업시간의 1/2 이후	납부금액의 0%	환불 안 됨

※ '총 수업시간'은 수강 신청한 전체 수업 횟수(또는 기간)를 기준으로 하며, 환불 기준일은 환불을 서면·온라인으로 신청한 날입니다.

2. 환불 전 꼭 확인해주세요

⚠️ 할인가로 결제한 수업의 환불 정산
 할인은 '약정한 수강 기간을 모두 이수한다'는 조건으로 제공되는 혜택입니다. 따라서 중도 환불 시 이미 진행된(수강한) 수업은 할인이 적용되지 않은 정상가(정가) 기준으로 재정산되어 환불 금액에서 차감되며, 차액을 정산하여 보내드립니다.
 예시) 정상가 200,000원 → 30% 할인받아 140,000원 결제, 전체 20회 중 5회 수강 후 환불 신청 시 • 이미 들은 5회는 정상가(1회 10,000원)로 계산 = 50,000원 차감 • 환불액 = 140,000원 - 50,000원 = 90,000원

■ 연기신청 없이 빠진 수업은 '결석' 처리
 사전에 정해진 절차에 따라 '연기(변경) 신청'이 접수되지 않은 채 진행되지 못한 수업은 결석으로 간주되어 정상 진행된 수업과 동일하게 수업료에 반영(차감)됩니다. 즉, 환불 신청 시 '이미 진행된 수업'에 포함되어 환불 대상에서 제외됩니다.
 ⚡️ 부득이하게 수업에 참여할 수 없을 때는 반드시 수업 시작 전에 [연기/변경] 메뉴에서 연기 신청을 해주세요. 연기 신청된 수업은 결석으로 처리되지 않습니다.

✔ Key Points

- ✔ Manage recurring payments and overdue on one screen.
- ✔ Points drive learning motivation.

 **Tip** Automating overdue alerts raises collection rates.

10

Points & Reward Policy

Praise points → shop → gifts

Admin

The 🌟 praise points a student gets during class and the star rating (+10P) all accrue to the student's total points, leading to point-shop, roulette and gift rewards. Admins manage this accrual/usage flow and the reward line-up.

How to use

- 1 Check accrual...
- 2 Accounting/Po...
- 3 point-shop /...
- 4 If abnormal a...

- 1 **Check accrual paths:** points build from in-class teacher praise (+1P), end-of-class rating (+10P), game learning, etc.
- 2 In **Accounting/Points**, check each student's **accrual/usage history**.
- 3 Manage the **point-shop / roulette rewards** and **gift** line-up.
- 4 If abnormal accrual/errors are suspected, look up the history and adjust.

Key Points

- ✓ Instant rewards (praise points) boost participation and re-enrollment.
- ✓ Shaping rewards lets you tune motivation and cost together.

- ✓ Points are summed into the student's top-bar P and My Page.

Good to know Teachers give praise points; admins configure the shop/reward/gift policy.

Tip Setting stock/limits on popular rewards keeps costs stable.

11

Refund Policy & Processing

Admin

Auto-calculated by the table

Amounts are auto-calculated per the refund table (100% before the lesson starts, tiered by progress). Discounted payments are recalculated at the list price.

How to use

- 1 calculate by... > 2 discounted pa... > 3 absence rule

- 1 Check the refund request timing and **calculate by the table**.
- 2 For **discounted payments**, apply the list-price recalculation rule.
- 3 Check the **absence rule** for lessons missed without postponing.

1. 환불 기준표

환불 요구 시기	환불 금액(%)	예) 수강료 100,000원 지불
수업 시작 전	납부금액의 100%	100,000원 환불
총 수업시간의 1/3 이전	납부금액의 70%	70,000원 환불
총 수업시간의 1/2 이전	납부금액의 50%	50,000원 환불
총 수업시간의 1/2 이후	납부금액의 0%	환불 안 됨

※ '총 수업시간'은 수강 신청한 전체 수업 횟수(또는 기간)를 기준으로 하며, 환불 기준일은 환불을 서면·온라인으로 신청한 날입니다.

2. 환불 전 꼭 확인해주세요

▲ 할인가로 결제한 수업의 환불 정산
 할인은 '약정한 수강 기간을 모두 이수한다'는 조건으로 제공되는 혜택입니다. 따라서 중도 환불 시 이미 진행된(수강한) 수업은 할인이 적용되지 않은 정상가(정가) 기준으로 재정산되어 환불 금액에서 차감되며, 차액을 정산하여 보내드립니다.
 예시) 정사가 200,000원 → 30% 할인받아 140,000원 결제, 전체 20회 중 5회 수강 후 환불 신청 시 • 이미 들은 5회는 정가(1회 10,000원)로 계산 = 50,000원 차감 • 환불액 = 140,000원 - 50,000원 = 90,000원

■ 연기신청 없이 빠진 수업은 '결석' 처리
 사전에 정해진 절차에 따라 '연기(변경) 신청'이 접수되지 않은 채 진행되지 못한 수업은 결석으로 간주되어 정상 진행된 수업과 동일하게 수업료에 반영(차감)됩니다. 즉, 환불 신청 시 '이미 진행된 수업'에 포함되어 환불 대상에서 제외됩니다.
 ▶ 부득이하게 수업에 참여할 수 없을 때는 반드시 수업 시작 전에 [연기/변경] 메뉴에서 연기 신청을 해주세요. 연기 신청된 수업은 결석으로 처리되지 않습니다.

✓ Key Points

- ✓ The table reduces disputes.
- ✓ Explain the policy to parents before processing.

Good to know For discounted lessons, already-taken lessons are deducted at list price, then the balance is refunded.

Tip Explaining refund/postpone policies at signup greatly reduces conflict.

12

Student · Parent Management

Admin

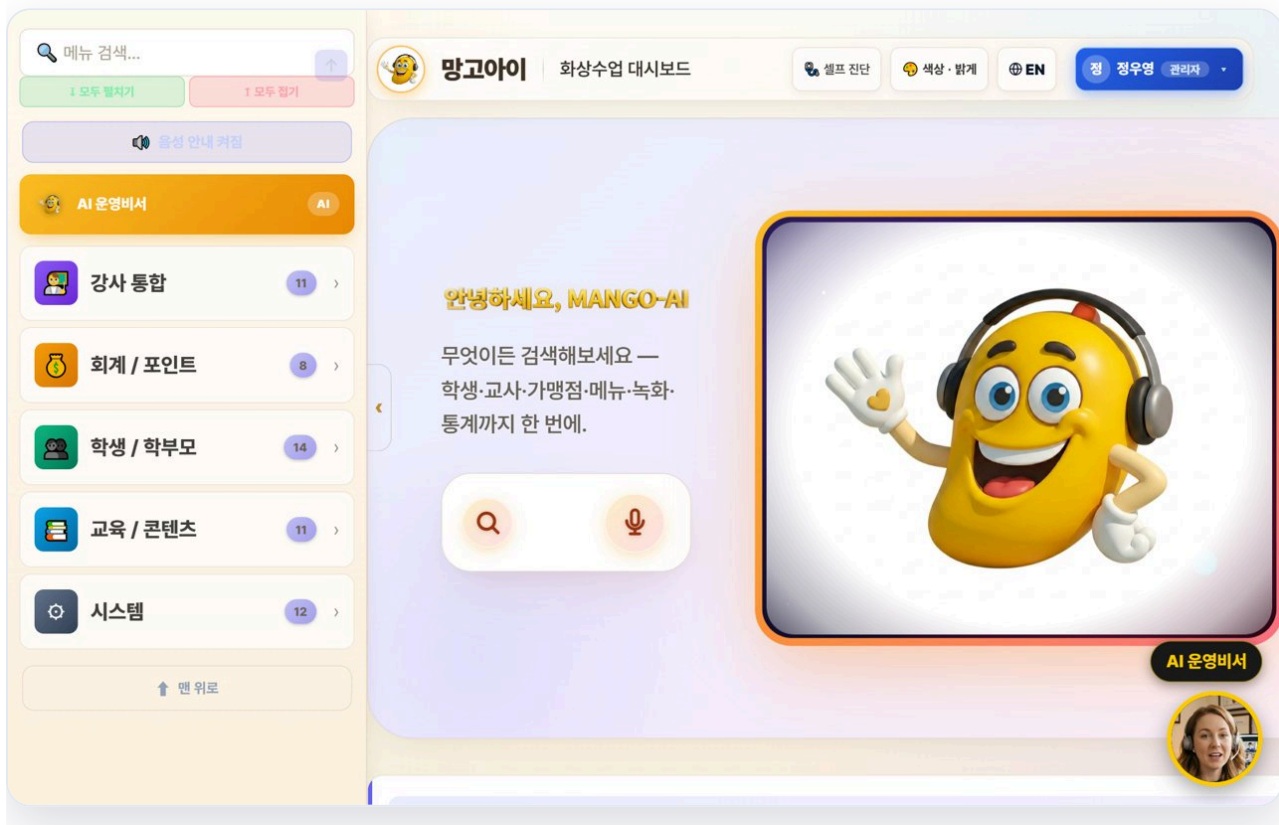

Real-data roster · attendance · grades

Manage the enrolled roster, attendance and grades. The student list is linked to real member data, and you can see each student's history at a glance.

How to use

- 1 Students/Pare... > 2 attendance/re... > 3 Flag students...

- 1 In **Students/Parents**, check the enrolled roster.
- 2 View **attendance/reviews/points/chat history** by student.
- 3 Flag students who need counseling/management.

✓ Key Points

- ✓ The student list is linked to real members.
- ✓ At-risk students link to the Retention Center.

💡 **Tip** Counsel frequently-absent students quickly to prevent churn.

13

Parent My-Page

View learning with just a student ID

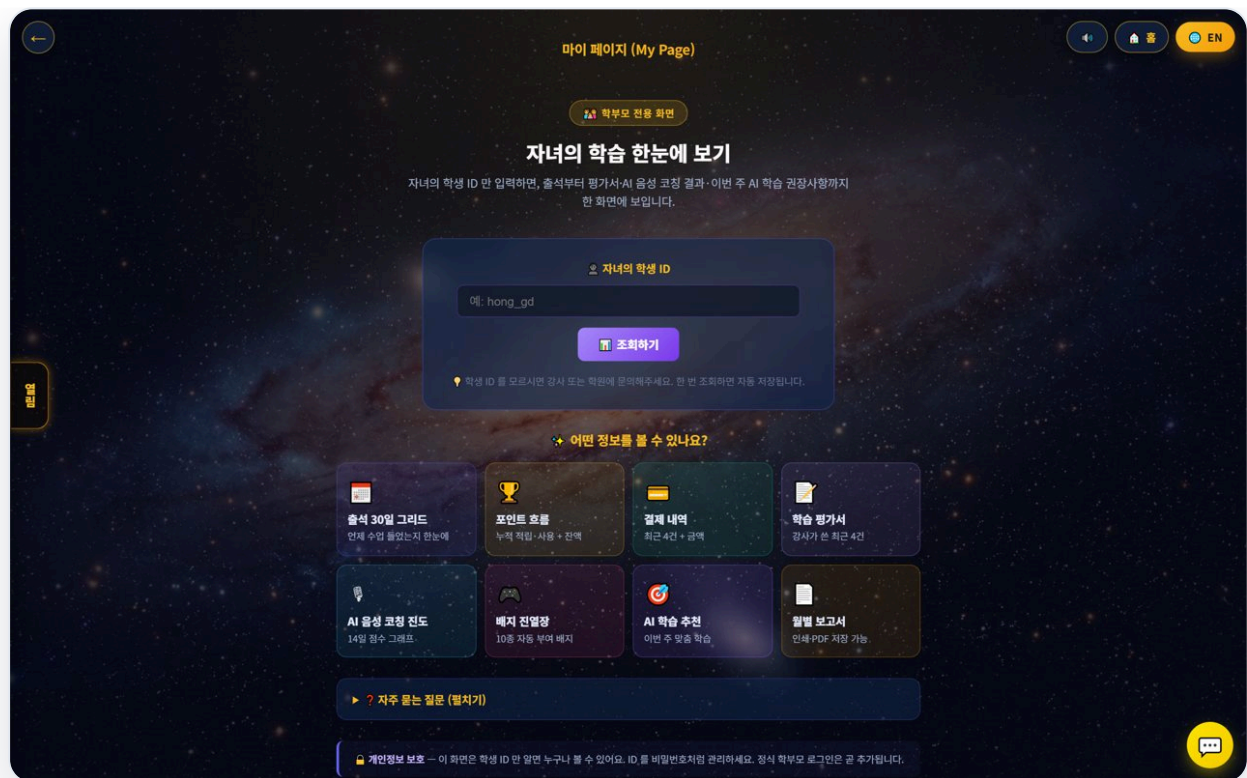

Admin

Parents can see attendance, reviews, payments and AI-recommended study on one screen just by entering their child's student ID. It reduces support questions and raises satisfaction.

How to use

- 1 my-page link
- 2 child's stude...
- 3 They see 30-d...

- 1 Share the **my-page link** with parents.
- 2 The parent enters the **child's student ID** and looks it up.
- 3 They see 30-day attendance, points, payments, reviews and the monthly report.

Key Points

- ✓ Easy access with just the student ID.
- ✓ The monthly report can be printed or saved as PDF.

Good to know Advise parents to manage the student ID like a password.

Tip Explaining my-page at signup reduces questions.

14

 Booking Management

Schedule assignment

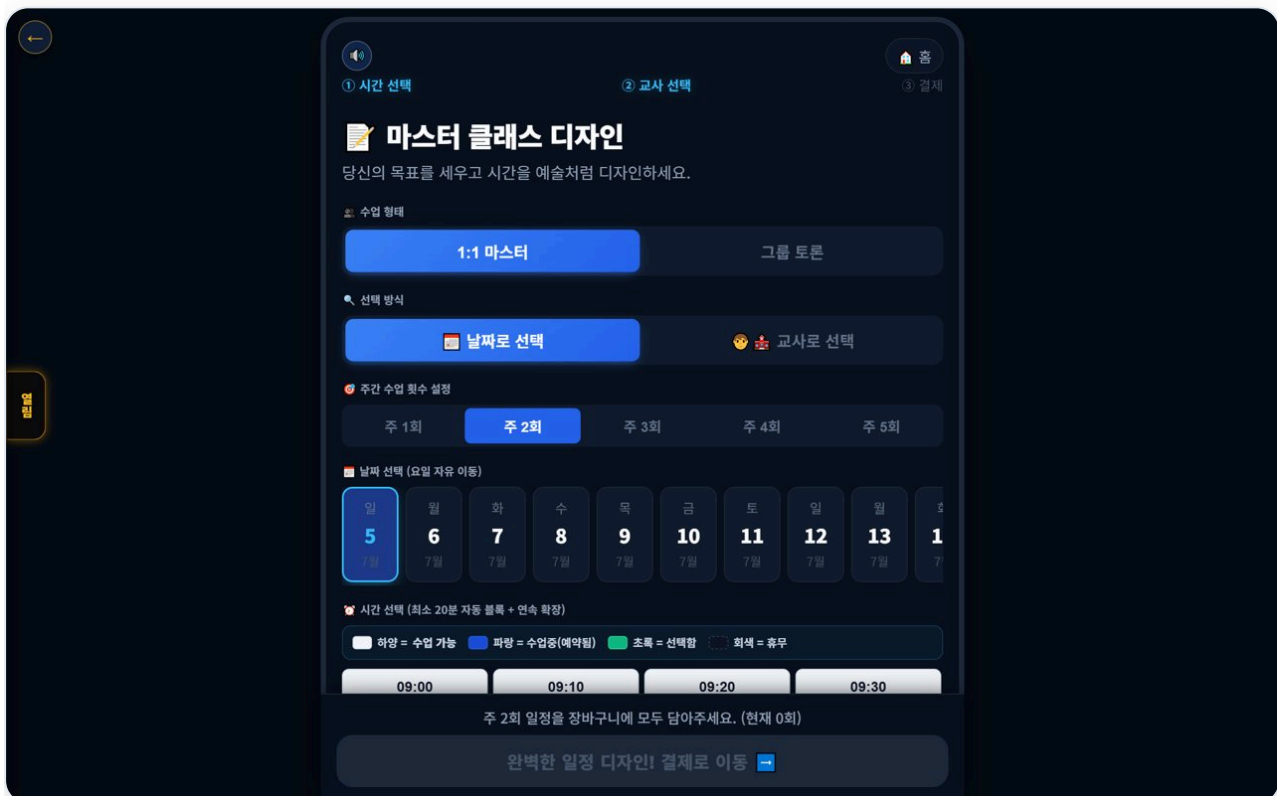

Admin

A booking screen to assign lesson type, teacher, date and time. You can review and adjust students' booking status.

How to use

- 1 Booking > 2 Check empty s... > 3 Once confirme...

- 1 In **Booking**, assign lesson type, teacher and time.
- 2 Check empty slots and overlaps and adjust.
- 3 Once confirmed, students and teachers are notified.

 Key Points

- ✓ Spread popular slots to balance teacher load.
- ✓ Recurring bookings can be set.

 **Tip** Pre-register each teacher's available times to speed up assignment.

15

Postpone Management

Review & process requests

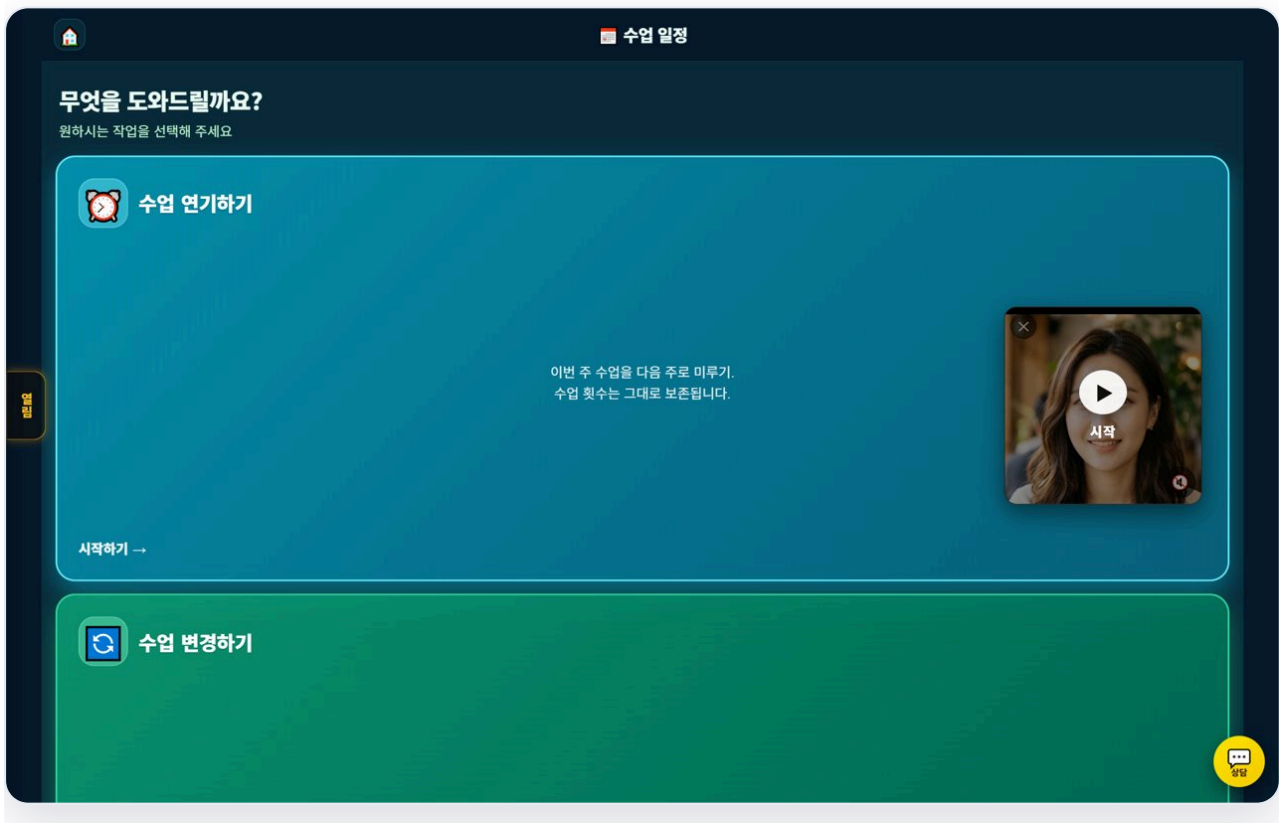

Admin

Review students' postpone/change requests and process them per policy. Last-minute requests outside policy link to the absence/deduction rule.

How to use

1 postpone/chan... > 2 adjust the sc... > 3 auto-announce...

- 1 Check students' **postpone/change requests**.
- 2 If within policy (advance notice), **adjust the schedule**.
- 3 Changes are **auto-announced to both sides**.

✓ Key Points

- ✓ Clearly announce the postpone cutoff.
- ✓ Guide out-of-policy requests per policy.

💡 **Tip** Enforcing the postpone cutoff reduces no-show losses.

16

 Content · Curriculum

Levels · textbooks · game reports

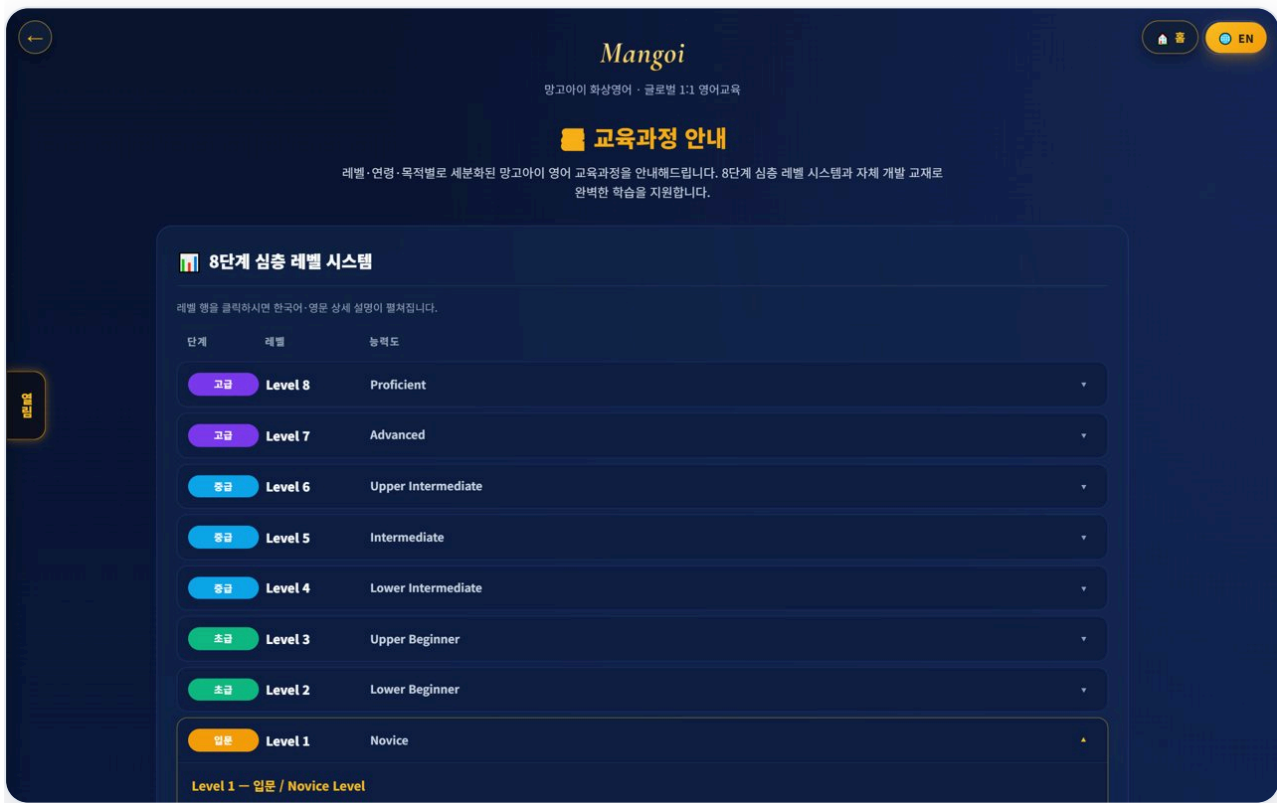

Admin

Manage the Levels 1–10 curriculum, textbook status and game learning reports (weak words).
Improve content based on learning data.

How to use

- 1 Levels 1–10 c... > 2 Review textbo... > 3 game learning...

- 1 Check the **Levels 1–10 curriculum** structure.
- 2 Review textbook upload status.
- 3 Find weak words in the **game learning report**.

✓ Key Points

- ✓ Surface weak words more in games/reviews.
- ✓ Clear level goals raise achievement.

 **Tip** Reviewing the curriculum at the start of the year makes it easy.

17

Retention Center

Churn risk · contagion · settlement · coaching

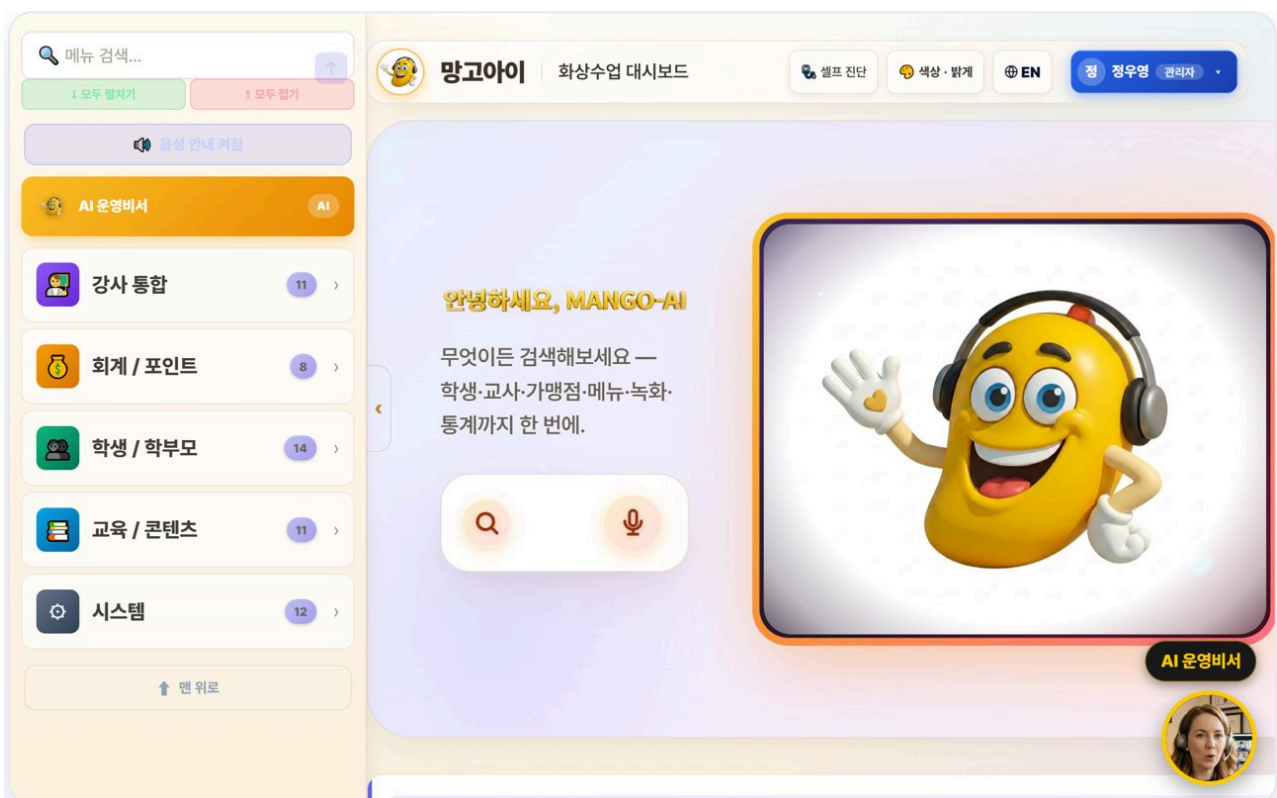

Admin

A hub to find students likely to quit early and to prevent chain churn spread through family, joint lessons and referrals. Manage four tabs in one place.

How to use

1 churn-risk gr... > 2 churn contagi... > 3 teacher coach... > 4 alert-talk/co...

- 1 Find at-risk students with the **churn-risk graph**.
- 2 Prevent chain churn with the **churn contagion network**.
- 3 Deliver review-based feedback in the **teacher coaching** tab.
- 4 Intervene on at-risk students with **alert-talk/counseling**.

Key Points

- ✓ Intervening early raises retention.
- ✓ Manage family/referral relationships together.

Tip Just caring for the top at-risk students weekly noticeably cuts churn.

18

Org Settlement · Monthly Report

HQ → branch → agency

Admin

Revenue and commissions auto-settle down the org tree, and the monthly report shows branch/agency performance. AI insights summarize the state.

How to use

- 1 auto-settle > 2 monthly repor... > 3 today's reven...

- 1 Revenue/commissions **auto-settle** down the **org tree**.
- 2 Check branch/agency performance with the **monthly report**.
- 3 Watch **today's revenue, enrollment and attendance** daily on the dashboard.

Key Points

- ✓ Distributing the settlement report early builds partner trust.
- ✓ A 5-minute daily check of the metrics is recommended.

Tip The sooner you catch warning signs (revenue drop, attendance dip), the easier to respond.

19

Support · FAQ Operations

Inquiries · refunds · postpone

Admin

Guide phone, email, Kakao and remote-support channels, and organize frequent questions into an FAQ to reduce inquiries.

How to use

- 1 Support > 2 refund/postpone > 3 FAQ

- 1 In **Support**, guide channels and hours.
- 2 Share **refund/postpone policies** with students/parents.
- 3 Add repeat questions to the **FAQ**.

Key Points

- ✓ Growing the FAQ cuts support load.
- ✓ Help directly with remote support for hard issues.

Tip Turn repeat questions like 'can't enter' into an FAQ with screenshots.

20

Korea-Philippines Dual Clock

Admin

Two countries' time on screen

A clock on screen shows KR Korea and PH Philippines time together. It lets you check the time difference instantly when coordinating lessons between Philippine teachers and Korean students.

How to use

- 1 dual clock > 2 Drag > 3 Tap (click)

- 1 On the on-screen **dual clock**, see KR Korea and PH Philippines time at once.
- 2 **Drag** the clock to move it anywhere you like.
- 3 **Tap (click)** the clock to go to the home screen.

✓ Key Points

- ✓ The Philippines is **1 hour behind** Korea (-1 hour).
- ✓ You can check booking/entry times in both countries' time.

💡 **Tip** When a lesson time is confusing due to the time difference, this clock clears it up instantly.

21

CN Chinese Pronunciation Coach

Darakwon Chinese Master Lv1-20

Admin

Mangoi offers not only English but also a **Chinese course**. With a Darakwon Chinese Master (Lv 1-20) pronunciation coach (characters+pinyin, AI voice recognition, native comparison), you can attract and manage students who want Chinese.

How to use

1 CN Chinese > 2 Master series... > 3 characters +... > 4 repeat and sl...

- 1 In the AI voice coach, pick the **CN Chinese** level (or go to the Chinese pronunciation coach).
- 2 Choose a **Master series (1-6, HSK 1-6)** and a unit.
- 3 Read the sentence (**characters + pinyin**) and compare with 'Play native audio'.
- 4 Practice hard sounds/tones with **repeat and slow (0.85x)**.

**Key Points**

- ✓ Characters and pinyin appear together, so it's easy to read.
- ✓ The AI recognizes your voice and compares it to a native speaker.
- ✓ The learning games hub supports Chinese too.

Tip Listen slowly and repeat clearly to nail the four tones.

22

Notice Studio (Poster + Popup)

Admin

Design notice/event posters and push them as app popups

This **merges the old 'Poster Maker' and 'Popup Notice' tools into one place.** In the ①**Create** tab you design a notice/event poster, then hand it straight to the ②**Publish-Popup** tab to show it as a **popup** in your academy's student app.

How to use

- 1 Go to the admin menu **Notification Center** →  **Notice Studio**.
- 2 In the ①**Create** tab, design a poster with text, images, and video (resize · save on server · reuse).
- 3 Press ' **Publish as popup**' on the finished poster to auto-switch to the ②**Publish-Popup** tab.
- 4 In the publish tab, set the **display period / stop** and publish it as a student-app popup.

Key Points

- ✓ Poster creation and popup publishing flow through **one screen, two tabs** — no more confusion.
- ✓ Posters you make can be **saved and reused**.
- ✓ Whichever route you enter from — AI assistant or sidebar search — the **correct tab opens**.

Good to know Existing posters/popups are preserved (it was only merged, nothing was deleted).

 **Tip** Promoting an event takes just one flow: 'Create → Publish as popup' right away.

23

Command the AI Operations Assistant

Admin

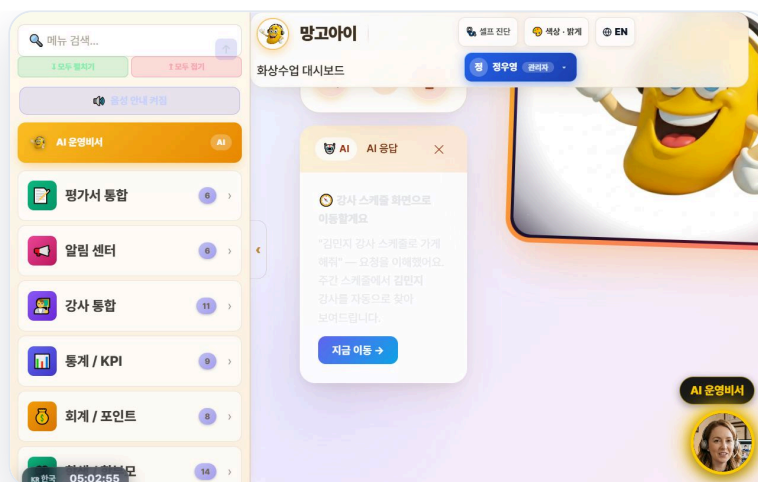

Navigate with one phrase: "Take me to ○○"

Type what you want to do into the **top search bar (or the bottom-right AI assistant)** in plain language, and the AI understands and **jumps straight to that screen**. It now reliably follows navigation commands like **'Take me to teacher ○○'s schedule'** or **'Open auto-scheduling'**.

How to use

- 1 search bar
- 2 "Take me to t..."
- 3 "Open auto-sc..."
- 4 'Go now →'

- 1 Type a command in the top **search bar** or speak with the mic.
- 2 e.g. **"Take me to teacher Kim Minji's schedule"** → auto-finds that teacher in the weekly schedule and opens it.
- 3 e.g. **"Open auto-scheduling," "Go to settlement"** to navigate menus.
- 4 Press **'Go now →'** on the AI response card to move to that screen.

Key Points

- ✓ Navigation commands **actually navigate** — far fewer 'explain only, do nothing' replies.
- ✓ Searching a schedule by teacher name **auto-fills the search box + filters + scrolls**.
- ✓ For data/statistics questions it also helps with **card-style answers**.

Good to know Commands that actually change things — 'register · send · modify' — ask for one more confirmation (a safety guard).

Tip When you can't recall a menu name, just say what you want to do — it finds its way there.

24

Student Voice-Diary Monitor

Admin

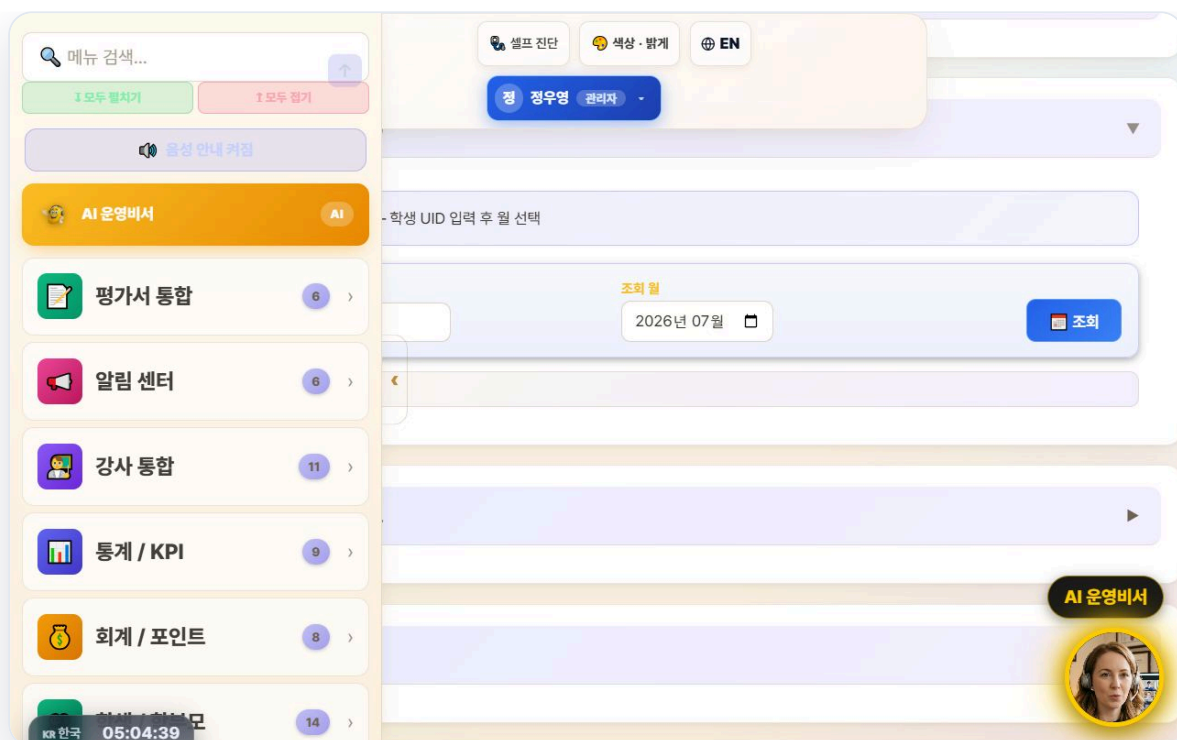

View each student's English diary · AI correction · score

View the **AI voice diaries** students leave, right from the admin screen. Per student, check the **transcript · AI correction · encouragement · score** by month to encourage consistent writers and gauge their learning.

How to use

1 Voice Diary... > 2 student UID,... > 3 transcript ...

- 1 Open the **Voice Diary (monitor)** card in the admin menu.
- 2 Enter the **student UID**, pick the **month** to look up, and press 'Search'.
- 3 Open an entry from the list to see the **transcript · correction · encouragement · score**.

Key Points

- ✓ It only shows up **once a student actually writes** a diary (the entry point is the  card on the student home).
- ✓ Find consistent writers and connect them to **praise/rewards** to lock in the habit.

 **Tip** 'Nothing shows up' usually just means that student hasn't left a diary yet.

25

🤖 Teacher AI-Coaching Review (Ops)

Admin

Collected per-class AI coaching · quality scores

After every class, the AI leaves the teacher a **coaching card** (strengths · areas to improve · a **class-quality score**). From the admin screen you can see these **gathered by most-recent**. Use it as a **growth-support / coaching-quality** tool — not surveillance.

How to use

1 📁 Retention C... > 2 🤖 Per-class... > 3 quality score...

- 1 Go to admin 📁 **Retention Center** → 📁 **Teacher Coaching** tab.
- 2 In the '🤖 **Per-class AI coaching (recent)**' section, review each teacher's latest coaching.
- 3 Use each card's **quality score** · **talk ratio** · **improvement point** to plan coaching and training.

✅ Key Points

- ✓ See every teacher's recent coaching **at a glance**.
- ✓ Admins get a **monthly rollup** focus, so it's low-pressure.

Good to know Coaching text is for a teacher's personal growth. We recommend using it as a **support tool**, not for evaluation/discipline.

💡 **Tip** For teachers whose quality score stays low, coach them together with the teacher training manual.

26

QR Attendance Check-in

One scan and attendance is done

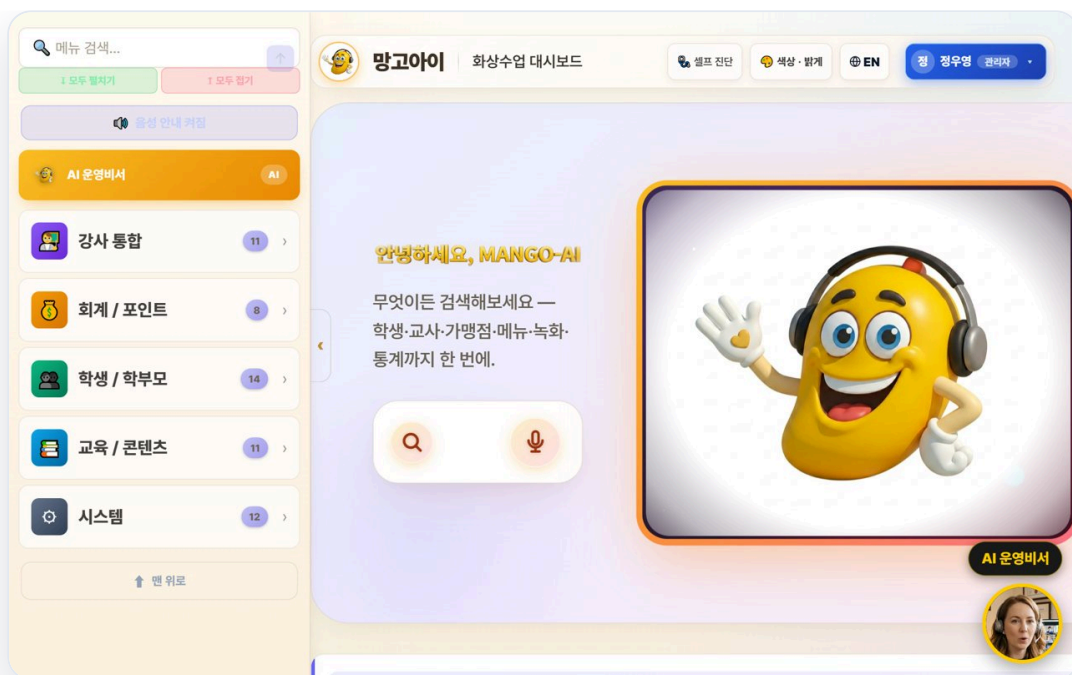

Admin

Post an **attendance QR code** at the entrance, and the moment a student scans it with their phone, **attendance is recorded automatically**. The admin dashboard shows **today's attendance in real time** — no more paper rosters.

How to use

- 1 QR Attendance > 2 entrance or f... > 3 check-in scre... > 4 attendance vi...

- 1 Open the **QR Attendance** card in the admin menu and generate **your academy's QR code**.
- 2 Print the QR and post it at the **entrance or front desk**.
- 3 Students scan with their phone camera and check in on the **check-in screen**.
- 4 Watch today's arrivals and times live on the dashboard's **attendance view**.

Key Points

- ✓ Arrival times are recorded automatically — **fast and accurate**.
- ✓ Attendance data flows into student management and reports.

Good to know The QR code is unique to your academy. Keep it from being shared outside.

Tip Stand a tablet at the desk during arrival hours so students can scan without queuing.

27

📞 Consultation Booking Management

Admin

From new inquiries to scheduled consults

Take **consultation bookings** from parents and prospects and **manage them on one screen**. Track each booking's **schedule and status (pending/done)** and carry the consult onward toward enrollment.

How to use

1 Consultation... > 2 new booking > 3 status to don... > 4 level test →...

- 1 Open the **Consultation Booking** card in the admin menu.
- 2 Register a **new booking** (name, contact, preferred time) or review incoming ones.
- 3 After the consult, set the **status to done** and leave a note.
- 4 Carry it forward: consult → **level test** → **enrollment**.

✅ Key Points

- ✓ Bookings live in one place, so **no consult slips through**.
- ✓ Consult history makes **repeat inquiries** easy to handle.

💡 **Tip** A quick follow-up call the day after a consult noticeably lifts enrollment conversion.

28

Friend-Referral Rewards

Track referrals · pay out rewards

Admin

See the **referral status** of enrolled students bringing friends, and **process reward payouts**. Who referred whom, and whether the reward was paid — all on one screen, turning word-of-mouth into a system.

How to use

- 1 Referral Rewa... > 2 referrer · re... > 3 reward payout

- 1 Open the **Referral Rewards** card in the admin menu.
- 2 Review the list of **referrer · referred friend · enrollment status**.
- 3 For qualifying cases, process the **reward payout** (points, gift vouchers, etc.).

← 홈 환불규정

1. 환불 기준표

환불 요구 시기	환불 금액(%)	예) 수강료 100,000원 지불
수업 시작 전	납부금액의 100%	100,000원 환불
총 수업시간의 1/3 이전	납부금액의 70%	70,000원 환불
총 수업시간의 1/2 이전	납부금액의 50%	50,000원 환불
총 수업시간의 1/2 이후	납부금액의 0%	환불 안 됨

※ '총 수업시간'은 수강 신청한 전체 수업 횟수(또는 기간)를 기준으로 하며, 환불 기준일은 환불을 서면·온라인으로 신청한 날입니다.

2. 환불 전 꼭 확인해주세요

▲ 할인가로 결제한 수업의 환불 정산

할인은 '약정한 수강 기간을 모두 이수한다'는 조건으로 제공되는 혜택입니다. 따라서 중도 환불 시 이미 진행된(수강한) 수업은 할인이 적용되지 않은 정상가(정가) 기준으로 재정산되어 환불 금액에서 차감되며, 차액을 정산하여 보내드립니다.

예시) 정상가 200,000원 → 30% 할인받아 140,000원 결제, 전체 20회 중 5회 수강 후 환불 신청 시 • 이미 들은 5회는 정상가(1회 10,000원)로 계산 = 50,000원 차감 • 환불액 = 140,000원 - 50,000원 = 90,000원

■ 연기신청 없이 빠진 수업은 '결석' 처리

사전에 정해진 절차에 따라 '연기(변경) 신청'이 접수되지 않은 채 진행되지 못한 수업은 결석으로 간주되어 정상 진행된 수업과 동일하게 수업료에 반영(차감)됩니다. 즉, 환불 신청 시 '이미 진행된 수업'에 포함되어 환불 대상에서 제외됩니다.

💡 부득이하게 수업에 참여할 수 없을 때는 반드시 수업 시작 전에 [연기/변경] 메뉴에서 연기 신청을 해주세요. 연기 신청된 수업은 결석으로 처리되지 않습니다.

Key Points

- ✓ Referral history is kept as data — **transparent, no disputes.**
- ✓ Linking rewards to student points and the shop multiplies the effect.

💡 **Tip** Pair it with a 'refer a friend' event before each semester and watch inquiries jump.

29

Approving Postpone/Change Requests

Admin

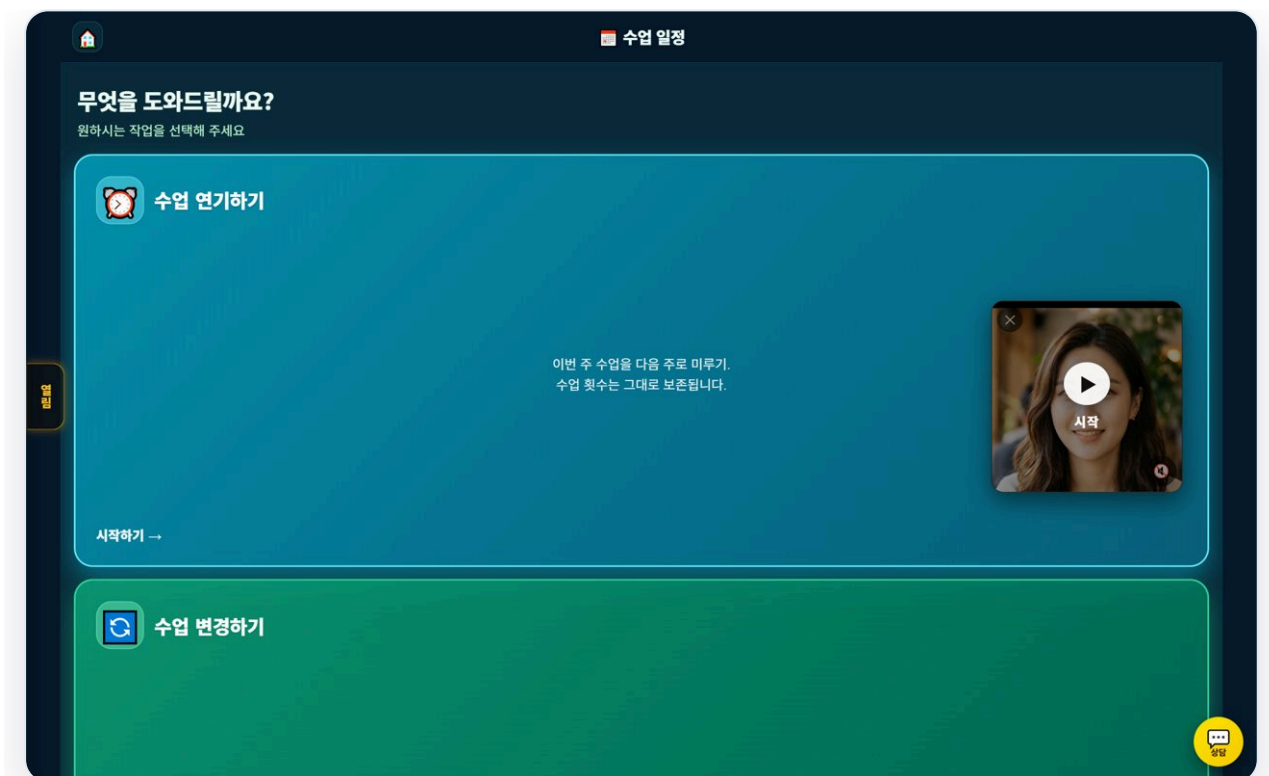

Review and approve teacher-submitted requests

Class postpone and time-change requests submitted by teachers gather on the admin screen in real time. Check the reason and **approve or decline** — the schedule updates immediately, replacing phone-and-messenger juggling with one screen.

How to use

1 Class Postpon... > 2 teacher · cla... > 3 Approve

- 1 Open the **Class Postpone/Change Requests** card in the admin menu.
- 2 Review each pending request's **teacher · class · reason**.
- 3 Press **Approve** or **Decline** — the result flows to the schedule and the teacher.

✓ Key Points

- ✓ Request and decision history is kept, so everything stays **transparent**.
- ✓ For changes parents should know about, follow approval with a notification.

💡 **Tip** Clearing pending requests every morning prevents same-day confusion.

30

Share Library Links via KakaoTalk

Admin

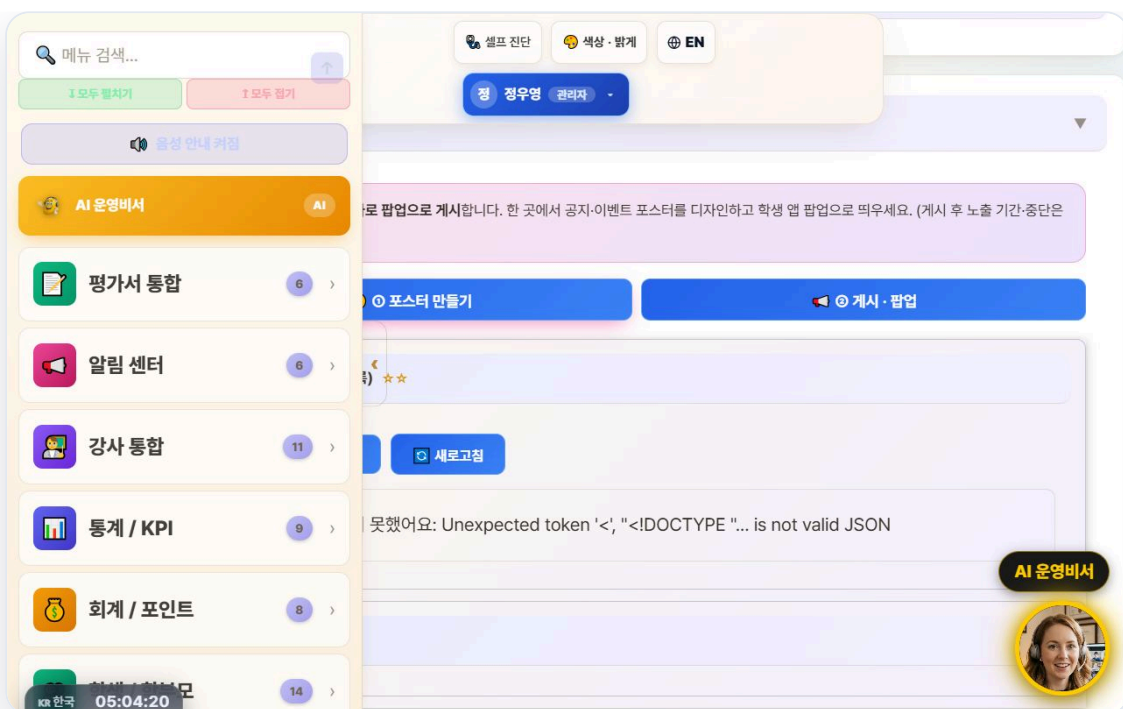

Send videos & docs in original quality

Every guide and video in the library now has a 'Copy KakaoTalk link' button. Attaching a file to KakaoTalk crushes the quality, but sending a link plays the original as-is. One tap copies the link — guiding parents and teachers gets much easier.

How to use

- 1 Library
- 2 Paste
- 3 original qual...

- 1 In the admin **Library**, press **Copy KakaoTalk link** next to the file.
- 2 **Paste** it into the KakaoTalk chat room.
- 3 Recipients tap the link to watch or download in **original quality**.

Key Points

- ✓ For videos, **link sharing = original quality**; file attachments degrade it.

- ✓ Works the same for PDFs, PPTs, and videos anywhere in the library.

Good to know Anyone with the link can open it. For internal-only material, check who you share with.

Tip In a parents' group chat, one video-guide link does all the explaining.

31

Enrolment & payment → automatic lesson creation

Admin

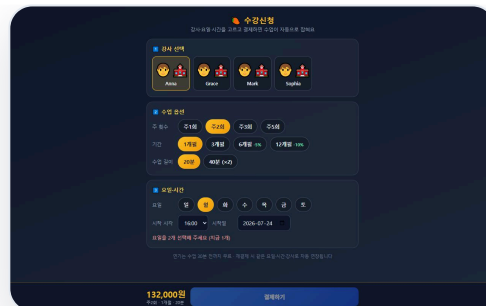

Once payment is confirmed, every session is scheduled

On the **Enrolment screen** a student picks teacher, days and time and pays — and **all lesson sessions are created automatically the moment payment is confirmed**. The old manual timetable entry after payment is gone. If the slot **clashes with an existing lesson, the conflict is detected before payment**.

How to use

- 1 enrolment lin... >
- 2 teacher → les... >
- 3 slot check mu... >
- 4 all sessions... >
- 5 pricing scree...

- 1 Send students and parents the **enrolment link**.
- 2 They choose **teacher → lesson options (weekly count, term, length) → days & time**.
- 3 The **slot check must pass** before the pay button unlocks (payment is blocked on a clash).
- 4 On confirmed payment, **all sessions are created at once** — verify in the admin lesson list.
- 5 Head-office prices and discount rates are managed on the **pricing screen**.

Key Points

- ✓ **Idempotent** — a duplicated payment callback will not create the sessions twice.
- ✓ Clashes with holidays or existing lessons are **pushed back** so the session count is still met.
- ✓ Term discounts (6 months -5%, 12 months -10%) are applied to the amount automatically.

Good to know Stage 1 (enrol → pay → auto-create sessions) is live today. Later stages will follow.

 **Tip** Consultation → level test → send the enrolment link is the smoothest conversion path.

32

👁️ Class Observation (live)

Quietly look in on a lesson in progress

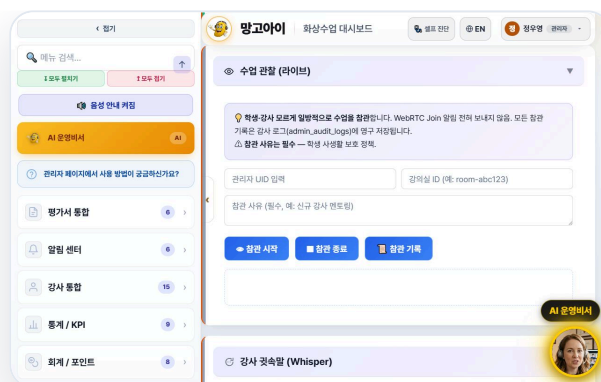

Admin

You can **sit in on a live lesson without the student or teacher knowing**. No join notification is sent, so the lesson isn't disturbed — use it for **mentoring new teachers, quality checks and parent complaints**. Every observation is **permanently written to the audit log**.

How to use

- 1 Class Observa...
- 2 admin UID
- 3 observation r...
- 4 Start observi...
- 5 Observation l...

- 1 Open the **Class Observation (Live)** card in the admin menu.
- 2 Enter your **admin UID** and the **room ID**.
- 3 Write an **observation reason** — this is required (e.g. new-teacher mentoring).
- 4 Press **Start observing**; press **Stop observing** when done.
- 5 Past sessions are listed under **Observation log**.

✅ Key Points

- ✓ While observing, **your audio and video are not transmitted**.
- ✓ A reason is mandatory — this is student privacy policy.
- ✓ Who observed, when and why is **fully recorded**.

Good to know This touches student privacy directly. Use it **only when there is a business need**, and write a specific reason.

Tip Observe new teachers once a week for their first two weeks, then coach — quality stabilises quickly.

33

**A refreshed admin screen**

Admin

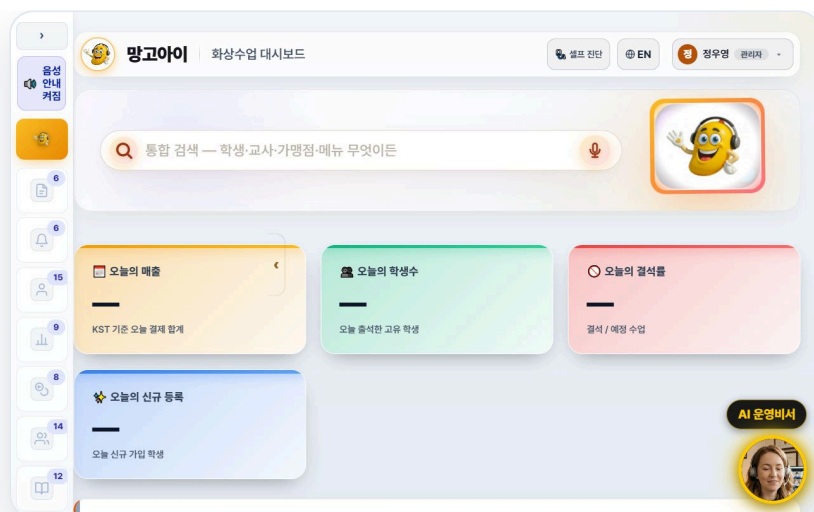

Collapsible sidebar · lighter background · line icons

The admin screen is now **easier on the eyes and wider**. The left menu collapses to a **narrow icon rail** via the < **Collapse** button, and the background is now a **consistent light tone**. Menu icons were redrawn as **line icons** so labels read clearly.

How to use

1 < Collapse > 2 > 3 remembered fo... 4 menu search

- 1 Press < **Collapse** at the top of the left menu — it shrinks to an icon rail and **the content gets wider**.
- 2 Press the > button in the same place to expand it again.
- 3 The collapsed state is **remembered for your next visit**.
- 4 Too many menus to find one? Type its name into **menu search** at the top.

**Key Points**

- ✓ Screens full of tables and lists gain **a lot of horizontal space**.
- ✓ 15 sub-pages were moved onto the **same light theme**, so the colour jump between screens is gone.
- ✓ The collapse animation was **removed** so low-spec PCs don't stutter.

Tip Wide-table screens like settlement and payroll are far easier to read with the menu collapsed.

34

The interface language sets itself

Admin

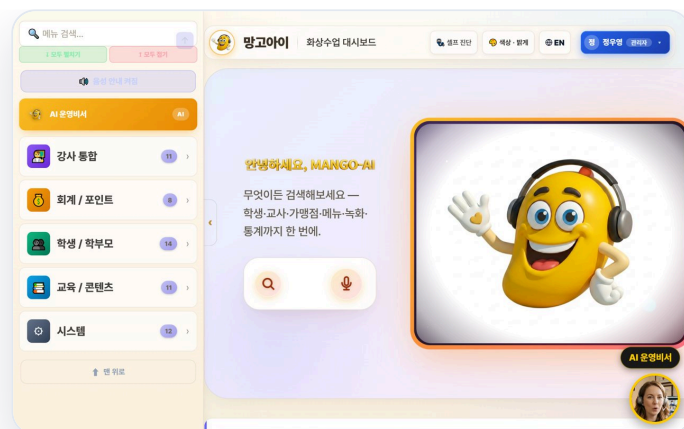

Overseas staff and teachers start in English

Filipino teachers and overseas staff now **start in English from the first screen**. The interface language is decided from the account's **nationality**, and teacher accounts are **always English** regardless of name or previous choice. You can still switch any time with the  **EN / KR** button at the top.

How to use

- 1 nationality > 2  EN / KR > 3 per account > 4 switch to the...

- 1 If the account has a **nationality** on file, the right language appears automatically at login.
- 2 To change it manually, press the  **EN / KR** button at the top.
- 3 A manual choice is stored **per account** — several people can share one PC without interference.
- 4 Teacher guide slides and manuals **switch to the English editions** with it.

Key Points

- ✓ **Teacher accounts are always English** — no more getting lost in a Korean screen.
- ✓ Accounts with an English name no longer flip to Korean because of a Korean job title.
- ✓ Language choice is **isolated per account**, so an overseas account isn't overwritten by someone else's pick.

Good to know Accounts with no nationality fall back to the old name/ID heuristic. Please fill in nationality when registering teachers.

Tip Enter nationality when registering a new teacher and their very first login is in English — fewer support requests.

35

Running Judgment Training (student judgment index)

Admin

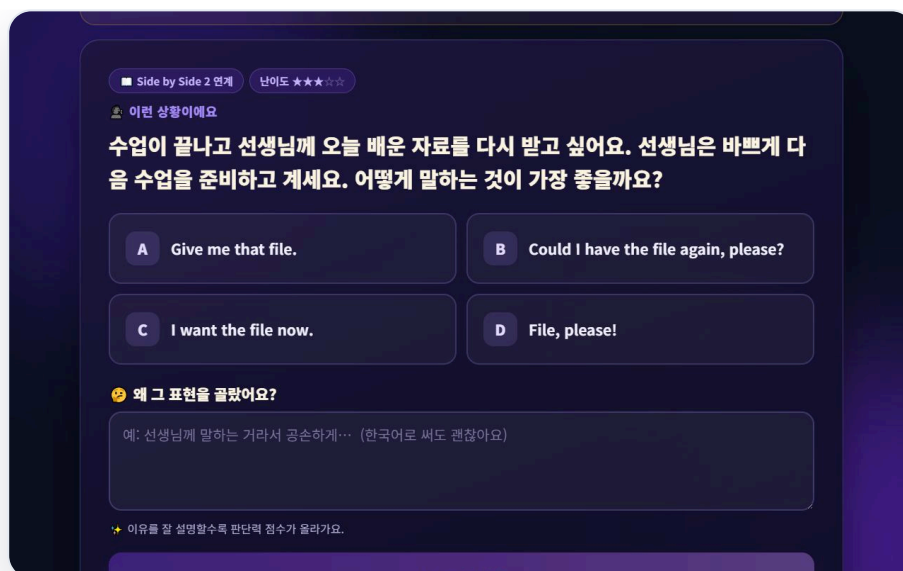

Not memorisation but judgment — a new outcome metric

In **Judgment Training**, a student picks the expression that fits a situation and explains why. Results accumulate into a **judgment index** across 5 axes — evidence you can show in parent consultations that answers “**how well do they judge for themselves**”, not just “what did they memorise”.

How to use

- 1 AI Learning T... > 2 My Growth > 3 index trend c...

- 1 The feature lives at **AI Learning Tools** → **Judgment Training** on the student screen.
- 2 Per-student results appear on the **My Growth** screen and in learning reports.
- 3 Show the **index trend chart** as supporting evidence during consultations.

Key Points

- ✓ **Recent answers are weighted more** (half-life weighting), so current ability shows up fast.
- ✓ **Partial credit** means one wrong answer doesn't crash the index.

- ✓ Questions combine **24 topics × 12 angles**, so students get different questions.

Good to know Read the judgment index as a **growth trend**, not an exam score. The direction matters more than the absolute number.

Tip This is the best material to answer the classic parent question: “They know the words but can't speak.”

36

🔑 Teacher accounts (password reset · access limits)

Admin

Handling lost passwords · scoping permissions

When a teacher forgets their password you can **reset it directly from the admin screen**. Teacher account access was also tightened so that **operations and settlement features a teacher doesn't need simply don't open**.

How to use

1 Teachers > 2 Reset passwor... > 3 change it rig... > 4 fill it in

- 1 Find the teacher under **Teachers** in the admin menu.
- 2 Use **Reset password** to issue a temporary password.
- 3 Pass it on and tell them to **change it right after logging in**.
- 4 If the teacher's nationality is blank, **fill it in** so their screen opens in English.

👤 교사 마이페이지 메뉴

망고아이판? 관리자 마이페이지 포인트상점 단계별 발음 연기/번경 신규상담 복습퀴즈 전체메뉴 수업 진단 수업 신청

✅ Key Points

- ✓ Teacher accounts **cannot reach operations or settlement features** (32 areas blocked).
- ✓ Reset actions are logged.
- ✓ Teachers with a nationality on file **start in English from their first login**.

Good to know Send temporary passwords only over a channel where **you can verify who you're talking to**.

Tip Fill in nationality and contact details when registering a new teacher — later questions drop sharply.

37

Teacher Management, redesigned (roster filters · groups · detail tabs)

Admin

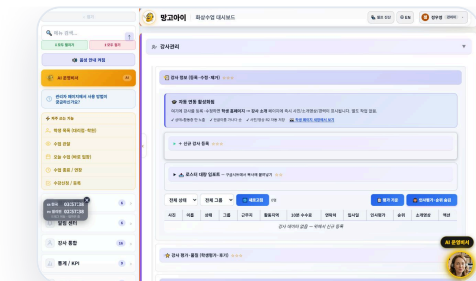

Easy-to-search roster · detail at a glance

The teacher-management screen is now **easier to search and read**. Scattered menus are **grouped into four bundles** in the sidebar, and above the roster there are **status/group dropdown filters** with **applied-filter chips**. Tapping a teacher opens a detail view split into **Profile / Payroll / Evaluation tabs**, with a **manager badge** and **employment status (active / on-leave / left)** shown at a glance.

How to use

- 1 Teachers
- 2 status/group...
- 3 chips
- 4 Profile / Pay...
- 5 summary numbe...

- 1 Open **Teachers** in the admin menu (menus are tidied into four bundles).
- 2 Filter to just the teachers you want with the **status/group dropdowns** above the roster.
- 3 Applied filters show as **chips**; remove a chip to clear it.
- 4 Tap a teacher to open the **Profile / Payroll / Evaluation** detail tabs.
- 5 The **summary numbers on the payroll/evaluation tabs** load only as needed when opened.

Key Points

- ✓ **Managers** are marked with a badge, and status shows as **active / on-leave / left (3 states)**.
- ✓ A blank name **falls back to the ID**, so there are no empty cells.
- ✓ Detail tabs **reuse existing APIs** for speed, and the screen is bilingual (KO/EN).
- ✓ The duplicate payroll entry was tidied and **bug reports moved to a separate system**.

Good to know This is a filtering/detail cleanup. Registering, editing and deleting teachers works exactly as before.

Tip The more teachers you have, the more the status/group filters help. Keep your usual conditions filtered.

38

★ Sending the Parent Monthly Report (pentagon)

Admin

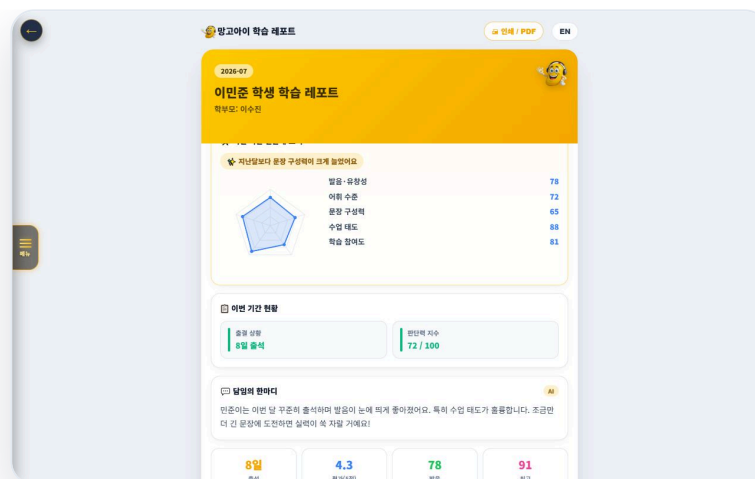

Preview the 5-axis report, then share the link

The **monthly report** sent to parents is renewed as a **pentagon 5-axis graph** — **Pronunciation & Fluency / Vocabulary / Sentence Building / Class Attitude / Participation** — at a glance, with attendance, judgment and a teacher's note. Admins and teachers enter a student ID and month to **preview**, then send the **KakaoTalk link**.

How to use

1 Monthly Repor... > 2 student ID > 3 Check the pen... > 4 ?uid=ID&perio...

- 1 Open the **Monthly Report** screen.
- 2 Enter a **student ID** and **month**, press **View Report** to preview.
- 3 Check the pentagon and teacher's note; top up evaluations if needed.
- 4 Append **?uid=ID&period=YYYY-MM** to the URL and send the **KakaoTalk link**.

✓ Key Points

- ✓ Only axes with **real records** are filled, so it's trustworthy.

- ✓ Compiled on a **two-month cycle** — conveys change without tiring parents.

- ✓ The Print/PDF button makes a paper report for consultations instantly.

Good to know Report access passes an **approval gate** — admins via their login session, parents only via the issued link (token).

Tip Sending the report link ahead of a booked consultation makes the meeting much smoother.

39

**Parent Weekly Report (the re-enrolment lever)**

Admin

Deliver the proof of growth competitors cannot show

A report sent to parents containing the child's **week of activity** (attendance, AI friend chats, judgment training, words conquered, pronunciation). The purpose is explicit — **deliver the proof of growth competitors cannot show, every week, and convert it into re-enrolment**. The admin screen covers **preview** → **test send** → **recipient count** → **send log**.

How to use

- 1 Parent Week... >
- 2 Preview >
- 3 Send to this... >
- 4 Count recipie... >
- 5 Recent send I...

- 1 Open **Parent Weekly Report** in the admin menu.
- 2 Enter a student ID and press **Preview** to check the content.
- 3 If needed, use **Send to this parent** to test with a single recipient.
- 4 Use **Count recipients** to see how many students can receive it (those with a registered phone number).
- 5 Check **Recent send log** for what actually went out.

**Key Points**

- ✓ What the report contains: **attendance days** · **streak** · **AI chats** · **words conquered** · **judgment** · **pronunciation**.

- ✓ **Only students with a registered phone number** can receive it — the count screen also reports how many are missing one.

- ✓ A **Friday-evening automatic send (cron)** is prepared and ready.

Good to know ● **The full automatic send is OFF by default.** Real messages only go out after an admin turns on the KV switch — a safeguard against accidentally messaging 29,000 people. Turn it on only after the alert-talk template is approved and management has decided.

Tip Start with **preview** → a **single test send** only. Once the wording is settled, then turn on the full switch.

40

Home Screen Split (first-time parent vs. existing member)

Admin

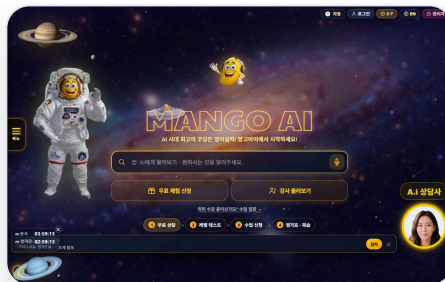

Fewer 'how do I start?' calls, more trial sign-ups

The first screen of the site (the hero) now shows **one of two versions depending on who is looking**. A **first-time parent** sees **Book a Free Trial** as the biggest button; a **logged-in member** sees **Enter Class**. We checked four competitors directly (Cambly Kids, Min Byung-chul UPhone, Engoo, Ringle) and **all four lead with a new-customer call to action** — this change follows that evidence.

How to use

- 1 home URL in a... > 2 Book a Free T... > 3 Enter Class · ... > 4 plain home UR...

- 1 Open the **home URL in a private/incognito window** to see the **guest screen**.
- 2 Confirm the two large buttons: **Book a Free Trial** · **Browse Teachers**.
- 3 Log in and open the same page — it becomes **Enter Class** · **Chat with AI**.
- 4 Use the **plain home URL** in flyers and text messages — no separate landing page is needed.

Key Points

- ✓ **No new page was created.** The same URL decides for itself based on login state.
- ✓ The guest screen still keeps a **small 'Enter Class' link** — this prevents an existing student who changed devices or was logged out from being locked out of class.
- ✓ If the check fails for any reason, it **always falls back to the guest screen** — the page is never blank.
- ✓ **No flicker.** The decision is made before the page paints.

Good to know Never remove the small 'Enter Class' link on the guest screen. Existing members also land there when their login expires (30 days) or they switch devices.

Tip To see what a parent sees, open the home page in an incognito window — that is the exact first impression.

41

⚡ The Admin Screen Is Much Faster Now

Admin

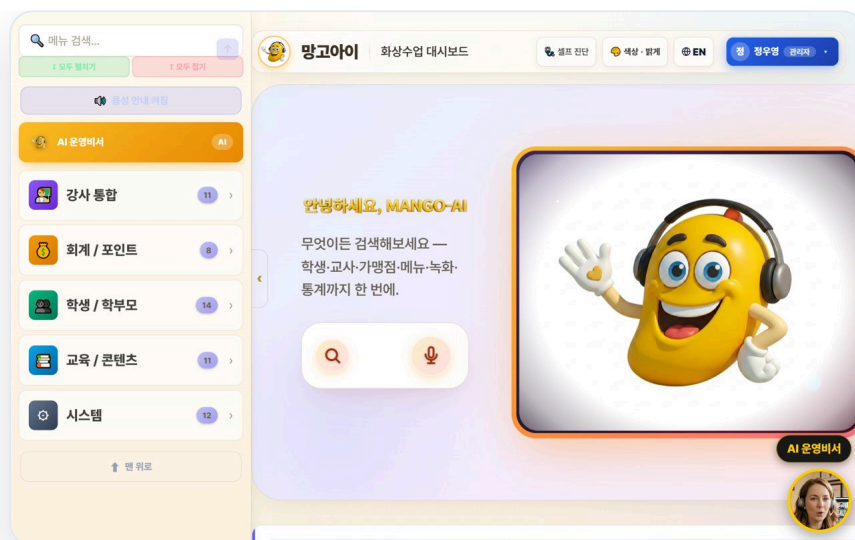

The freeze after clicking is gone

We removed the **brief freeze that happened whenever you clicked something** in the admin screen. The cause was not the feature you clicked — a readability-enhancement routine was **recalculating every collapsed card each time**. It now skips collapsed cards and never re-touches what it has already processed.

How to use

- 1 Use the admin...
- 2 open immediat...
- 3 hard refresh...

- 1 Use the admin screen as usual.
- 2 Check that menus and cards **open immediately, with no freeze**.
- 3 If it still feels slow, do a **hard refresh (Ctrl+F5)** in the browser.

✓ Key Points

- ✓ Freeze on click dropped **396ms → 57ms**; idle load dropped **366ms → 0ms**.

- ✓ **Nothing about the look or colours changed** — only the speed.

- ✓ The difference is largest on card-heavy screens (teacher and student lists).

Good to know If your browser still holds an old copy of the page you may not feel the improvement. Do one **hard refresh (Ctrl+F5)**.

Tip If it is still slow, check whether too many browser tabs are open.

42

Academy Search Box (find it by name)

Admin

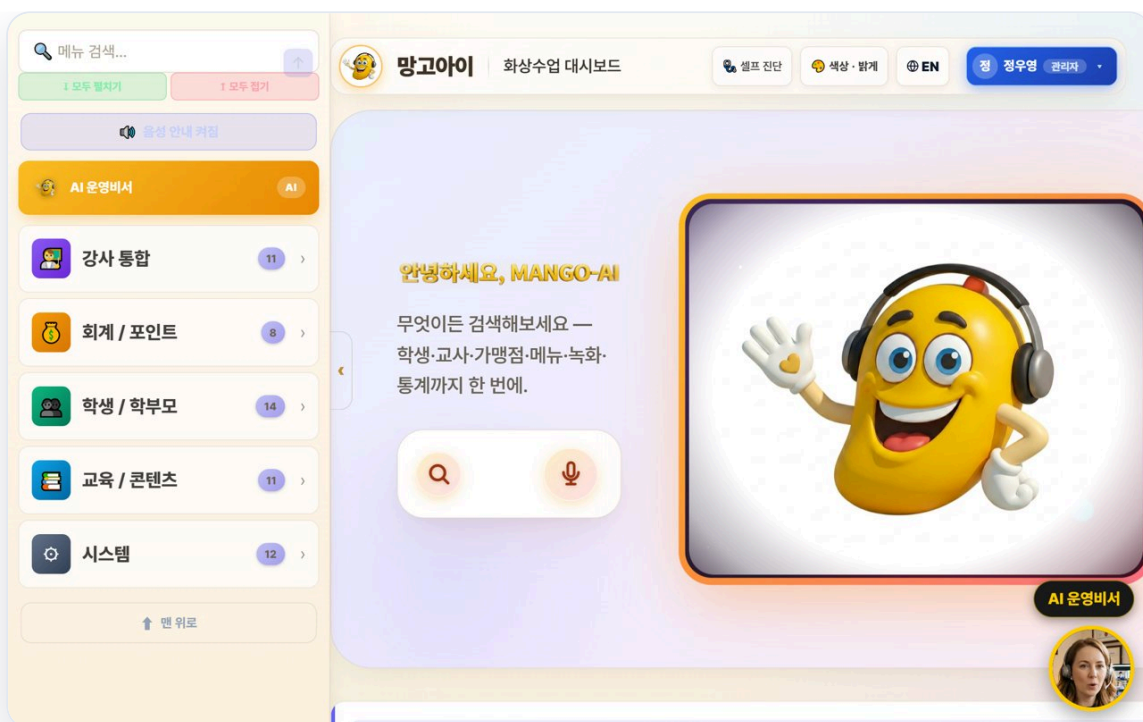

No more scrolling the whole list

The academy (branch/agency) list now has a **search box** so you can find one by typing its name.
No more scrolling up and down a long list.

How to use

1 academy list > 2 search box > 3 matching acad... > 4 full list

- 1 Open the **academy list** screen in the admin menu.
- 2 Type part of an academy name into the **search box** above the list.
- 3 The list filters to **matching academies as you type**.
- 4 Clear the box to return to the **full list**.

Key Points

- ✓ A **partial name is enough** to find it.
- ✓ The existing list and its features are unchanged — **only the way you find things was added.**

Tip For academies you check often, remember two or three letters of the name — that is enough to filter instantly.

43

Sticky First Column · Create a Sample Lesson

Admin

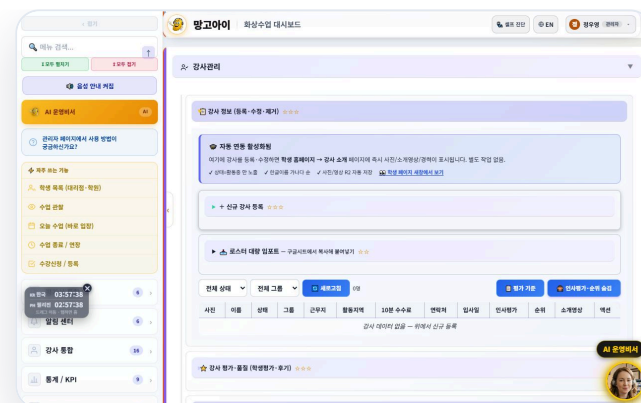

Scroll sideways and you still know whose row it is

Two frustrations fixed. ① Scrolling the teacher roster to the right made the **teacher's name disappear**, so you could not tell whose row you were reading → the **first column is now pinned**. ② With no lesson today you could not check the textbook, video, quiz or report screens → a **Create Sample Lesson button** was added to the timetable card.

How to use

1 Teachers → Te... > 2 to the right > 3 Timetable car... > 4 teacher name

- 1 Open **Teachers → Teacher Roster**.
- 2 Scroll the table **to the right** and confirm the teacher name stays pinned on the left.
- 3 To check the lesson screens, press **Timetable card → Create Sample Lesson**.
- 4 Enter a **teacher name** in the confirmation dialog and create it.

Key Points

- ✓ The pinned column is **opaque**, so text behind it never shows through.
- ✓ Sample lessons are **fixed to the demo student account (student)** — real student data stays clean.
- ✓ Creating one **sends no KakaoTalk or push notification** (verified).
- ✓ The screen is labelled in **both Korean and English**.

Good to know Sample lessons are for checking screens. Left in place they have no effect on real settlement or statistics, because they belong to the demo account.

Tip Create one sample lesson for new-staff training and you can demonstrate the entire flow without any real student.

44

31 Work / Break / Leave — Entry Point Added

Admin

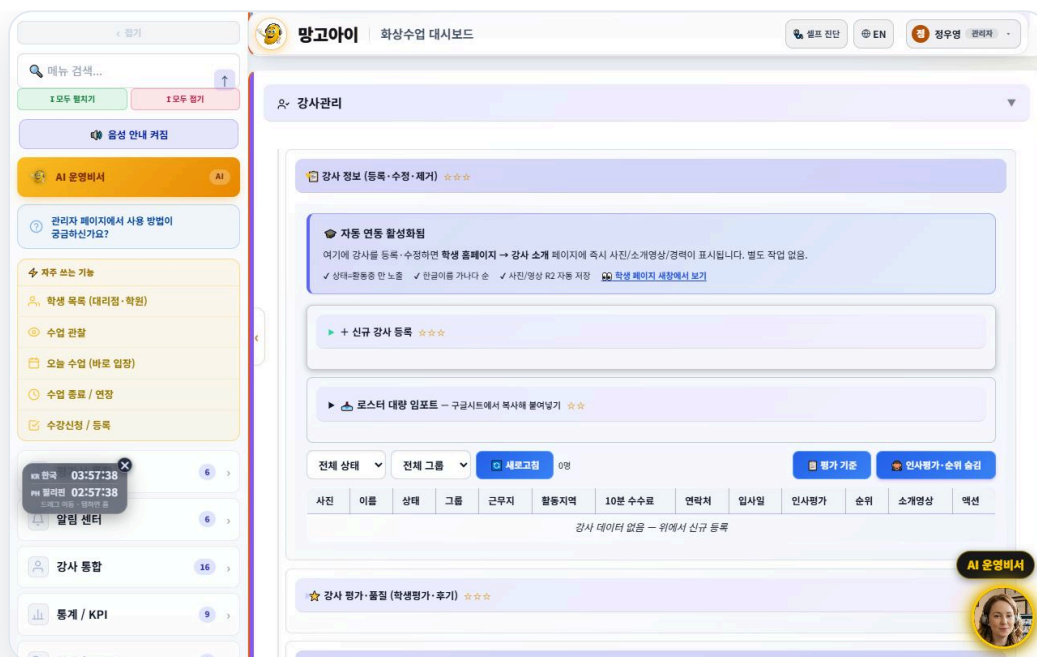

The real cause behind 'this feature doesn't exist'

Teachers reporting that '**work, break and leave registration doesn't work**' were not describing a missing feature — they were describing a **missing entry point**. The screen already existed under System ▶ Calendar, but **there was no route to it from the teacher's path**. A shortcut on the Teachers screen fixed it.

How to use

- 1 Work / Break...
- 2 When a teache...
- 3 System ▶ Cale...

- 1 Confirm the **Work / Break / Leave shortcut** is present on the **Teachers** screen.
- 2 When a teacher asks, point them to this route.
- 3 The original **System ▶ Calendar** route still works.

Key Points

- ✓ **No new feature was built — a connection was added.** Data and behaviour are unchanged.
- ✓ A large share of teacher complaints turn out to be this same '**missing connection**' pattern.

Tip When a teacher reports a missing feature, first check whether the screen really is absent. Usually only the entry point is.

45

New-Payment Screen, Now Step-by-Step

Admin

It no longer shows 12 products at once

The new-payment screen now starts with 'who is this for?'. Previously all **12 products** appeared at once and parents had no idea where to start. Now they pick from **Kids · 1:1 · Group · Business · Test Prep · Corporate** and only the matching products remain.

How to use

1 New Payment > 2 audience > 3 Only the prod... > 4 See Full Pric...

- 1 Point the parent to the **New Payment** screen.
- 2 Have them pick the **audience** first (Kids, 1:1, Group, Business, Test Prep, Corporate).
- 3 Only the products for that audience stay on screen.
- 4 If they want to compare everything, press **See Full Price List**.

Key Points

- ✓ **No product card or payment logic was changed** — only what is displayed, so it is safe.
- ✓ **See Full Price List was deliberately kept** — hiding prices backfires.
- ✓ Verified counts: 3 initially (free trial, other, policy) → 4 when Kids is selected → 12 in full view.

Tip When a caller says 'I don't know which one to pick', just have them choose the audience first.

46

**Sample Report Card for Parents Without an Account**

Admin

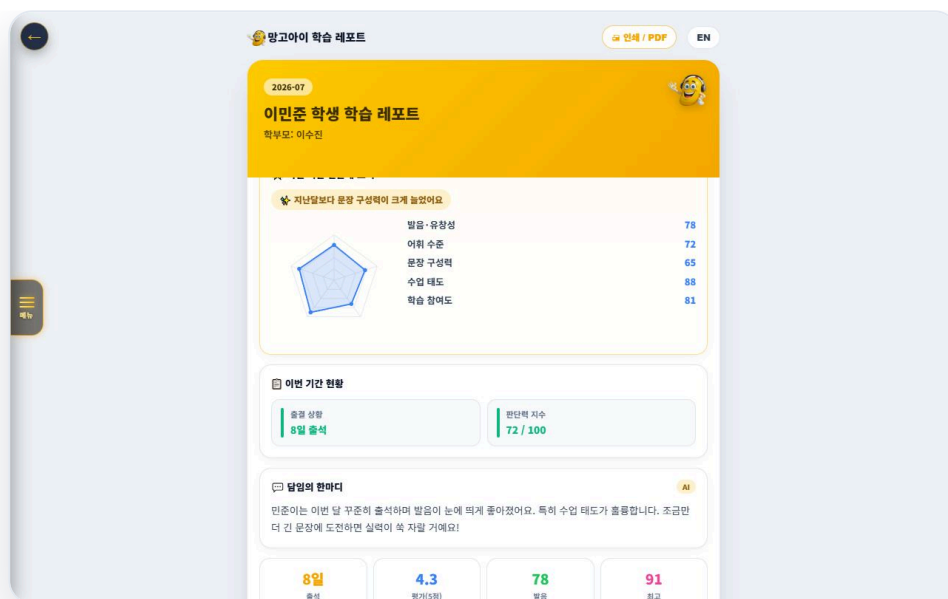

Something to show in front of the login wall

Until now there was **nothing to show a prospective parent** who had no account. The report-card screen now offers '**No account — view a sample report first**', so you can show what the **5-axis scores + teacher comment + AI analysis** look like without logging in.

How to use

1 report-card s... > 2 No account —... > 3 Walk through... > 4 Close with 't...

- 1 During a consultation, open the **report-card screen** for the parent.
- 2 Press **No account — view a sample report first**.
- 3 Walk through the 5-axis scores, teacher comment and AI analysis together.
- 4 Close with 'this is what you'll receive for your child' and offer the trial.

**Key Points**

- ✓ **⚠ All values are examples.** The title and top banner are marked 'Sample'.

- ✓ **Never remove that marking** — if it is mistaken for a real record it becomes a trust problem.

Good to know The sample uses no real student data. Use it for consultations only.

💡 Tip Showing the sample report in the first three minutes of a consultation makes 'what do I actually get?' concrete and lifts trial conversion.

47

Parent Side Menu Grouped into Categories

18 flat items → 4 groups

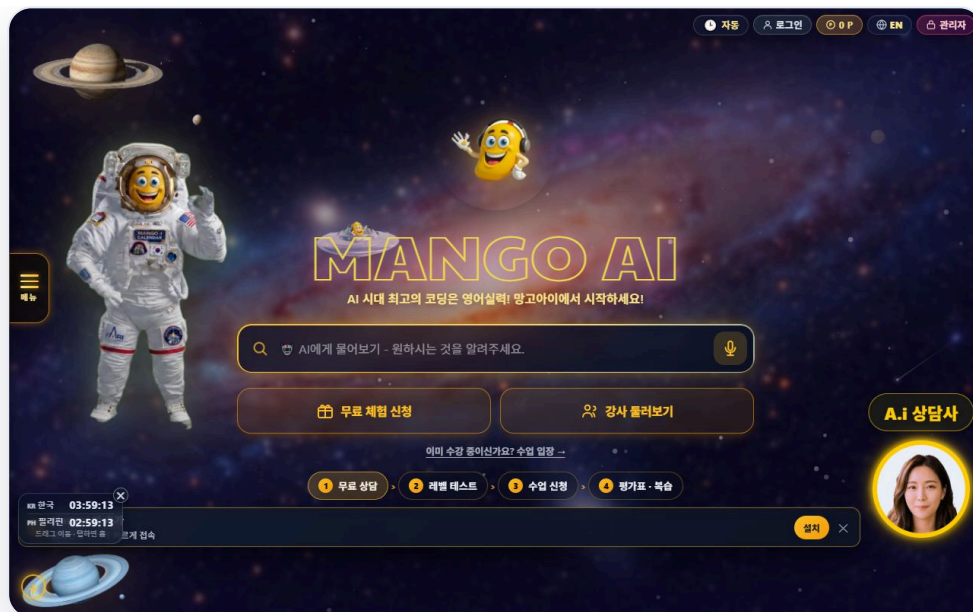

Admin

The parent screen's left menu used to list **18 items flat, with no structure**. It is now organised into **four categories** — **My Child's Learning / Classes / Learning Tools / Payment & Support** (plus Other) — with headings only, so **every item is still one click**.

How to use

- 1 left menu
- 2 category head...
- 3 When helping...

- 1 Open the **left menu** on the parent screen.
- 2 Check the four **category headings** and the items under each.
- 3 When helping a parent, refer to the group — e.g. 'look under Payment & Support'.

Key Points

- ✓ **It is not an accordion** — collapsing would add one extra click to every single item.
- ✓ **All 18 items are still there** (verified — none disappeared).
- ✓ Any item not assigned to a group is **collected automatically under 'Other'** so nothing vanishes silently.

Tip Naming the group first on a support call gets parents to the right place much faster.

48

🔑 Self-Service Password Reset (SMS verification)

Admin

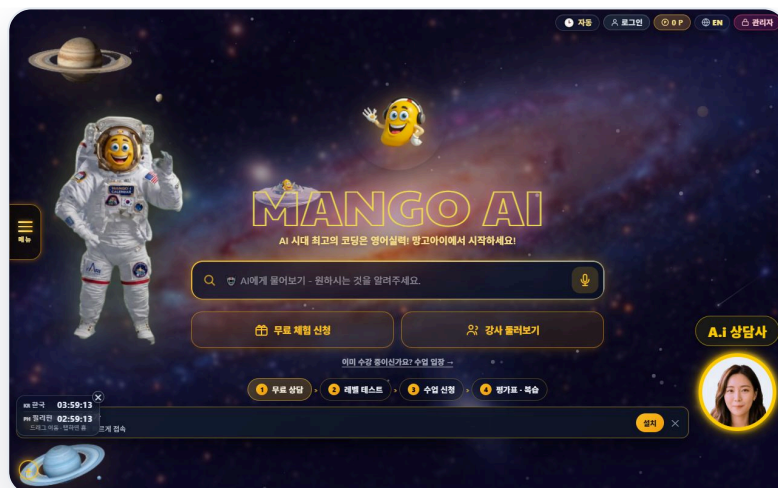

A self-help path that cuts parent enquiries

Students and parents can now **reset their own password without going through staff**, from both the login modal and the **report-card screen**. A **6-digit SMS code** is sent to the registered phone number; once verified, they set a new password immediately.

How to use

1 🔑 **Forgot your...** > 2 **6-digit code...** > 3 **new password** > 4 **KakaoTalk cha...**

- 1 Point the parent to 🔑 **Forgot your password? — Reset by SMS** on the login or report-card screen.
- 2 They enter their ID and a **6-digit code goes to the registered phone number**.
- 3 After verifying the code they set a **new password** right away.
- 4 If it says no number is registered, guide them to the **KakaoTalk channel**.

✅ Key Points

- ✓ The link now also exists on the **report-card screen**, so fewer parents get stuck there.
- ✓ The **KakaoTalk enquiry button stays** — if self-service fails, it flows naturally into a conversation.

Good to know Only accounts with a **registered phone number actually work**. Most accounts currently have no number on file, so coverage grows as numbers are filled in. The real fix is contact-data migration (Cafe24 sync), not code.

💡 Tip When a parent calls, register their number first. From then on they solve it themselves.

49

Unified Support Hours & Channel Order (KakaoTalk first)

Admin

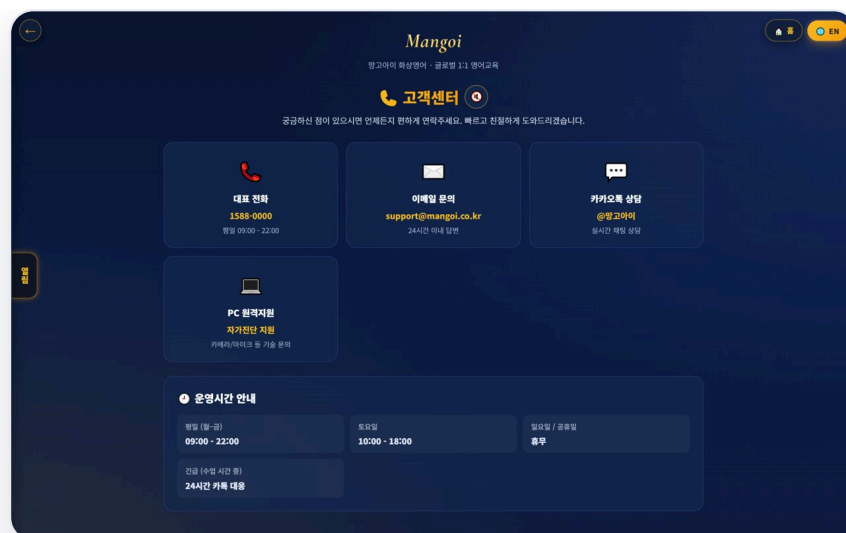

One value across every screen

Support hours previously appeared as **09-22 / 10-20 / 7 p.m.** on different screens. They are now unified to **10:00–23:00 (closed weekends and public holidays)**. The **KakaoTalk channel was also moved to first place**, and the phone card now notes that KakaoTalk is faster.

How to use

1 Contact > 2 point them to... > 3 10:00–23:00 (...)

- 1 On the **Contact** screen, confirm the card order is **KakaoTalk → phone**.
- 2 When advising parents, **point them to the KakaoTalk channel first**.
- 3 Quote support hours as **10:00–23:00 (closed weekends and holidays)**.

Key Points

- ✓ Places corrected: contact screen, home menu, FAQ (both languages), AI consultant fact block, student FAQ — **all the same value now**.
- ✓ The unused **fax number and placeholder phone numbers were deleted**.
- ✓ The AI consultant quotes the same hours and the same channel order.

Good to know If real operating hours change, **all of these must be updated together**. Changing only one brings the inconsistency straight back.

Tip If you need the Philippines call-centre numbers listed, provide the real ones — the previous placeholders were removed.

Churn-risk Distribution (example)

51 ? Frequently Asked Questions (FAQ)**Q. Where do I log in?**

A. Log in at admin.mangoi.co.kr. Phone, tablet and PC all connect right from the web.

Q. I can't see a feature.

A. Menus vary by role. Use the top feature search or ask the AI assistant by name.

Q. A student can't enter a lesson.

A. Usually a browser permission issue. Advise reconnecting in Chrome/Edge and allowing camera/mic. Inside KakaoTalk, open in an external browser.

Q. Does the AI assistant execute tasks?

A. Look-ups happen instantly; important actions are confirmed with 'Shall I?' It only does what you have permission for.

Q. Refund math is confusing.

A. It's auto-calculated by the refund table; discounted payments are recalculated at list price.

Q. I'm worried about churn.

A. Find at-risk students early with the Retention Center's churn-risk/contagion network and intervene via alert-talk/counseling.

✓ Daily Operations Checklist

☐ Did you check today's revenue, enrollment and attendance?

☐ Did you handle new counseling/inquiries?

☐ Did you check overdue and refund items?

☐ Did you check the live (LIVE) lesson status?

☐ Did you care for students whose churn risk rose?

☐ Did you reflect teacher reviews/coaching feedback?

☐ Did you add repeat questions to the FAQ?

52 · Conclusion

Conclusion · A Practical Guide to Stable Academy Operations

You've now reviewed every feature of the admin page. Finally, here's one page on how a day of operations flows and the principles to keep for stable running. Keep just this rhythm and operations get much lighter.

The Flow at a Glance

Morning (5 min)

Check today's revenue, enrollment and attendance on the dashboard; read the AI insight summary

Late morning

Handle new counseling/inquiries; check overdue/refund items and send alert-talk

Class hours

Monitor live (LIVE) lessons; for 'can't enter' tickets, guide browser/permission first

Afternoon

Care for at-risk students in the  Retention Center; reflect teacher reviews/coaching

Weekly · Monthly

Distribute org settlement/monthly reports, check points/rewards (shop/gifts), improve the FAQ

★ Key Principles

- 1 **Metrics, 5 minutes each morning** — catching revenue/attendance signals early makes response easy.
- 2 **Intervene on churn early** — the sooner you care for at-risk students, the higher retention.
- 3 **Announce policies upfront** — sharing refund/postpone policies at signup greatly cuts disputes.
- 4 **Turn repeats into FAQ** — make frequent questions into an FAQ with screenshots.
- 5 **Decide with data** — judge and improve by metrics/graphs, not gut feeling.

Remember

- Log in at **admin.mangoi.co.kr**; menus and data scope change by **role (permissions)**
- The **AI assistant** looks up instantly, confirms important actions, and only does **what you're permitted**
- Most 'can't enter class' tickets are **browser and camera/mic permission** issues
- **Praise points** → **student total** → **shop/gifts**; the policy and rewards are the admin's job

Good operations come not from fancy features but from 'small daily checks.' Watch your metrics, prevent churn early, and announce policies clearly. The AI Operations Assistant and Retention Center help you do it. Questions? Contact support anytime — cheering on your steadily growing academy! 🍊

Let's grow together with Mangoi!

Questions? Ask the on-site A.i assistant or contact customer support.
