Teacher Training Manual

Getting kids to speak — from principle to practice

 Teacher Training Manual

What is this manual for?

The Mangoi Teacher Training Manual is about **getting children to speak**. It is not a guide to the website — it is a guide to **the skills that make a lesson work**. Nothing here is theory; every item is something that repeatedly worked in real video lessons. There is one central idea — **the more a child speaks, the faster they improve**. Every technique in this manual exists to serve that one thing.

Energy

The first 60 seconds set the temperature of the whole lesson.

Talk time

Aim for 70% student, 30% teacher.

Visible progress

They keep going when they can see it.

Personalisation

Remember one thing about this child.

Rhythm

Never run one activity past 7 minutes.

Records

One line in the evaluation becomes parent trust.

01

🔥 Energy — the first 60 seconds set the whole lesson

Teacher

Your energy becomes their energy

Children read **the mood before the content**. If you are bright and quick to react in the first minute, the lesson stays alive to the end; if that first minute is quiet, you will spend the remaining 25 minutes pulling it uphill. Energy is not a personality trait — it is **a skill you switch on deliberately**.

How to do it

- 1 greet them by... > 2 20% bigger th... > 3 impossible to... > 4 React instant... > 5 Vary your pit...

- 1 The moment the camera is on, **greet them by name** — “Hi, Minjun! I missed you!”
- 2 Make your expressions **20% bigger than normal**. A screen eats about half of them.
- 3 Make the first question **impossible to fail** — “Did you eat lunch?”
- 4 **React instantly** to anything they say — “Wow, really?”
- 5 **Vary your pitch**. A flat tone is even duller through a screen.

✓ Key Points

- ✓ If the child **laughs even once** in the first 60 seconds, the lesson is already half won.
- ✓ Energy is **speed of reaction, not volume**. React fast.
- ✓ If you look tired, children often assume **it is their fault**.

⚠ **Good to know** Big reactions and forced cheerfulness are not the same thing. With teenagers, too much energy creates distance — the older the student, the more you want **calm but fast** reactions.

💡 **Pro tip** Stand up for 30 seconds before class, breathe deeply and loosen your face. Energy is something you warm up for.

02

🗣️ **Talk time — the more you talk, the less they learn**

Teacher

Aim for 70% student · 30% teacher

English grows from **how much they say, not how much they hear**. Yet in most video lessons the teacher does 70% of the talking. Deliberately **saying less and waiting** is the single most important skill in this manual.

How to do it

- 1 count to five... > 2 echo it back... > 3 Turn statemen... > 4 do not correc... >
5 "How long hav..."

- 1 After asking, **count to five in your head**. Do not break the silence first.
- 2 If they answer with one word, **echo it back as a sentence** — "Pizza? You like pizza?"
- 3 Turn statements into questions — instead of "This is a cat", ask "What is this?"
- 4 When they make a mistake, **do not correct immediately** — recast it naturally.
- 5 Ask yourself mid-lesson: **"How long have I been talking?"**

✅ **Key Points**

- ✓ **Five seconds of silence** is what produces their first sentence. Do not give up at three.
- ✓ One minute of your explanation is one minute taken from their speaking.
- ✓ For quiet students, go **closed questions (Yes/No) → open questions**, in that order.

⚠️ **Good to know** Do not push so hard that waiting feels like pressure. **Silence should read as patience, not demand.**

💡 **Pro tip** Watch one recording of your own lesson. Seeing how much you talk changes your very next class.

03

★ Make progress visible — praise they can see

Teacher

Praise that stays, not praise that vanishes

Children keep going when they can **see evidence that they are improving**. "Good job" disappears in three seconds; stars, points and badges stay on the screen. The **praise basket and points** in Mangoi exist for exactly this.

How to do it

- 1 praise basket... >
- 2 specific >
- 3 look at the p... >
- 4 one thing tha... >
- 5 becomes the p...

- 1 Drop praise into the **praise basket** (👑) the moment they do something well.
- 2 Be **specific** — not "Good", but "Your 'th' sound was perfect!"
- 3 At the end of the lesson, **look at the points they earned** together.
- 4 Always name **one thing that improved** since last lesson.
- 5 Remember: what you write in the evaluation **becomes the parent's report**.

✓ Key Points

- ✓ Praise **the attempt, not just the result** — praising "you said it even though it was wrong" is what makes them try again.
- ✓ Points and badges are what keep them going **between lessons**.
- ✓ Aim for **at least three specific compliments** per lesson.

⚠ **Good to know** Praise loses value if you scatter it. Children notice a **reflexive "Good job"** every time.

💡 **Pro tip** Prepare five specific praise sentences in advance. They save you when nothing specific comes to mind in the moment.

04

Personalisation — remember one thing about this child

Teacher

Name, interest, last lesson

The moment a child feels “**this teacher knows me**”, their attitude changes. It does not take much — **remembering one thing they said last week** is enough.

How to do it

- 1 last evaluati...
- 2 one interest
- 3 Bring it up i...
- 4 around that i...
- 5 evaluation no...

- 1 Skim the **last evaluation** for 30 seconds before class.
- 2 Note **one interest** (football, K-pop, games).
- 3 Bring it up in your greeting — “Did your team win last week?”
- 4 Rebuild your examples and games **around that interest**.
- 5 Write down what to ask next time in the **evaluation notes**.

Key Points

- ✓ Personalisation is **record-keeping, not memory**. Write it down.
- ✓ Putting their interests into example sentences makes the **same grammar far stickier**.
- ✓ Simply using their name often raises attention.

Pro tip Ask “What do you love?” in the first week. That one answer becomes six months of lesson material.

05

🎵 Rhythm — cut 25 minutes into four pieces

Teacher

Never run one activity past 7 minutes

A child's attention on a single activity lasts **5–7 minutes**. Run 25 minutes as one continuous block and the last 10 are effectively wasted. **Simply switching activity** brings attention back.

How to do it

- 1 Warm-up, 3 mi... > 2 Core, 7 min > 3 Speaking, 7 m... > 4 Game & reward... > 5 Close, 3 min

- 1 **Warm-up, 3 min** — AI warm-up or light questions to get their mouth moving.
- 2 **Core, 7 min** — today's target expression or textbook.
- 3 **Speaking, 7 min** — real conversation using what they just learned.
- 4 **Game & reward, 5 min** — review through a learning game, earn points.
- 5 **Close, 3 min** — praise plus a preview of next time.

✓ Key Points

- ✓ Attention **resets every time the activity changes**.

- ✓ If they look bored, **change the activity** — **do not add explanation**.

- ✓ That final 3-minute preview measurably improves **next-lesson attendance**.

⚠ **Good to know** Rhythm is a tool, not a rule. If a child is deeply engaged, **do not interrupt it**.

💡 **Pro tip** Keep the on-screen timer running. The child starts to anticipate "game time is coming", which itself helps.

06

Warm-up — loosen the mouth before you expect words

Teacher

3 minutes that change 25

Go straight into the material from cold and the child will spend **the first 10 minutes in silence**. The **AI warm-up** is the stretching that gets sound out of them with no pressure.

How to do it

- 1 AI Warm-up ta... >
- 2 speed and lev... >
- 3 Model it your... >
- 4 praise even a... >
- 5 straight into...

- 1 Open the **AI Warm-up tab** in the classroom.
- 2 Choose the **speed and level** that fits the child.
- 3 **Model it yourself first**.
- 4 Have them say it aloud, and **praise even a quiet attempt**.
- 5 Carry the warm-up phrases **straight into the main lesson**.

Key Points

- ✓ The goal of a warm-up is **making sound, not being accurate**.
- ✓ Going first yourself removes most of their hesitation.
- ✓ Reusing warm-up phrases later **doubles the sense of achievement**.

💡 **Pro tip** For very quiet students, stretch the warm-up to five minutes. Once the mouth is moving everything else gets easier.

07

Games — turning review into play

Not a reward — the review itself

Teacher

A game is not a **prize after the lesson**; it is **the review**. Inside a game a child will meet the same word five times without getting bored. Used with a stated purpose, it is the strongest learning tool you have.

How to do it

- 1 game that con... >
- 2 State the goa... >
- 3 note the word... >
- 4 revisit only... >
- 5 praise basket...

- 1 Pick a **game that contains today's expressions**.
- 2 State the goal first — "Let's get 10 points with today's words!"
- 3 While they play, **note the words they get wrong**.
- 4 After the game, **revisit only the wrong ones**.
- 5 Tie the result back to the **praise basket and points**.

**Key Points**

- ✓ A game with **no stated purpose** is just playtime. Say the goal first.
- ✓ The wrong answers are the real harvest — they are next lesson's material.
- ✓ Rotating game types keeps the novelty alive.

⚠ Good to know On slower devices or weak connections games can stutter. Switch to a lighter quiz-style activity when that happens.

💡 Pro tip Cheer out loud while they play. A game played alone and a game played together are completely different experiences.

08

The room that only opens when they speak

Teacher

A game where clicking does nothing

Escape by Voice is a game that only advances when the child **says something in English out loud**. There are no buttons, so “I don't want to speak” simply does not work. Treat it as a **specialist tool** for reluctant speakers.

How to do it

- 1 **Escape** >
- 2 **Demonstrate o...** >
- 3 **accept a quie...** >
- 4 **Hint button** >
- 5 **how many time...**

- 1 Open **Escape** for a student who rarely speaks.
- 2 **Demonstrate one room yourself** first.
- 3 Have them press the mic and speak — **accept a quiet attempt**.
- 4 If they are stuck, let them use the **Hint button** — there is no penalty.
- 5 At the end, look at **how many times they spoke** and praise it.

Key Points

- ✓ The experience of “**speaking really does open the door**” changes their attitude.
- ✓ Even a failed escape shows **how far they got**, so there is little discouragement.

- ✓ The spoken-attempt count is **good evidence for the evaluation**.

⚠ Good to know Microphone permission is required. If nothing registers, check the browser's mic permission first.

💡 Pro tip Do just one room in the first session. A single success changes how much they speak in every lesson after.

09

Vocabulary — don't make them memorise, make them meet it again

Teacher

Automatic review · Preview tab

Words are not memorised — they are **met repeatedly**. The Mangoi word list brings a word back **just as the child is about to forget it**. Your job is simply to **get today's words into it**.

How to do it

- 1 three words f... >
- 2 AI fills in t... >
- 3 Preview tab >
- 4 "You saved th..." >
- 5 Let it flow i...

- 1 In the last minute of class, have them save **three words from today**.
- 2 They can leave the meaning blank — **AI fills in the meaning and an example**.
- 3 Ask them to check the **Preview tab** before the next lesson.
- 4 When that word appears in class, point it out — **"You saved this yesterday!"**
- 5 Let it flow into the review game — points for every correct answer.

Key Points

- ✓ **Three is enough.** Ask for ten and you will get none.
- ✓ **A student who previewed follows the lesson far better** that day.
- ✓ As the collection fills, their baby mango grows — that is what keeps them coming back.

💡 **Pro tip** Make "three words today" a fixed end-of-class ritual. That is 60 words a month — enough for the child to feel it.

10

Evaluations — 3 minutes that build parent trust

Teacher

One line from you becomes the report

The evaluation is not paperwork. What you write here fills **the five axes of the monthly report** and **the weekly report** parents receive. In other words, **if you do not write it, the parent receives no evidence at all.**

How to do it

- 1 immediately >
- 2 one thing don... >
- 3 honestly >
- 4 what to ask n... >
- 5 AI draft comm...

- 1 Write it **immediately** after the lesson, while it is fresh.
- 2 Always include **one thing done well and one next goal**.
- 3 Score pronunciation, vocabulary, sentences, attitude and participation **honestly**.
- 4 Note in the memo field **what to ask next lesson**.
- 5 Read and refine the **AI draft comment** before it goes out.

Key Points

- ✓ A **consistent one-liner** beats an occasional essay for report quality.
- ✓ Axes with no evaluation **appear empty** on the parent's report.
- ✓ Writing the next goal also finishes your prep for the next lesson.

⚠ **Good to know** Scoring more generously than reality feels kind, but parents eventually notice the gap and trust collapses. Be **accurate, and warm about it.**

💡 **Pro tip** Build a two-sentence template ("did well: ... / next goal: ...") and evaluations take one minute.

11

Parents — send proof of growth every week

Weekly report · monthly report card

Teacher

Parents re-enrol based on a **feeling of progress, not a score**. Mangoi sends a weekly report covering **attendance, AI chats, judgment training, words conquered and pronunciation**, and a **pentagon report card** every two months. You are the person who fills them.

How to do it

1 AI Friend cha... > 2 make the repo... > 3 the five axes > 4 one specific...

- 1 Encourage the student to use **AI Friend chat, judgment training and the word list**.
- 2 Attendance and activity are what **make the report fill up**.
- 3 Keep writing evaluations to fill **the five axes** of the report card.
- 4 On an especially good day, leave **one specific line**.

학부모 주간 리포트
아이의 한 주 활동(출석AI 친구 대화-판단력-정복한 단어-발음)을 담아 학부모에게 보내는 리포트입니다. 경쟁사가 못 보여주는 성장의 증거를 매주 전달해 재등록으로 잇는 것이 목적입니다.

최근 발송 로그
로그 불러오기

Key Points

- ✓ The report contains **no invented numbers** — only what actually happened.
- ✓ Students who play games and use the word list get **much richer reports**.
- ✓ Parents read **your one line** before they read any number.

Pro tip When a consultation is booked, ask for the report link to be sent beforehand. A prepared parent makes a completely different conversation.

12

Age tactics — one approach does not fit all

Preschool · primary · teens

Teacher

Teach a 7-year-old and a 15-year-old the same way and you will fail both. Attention span, motivation and how they respond differ completely by age.

How to do it

- 1 Preschool (5-...) 2 Lower primary...) 3 Upper primary...) 4 Teens (14+) >
- 5 give the chan...

- 1 **Preschool (5–7)**: change activity every 3–4 min; songs, movement, colours; praise participation over correctness.
- 2 **Lower primary (8–10)**: games and points are strongest; favour collecting over competing.
- 3 **Upper primary (11–13)**: they follow you if you explain why; use peer topics (games, idols).
- 4 **Teens (14+)**: no forced cheerfulness; connect to usefulness, exams, future; correct privately.
- 5 All ages — **give the chance to speak first**.

Key Points

- ✓ Younger means **shorter activity cycles**; older means **explain the reason**.
- ✓ For teens, **embarrassment** is the biggest barrier. Make it feel safe.
- ✓ Temperament often matters more than age.

Pro tip Watch what they respond to over the first three lessons and write it in the evaluation. That becomes their personal manual.

13

The student who won't speak — the order that unlocks it

Teacher

Start with closed questions

A silent student is **not unwilling** — **they are afraid**. Afraid of being wrong, of sounding strange. Follow the order and most of them open up.

How to do it

- 1 questions the... > 2 choosing betw... > 3 one-word ans... > 4 repeat-after-... > 5 open question

- 1 Start with **questions they can answer with a nod** — “Do you like pizza?”
- 2 Move up to **choosing between two** — “Pizza or chicken?”
- 3 Accept a **one-word answer** and echo it back as a sentence.
- 4 Build success with **repeat-after-me**.
- 5 Only then ask an **open question** — “What did you do?”

Key Points

- ✓ Skip a step and they close again. Go **one step at a time**.
- ✓ Do not correct pronunciation on the spot — recasting it is enough.
- ✓ The **Escape game and voice coach** work especially well with these students.

⚠ **Good to know** This can take weeks. Do not write “this child is just like that” in the evaluation after one or two attempts.

💡 **Pro tip** Record the day they first spoke freely. For a parent, that story is the most moving thing you can give them.

14

⚡ **Distraction & mixed levels — handling it live**

Teacher

Redirect, don't suppress

Distraction is **surplus energy**; a level gap is a **difference in pace**. Suppress either and it grows; redirect it and it becomes a resource.

How to do it

- 1 change the ac... >
- 2 Get them movi... >
- 3 Give them a r... >
- 4 one harder ta... >
- 5 reduce the am...

- 1 When they lose focus, **change the activity instead of scolding** — game or whiteboard, immediately.
- 2 Get them moving — gestures, hands up, drawing on screen.
- 3 **Give them a role** — “You be the teacher. Ask me!”
- 4 Give the advanced student **one harder task** on the side.
- 5 For a slower student, **reduce the amount and increase the wins**.

✓ **Key Points**

- ✓ Forcing a **static activity** on a restless child collapses the whole lesson.
- ✓ A bored advanced student **turns into a behaviour problem** — prepare an extra task.
- ✓ A slower student needs **small successes**, not more time.

⚠ **Good to know** In group lessons, managing the level gap matters even more. Do not spend too long on one child.

💡 **Pro tip** Restless children love the whiteboard. Let them draw and engagement jumps.

15

When the connection wobbles — protect the lesson

Teacher

Never dropping is the first priority

Mangoi's **first principle is that a lesson must not drop**. Even if quality falls or the picture freezes, **the lesson continues**. Staying calm is itself a skill.

How to do it

- 1 lowers the vi... >
- 2 audio-only mo... >
- 3 wait a moment >
- 4 refresh once >
- 5 tell an admin...

- 1 If quality drops, the system **lowers the video quality automatically** — carry on.
- 2 If it gets much worse, it switches to **audio-only mode**. The voice survives.
- 3 If the other side freezes, **wait a moment** — automatic recovery runs.
- 4 If it still fails, **refresh once** and re-enter.
- 5 If the lesson genuinely stops, **tell an admin straight away**.

Key Points

- ✓ Even with no picture, **a speaking lesson can continue**.
- ✓ Say **what is happening** so the child does not get anxious.
- ✓ Lost time is **made up as a replacement lesson** once reported.

⚠ **Good to know** Never end a lesson yourself because of a connection problem. The system distinguishes a brief drop from someone leaving.

💡 **Pro tip** Make a pre-class camera and mic check a habit and half of these incidents disappear.

16

**Your own growth — turning feedback into an asset**

AI coaching · star ratings

Teacher

After each lesson **AI drafts a coaching note**, and **star ratings and one-line feedback** from students and parents accumulate. This is not an assessment — it is **material for your next lesson**.

How to do it

1 AI coaching c... > 2 repeats > 3 exactly one t... > 4 Record the re... > 5 Share

- 1 Read the **AI coaching comment** after class.
- 2 Look for what **repeats** in the ratings and feedback tags.
- 3 Change **exactly one thing** in the next lesson.
- 4 Record the result in the evaluation.
- 5 **Share** what worked with other teachers.

**Key Points**

- ✓ Do not try to fix everything — **one change per lesson** is enough.
- ✓ **Repeated** feedback is the real signal; one-offs can be let go.
- ✓ Your growth record also supports pay reviews and renewals.

⚠ **Good to know** The AI coaching draft is a reference. Read it and adjust it yourself before acting on it.

💡 **Pro tip** Set one goal a month. “This month: wait five seconds” is a complete goal.

17

Teaching Skills Summary

Skill	What it does	When to use it	Expected effect
Building energy	Greeting, expression, reaction in the first 60s	Every lesson start	Sets the mood for the whole lesson
Waiting 5 seconds	Holding the silence after a question	Every question	More student talk time
Praise basket	Making good moments visible	3+ times per lesson	Sustained motivation
AI warm-up	Loosening the mouth first	First 3 minutes	Removes early silence
Learning games	Review through play	Last 5 minutes	Repetition plus points
Escape game	A room that needs speech	Reluctant speakers	Forced output, success experience
Three words	Saving today's words	Last minute of class	Feeds automatic review
Two-line evaluation	One win, one next goal	Right after class	Evidence for reports
Age tactics	Matching delivery to age	At assignment	Prevents drop-off
Reviewing AI coaching	One change from feedback	Weekly	Teacher growth

Attention per activity by age (minutes)

Structure of a 25-minute lesson (minutes)

- Warm-up
- Core

18 ? Frequently Asked Questions**Q. My student keeps speaking Korean.**

A. Do not scold — **lower the question until they can answer in English.** Start with a two-way choice (“Pizza or chicken?”), then one word, then a sentence. Making English easy works far faster than banning Korean.

Q. They keep mispronouncing. Should I correct every time?

A. Correct **one thing per lesson.** For the rest, recasting the sentence correctly is enough. Constant correction makes them stop speaking.

Q. How much game time is appropriate?

A. About **5 minutes** in a 25-minute lesson. But a game with no stated purpose is just playtime — always tie it to today's expressions and say the goal first.

Q. Do I really have to write an evaluation every time?

A. Yes. Without it, **the axes of the parent's report card look empty.** It does not need to be long — “one win + one next goal” is enough.

Q. The student is too distracted to continue.

A. Instead of scolding, **change the activity immediately.** Drawing on the whiteboard or giving them a role usually brings them back. Distraction is surplus energy; it only needs redirecting.

Q. The connection dropped and we lost the lesson.

A. Do not end it yourself — **tell an admin right away.** Lost time is verified and made up as a replacement lesson. The system distinguishes a brief drop from leaving.

Q. Where do I register work hours, breaks and leave?

A. Use the **shortcut on the Teachers screen.** The earlier you register leave, the more reliably it is reflected in assignments.

Q. I have no lesson today, so I cannot see the screens.

A. Ask an admin to **create a sample lesson.** It is created on the demo student account, so no real student data is affected.

Every-Lesson Checklist

- ☐ Did you skim the last evaluation for 30 seconds?

- ☐ Did you check your camera and microphone beforehand?

- ☐ Did you greet them by name in the first 60 seconds?

- ☐ Did you wait five seconds after asking a question?

- ☐ Did you give at least three specific compliments?

- ☐ Did you avoid running one activity past 7 minutes?

- ☐ Did they save three of today's words to their list?

- ☐ Did you close with a preview of next time?

- ☐ Did you write the evaluation right after class?

- ☐ Have you read this week's AI coaching feedback?

19 · Conclusion

You are the curriculum

Good materials and a good system still do not make a child speak — you do. Do not try to apply every technique in this manual at once. **One thing per lesson is enough.**

One Lesson, End to End

Before class

Check the last evaluation · test camera & mic · prepare one personal topic

First 3 minutes

Greet by name · AI warm-up to get the mouth moving

Main lesson

Wait five seconds after questions · change activity every 7 minutes

Last 5 minutes

Review game · praise basket · save three words

Right after

Two-line evaluation · note what to ask next time

Core Principles

- 1 **Let them speak more** — the less you talk, the faster they improve.
- 2 **Make praise visible** — spoken praise vanishes; praise that stacks up stays.
- 3 **Remember one thing** — “this teacher knows me” changes their attitude.
- 4 **Keep the rhythm** — if they look bored, change the activity, not the explanation.
- 5 **Leave a record** — one line in the evaluation becomes parent trust.

Remember

- Wait **five seconds** after a question. That is where their first sentence comes from.
- Three **specific** compliments beat thirty “Good job”s.
- For silent students, start with the **Escape game** and **closed questions**.
- Never end a lesson yourself over a connection problem — **tell an admin**.
- Choose **one thing to change** each month.

If one child said their first full sentence today, that lesson was a success. Those sentences add up to fluency, and those records add up to parent trust. One lesson of yours changes one child's English. Thank you for today! 🍊
