Admin User Guide

For HQ / office staff · Admin page mangoi.ai/admin

2026-10-28 edition · screens: ch. 1–9 2026-10-09 · ch. 10 2026-10-28

Before you start

- The address is **https://mangoi.ai/admin**. (The old mangoi.co.kr site is a different server and does not have these features.)
- All class times are **Korea time (KST)**. The Philippines is 1 hour earlier — KST 19:30 = PH 18:30.
- What you can do depends on your account. **Cancelling classes, splitting weekly classes, registering students and payroll** need an HQ account. Teacher, branch and agency accounts are refused by the server.
- The students, teachers and academies (Emma Kim, Teacher Anna, Sample English Academy, demo001 …) and numbers in the screenshots are **sample data**. Your screen shows real ones.
- Red box = the place to press. In chapter 10 the numbers on the pictures (④⑤ …) match the numbers in the text.

Contents

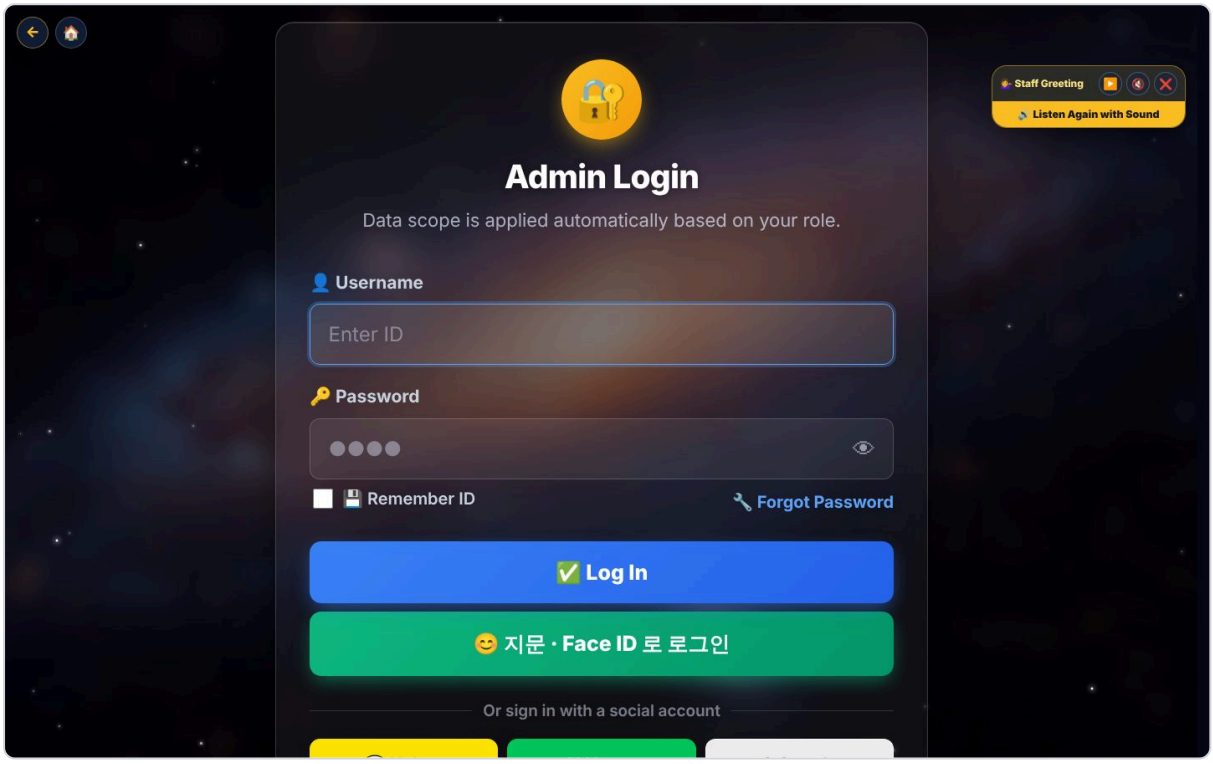

1. Getting in · Finding your way
2. Student list · Adding a student
3. Today’s classes
4. Adding classes (booking · enrollment)
5. Postponing · Changing classes
6. Cancelling classes
7. Timetable (weekly · daily)
8. Payroll
9. Approvals · Daily handover
10. A.i content payment (agencies)

1 Getting in · Finding your way

Log in, and find any screen with the left menu or search.

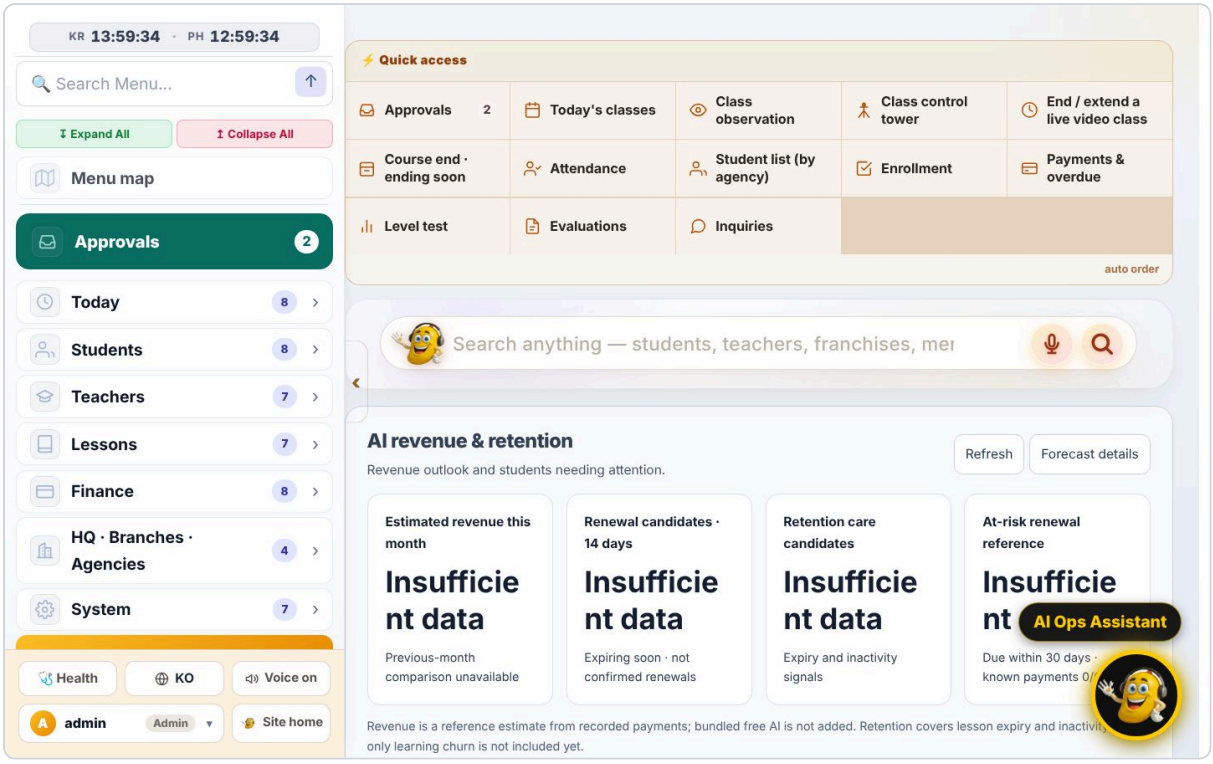

1-1 Log in

- Open **mangoi.ai/admin**.
- Enter your ID and password and press **Log in**. If you registered a fingerprint / Face ID, use the green button.
- Links opened inside KakaoTalk may lose the login — open them in Chrome.

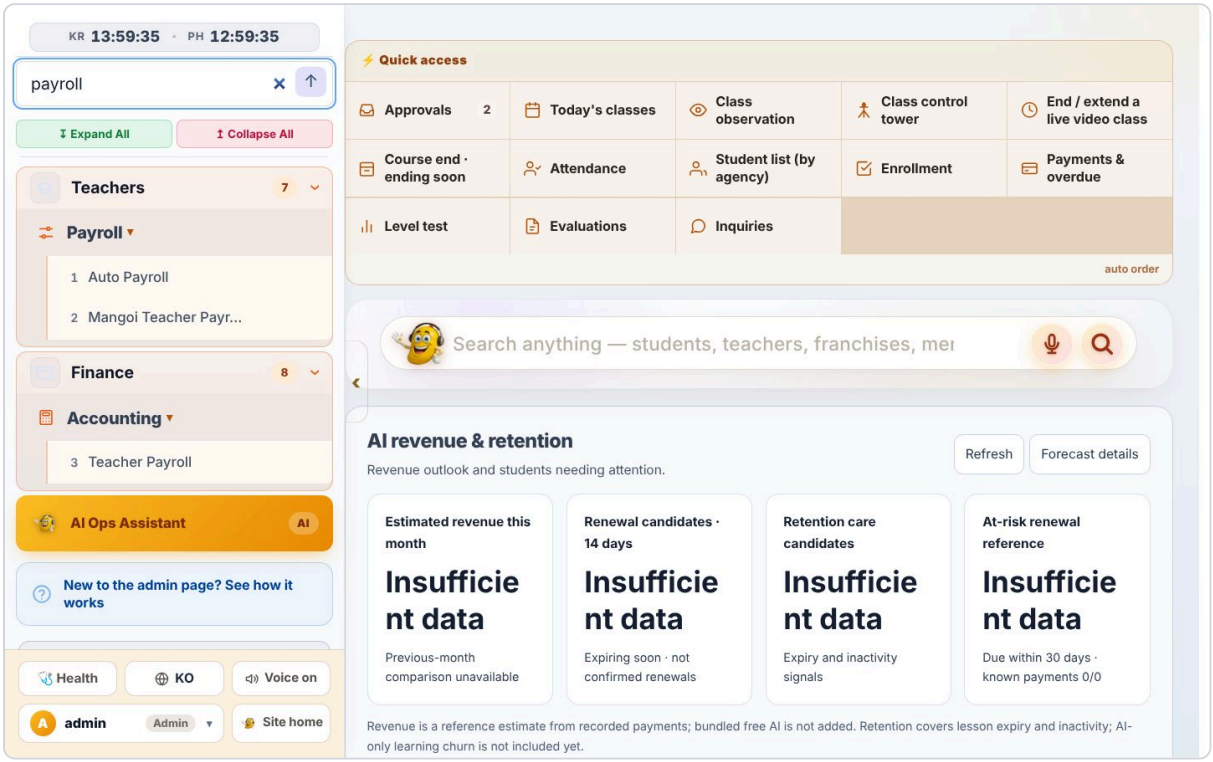

1-2 Home screen

- The **Frequently used** tiles at the top jump to Today’s classes, Approvals, Enrollment and more.
- The **search box** in the middle finds students, teachers, academies and menus.
- You can also ask the **AI assistant** (bottom right) in words, e.g. “show today’s classes”.

1-3 Left menu (7 groups) and menu search

- Groups: **Today · Students · Teachers · Lessons · Finance · HQ/Branches/Agencies · System**. **Approvals** is pinned on top.
- Type in 🔍 **Menu search** (top left), e.g. “payroll”, to filter the menu.
- Items with ▸ open sub-items.
- At the bottom: **EN/KO** language, and **admin ▾** for password change and logout.

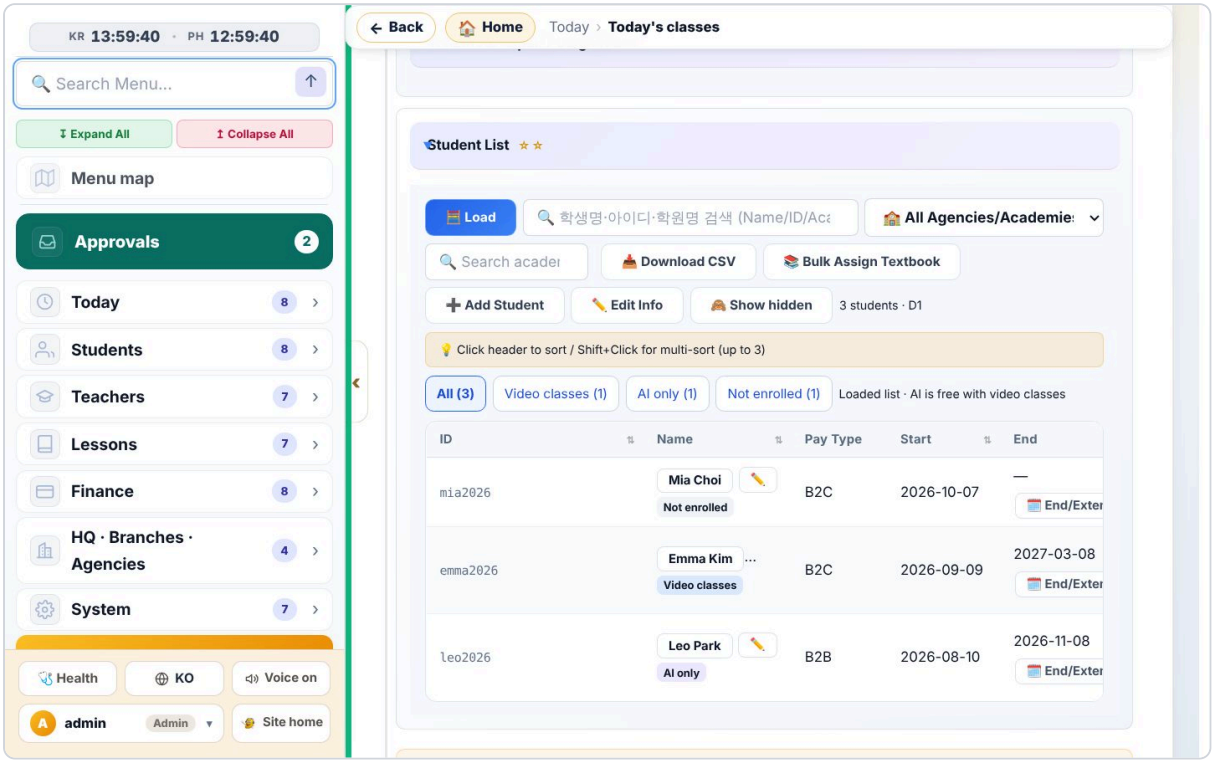

2 Student list · Adding a student

Find students, create a new student account, and open the student detail page.

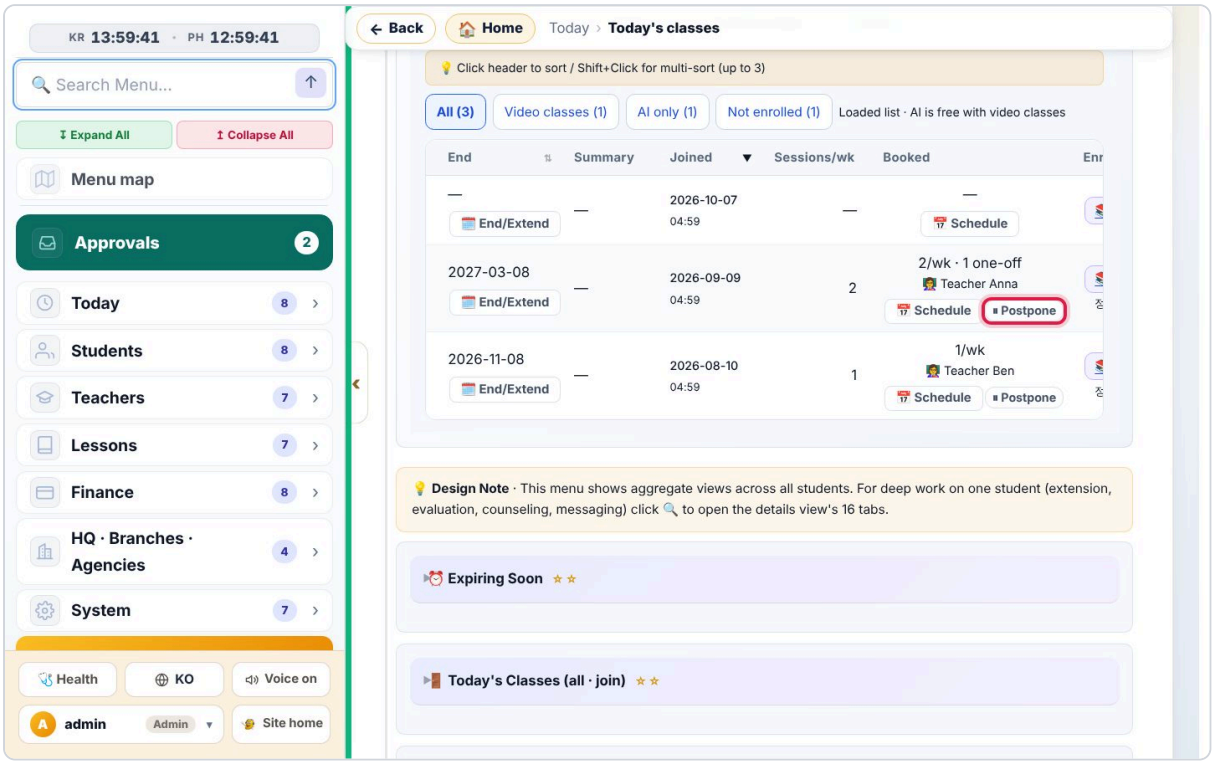

2-1 Open the student list

- Menu **Students › Students → Load**.
- Search by name, ID or academy, or pick one academy from the list.
- The chips (All · Video class · AI only · Not enrolled · Check needed) filter the kind of student.
- Click a column header to sort; Shift+click to sort by several columns.

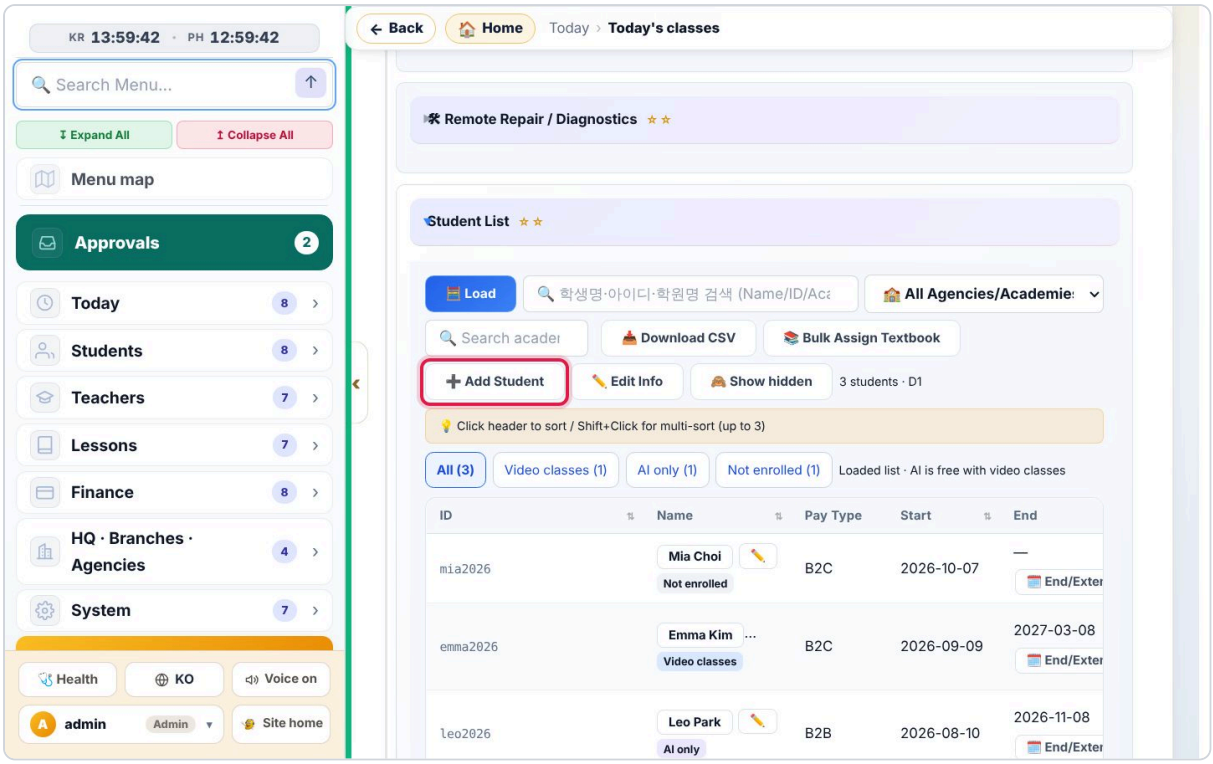

2-2 Row buttons sit in the related columns

- Click the **student name** to open the detail page; ✏️ next to it edits contacts.
- Under **End date**: 🗓️ **End/Extend**.
- The **Bookings** column shows “2/wk · 1 one-off” and the teacher, with 📅 **Schedule** and ⏸️ **Postpone** (only when there are bookings).
- 📚 **Enrollment** pre-fills an enrollment form for that student.
- (The old “Details” column was removed on 2026-10-09.)

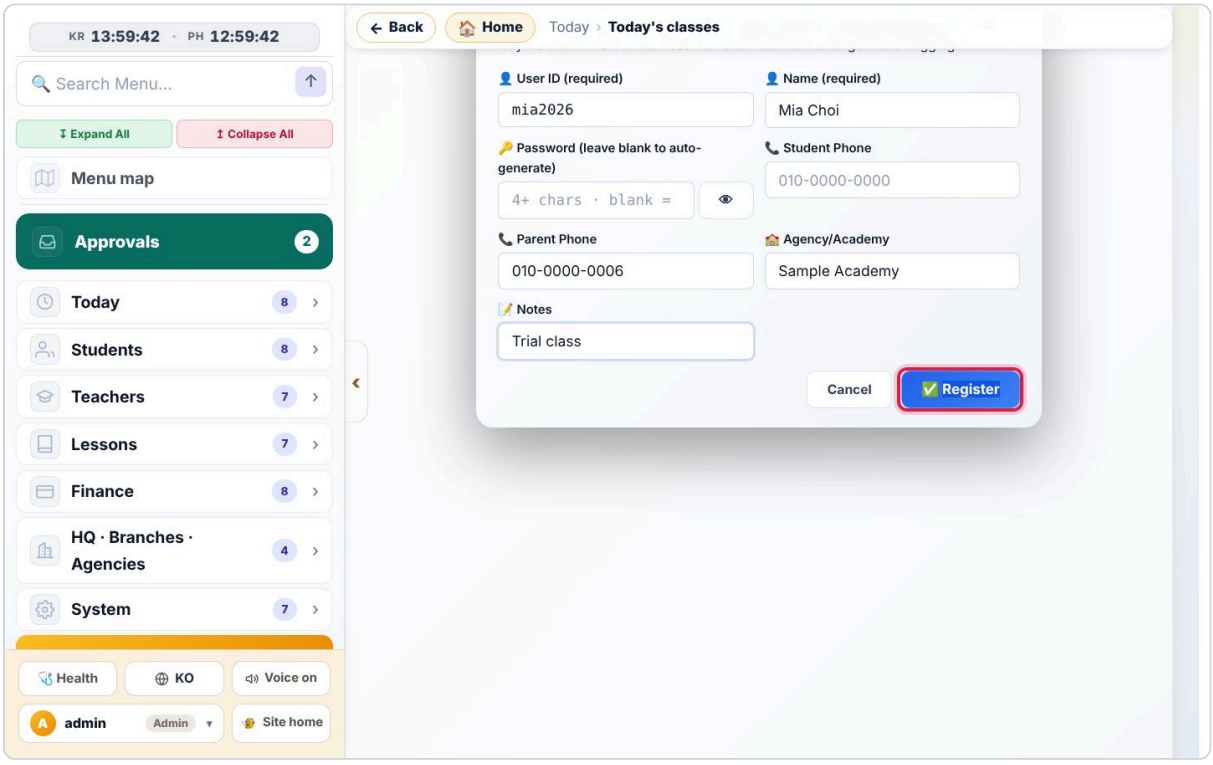

2-3 Press «➕ Add Student»

- Press ➕ **Add Student** above the list.
- Search the name first. If the student already exists, do not create a second account.

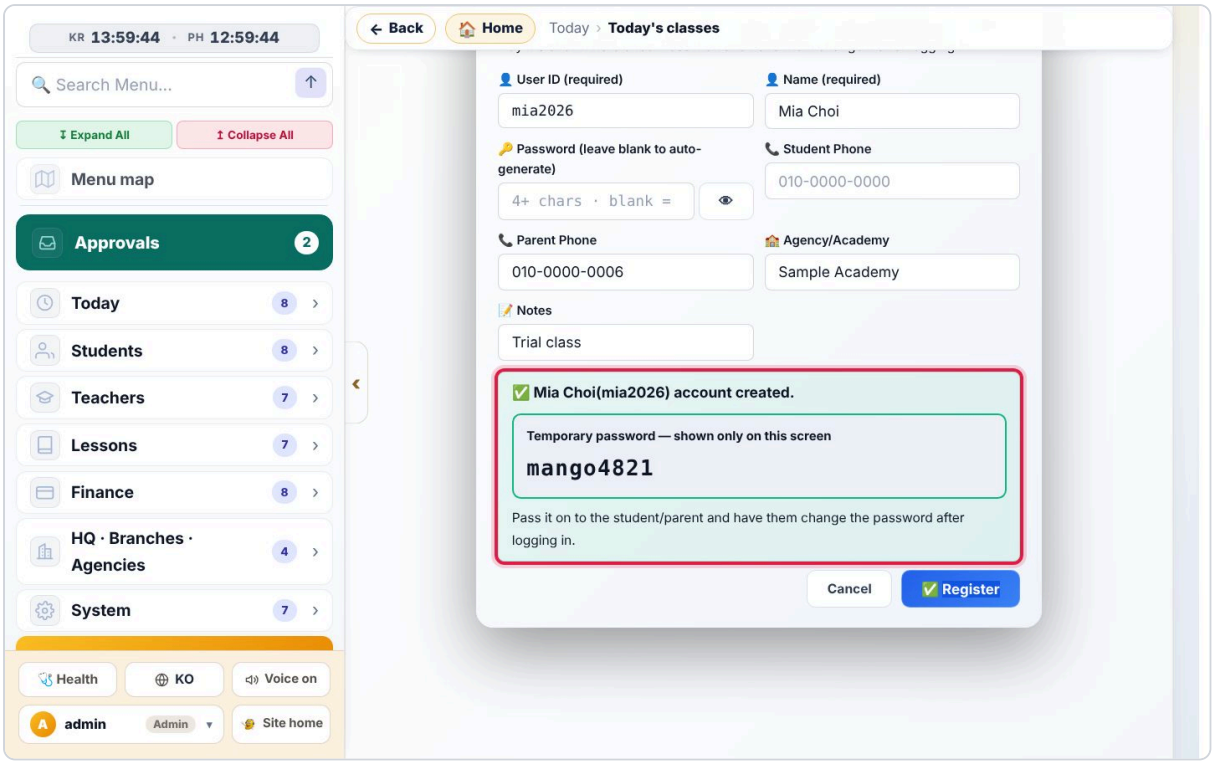

2-4 Fill in the student's information

- **User ID** (required): 4–20 letters/numbers/underscore, small letters.
- **Name** (required). Leave **Password** blank to get a temporary one.
- Please enter the **Parent phone** — class reminder texts go there.
- Pick the **Agency/Academy** from the list. Press **Register**.

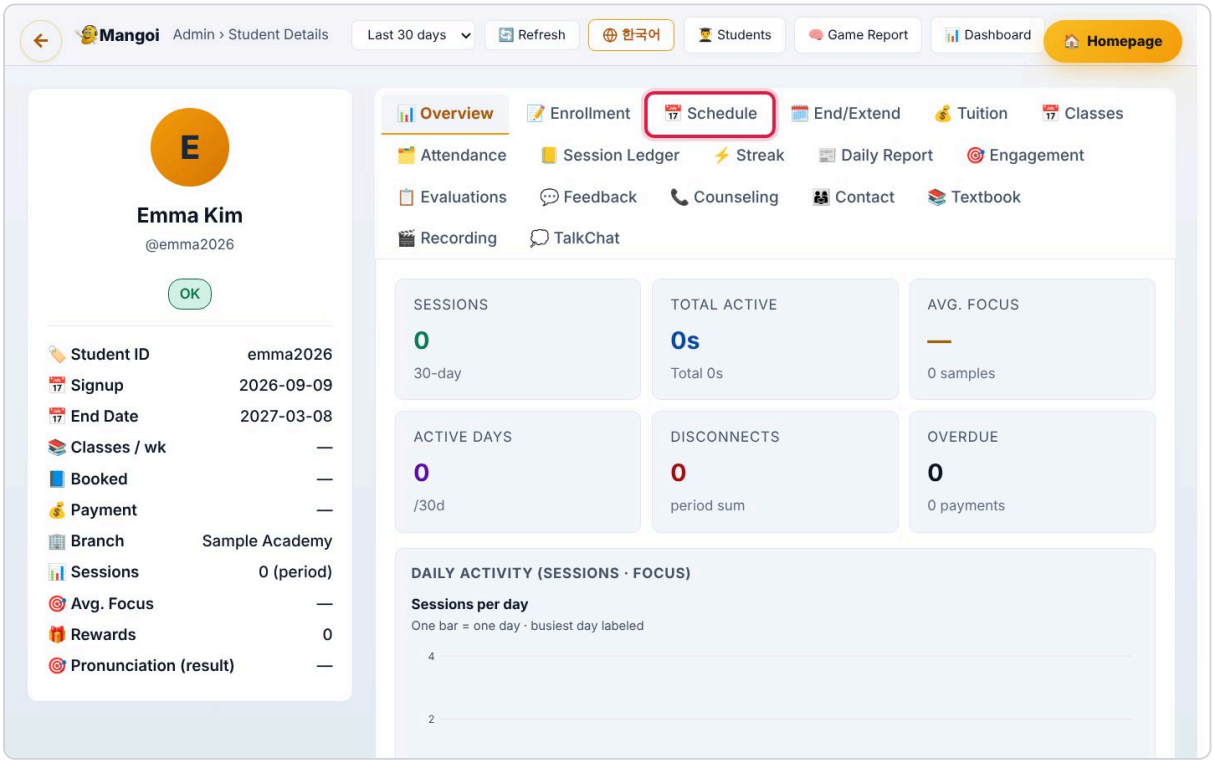

2-5 The temporary password is shown once

- Copy the **temporary password** now and send it to the parent.
- It is not shown again after you close the window.

2-6 Student detail page

- Summary on the left, tabs on top.
- Tabs: Overview · Enrollment · 📅 **Schedule** · End/Extend · Payment · Attendance · Evaluations · Contacts · Textbook · Recordings …
- Adding, postponing and changing classes is all done in the 📅 **Schedule** tab (next chapters).

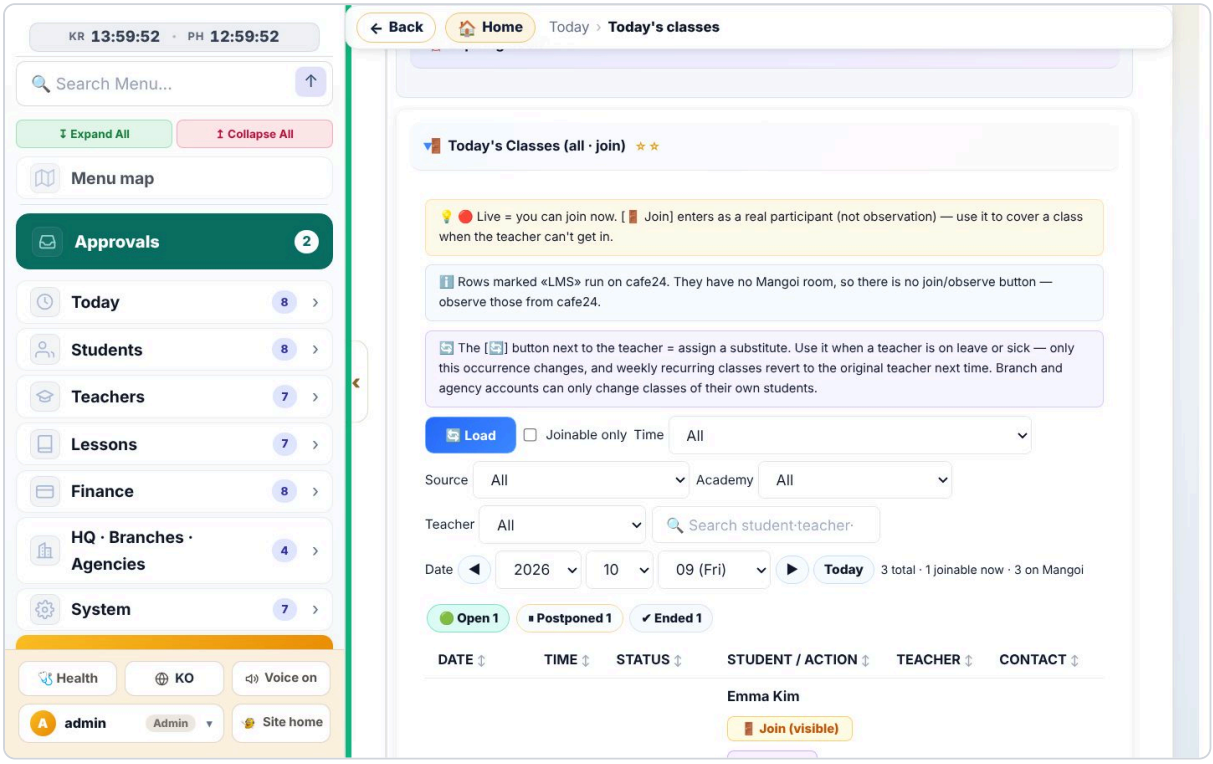

3 Today’s classes

All of today’s classes in one table — join, observe, postpone or change right there.

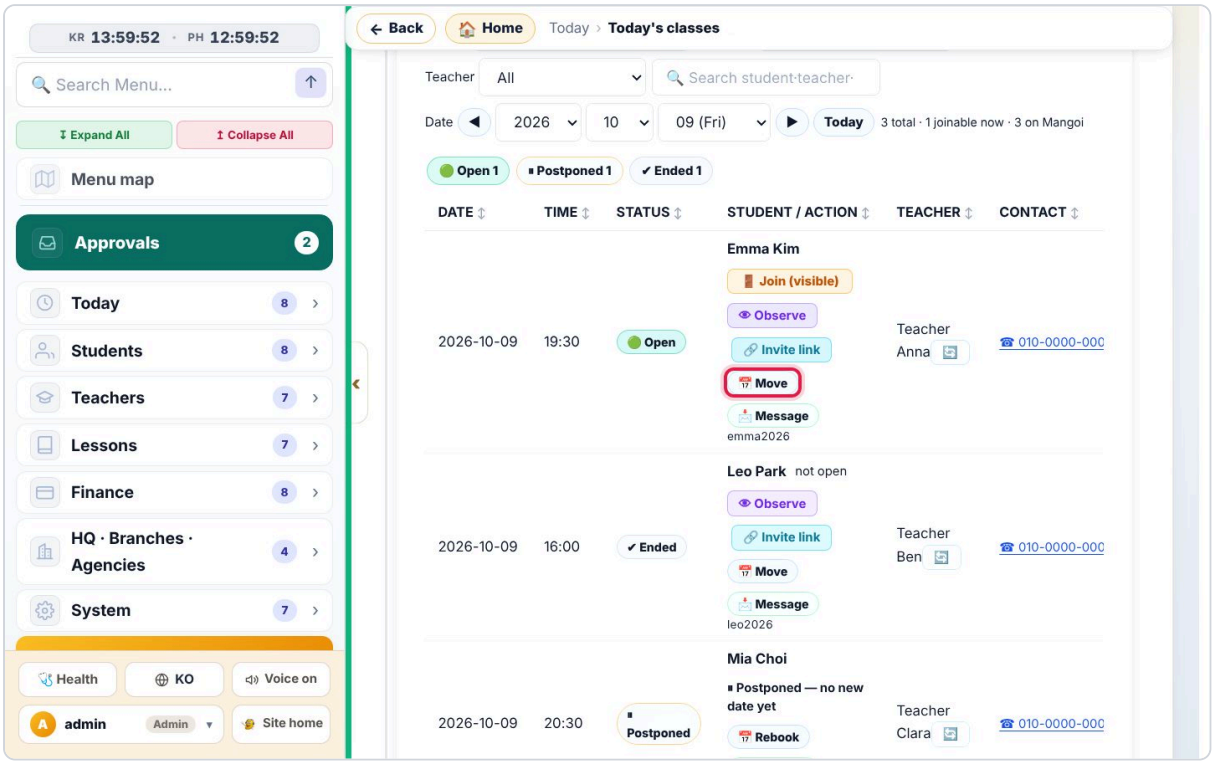

3-1 Today’s class table

- Menu **Today › Today’s classes → Load**.
- The chips count classes by status: Joinable · ⏸ Postponed · Ended.
- Change the date to see another day. Filter by source (Mangoi/Cafe24), academy or teacher.
- Cafe24 classes have no Mangoi room, so you cannot join or observe them.

3-2 Actions on one row

- 🚪 **Join (visible)** enters the class (students see you).
- 👁️ **Observe** watches invisibly. 🔗 **Invite link** copies the room link.
- 📅 **Postpone/Change** (red box) postpones, changes or cancels this one class — the same window as chapter 5.
- 💬 **Message** texts the student.
- Postponed classes show "⏸️ Postponed — no new date" and a 📅 **New date** button.

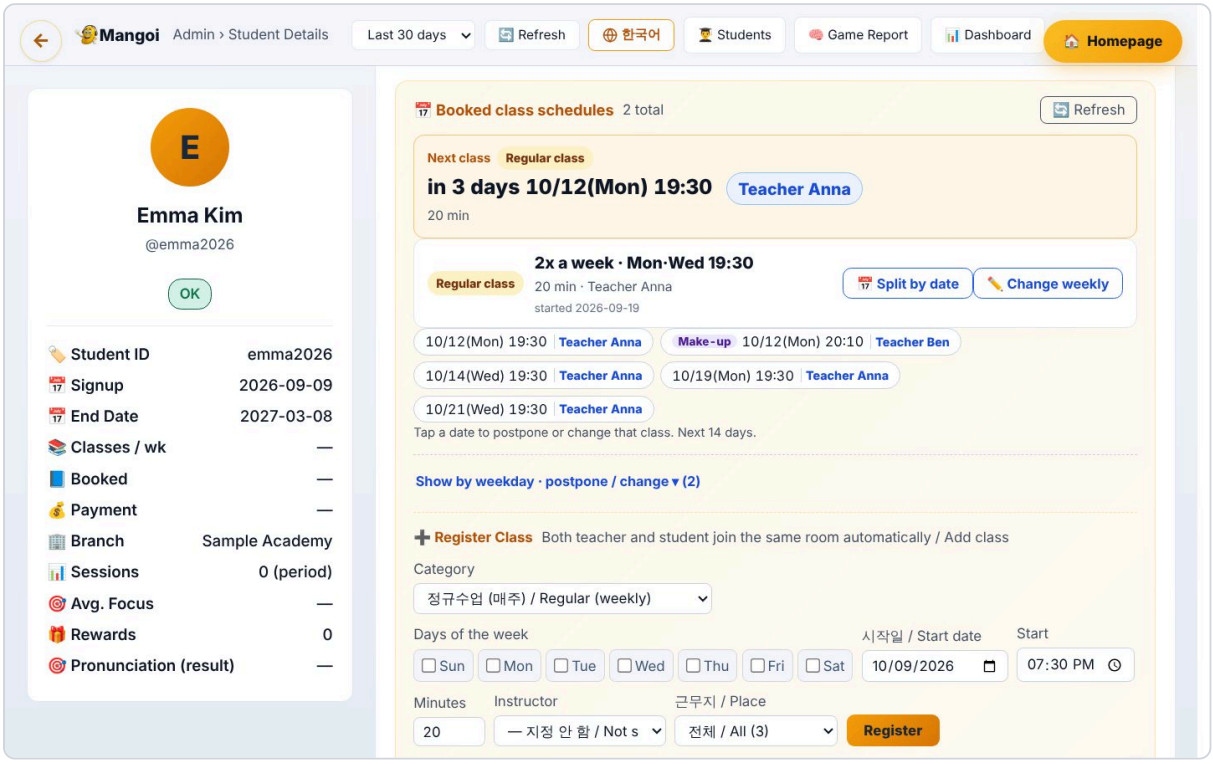

4 Adding classes (booking · enrollment)

Two ways: ① from the student detail page ② with an enrollment form (many students).

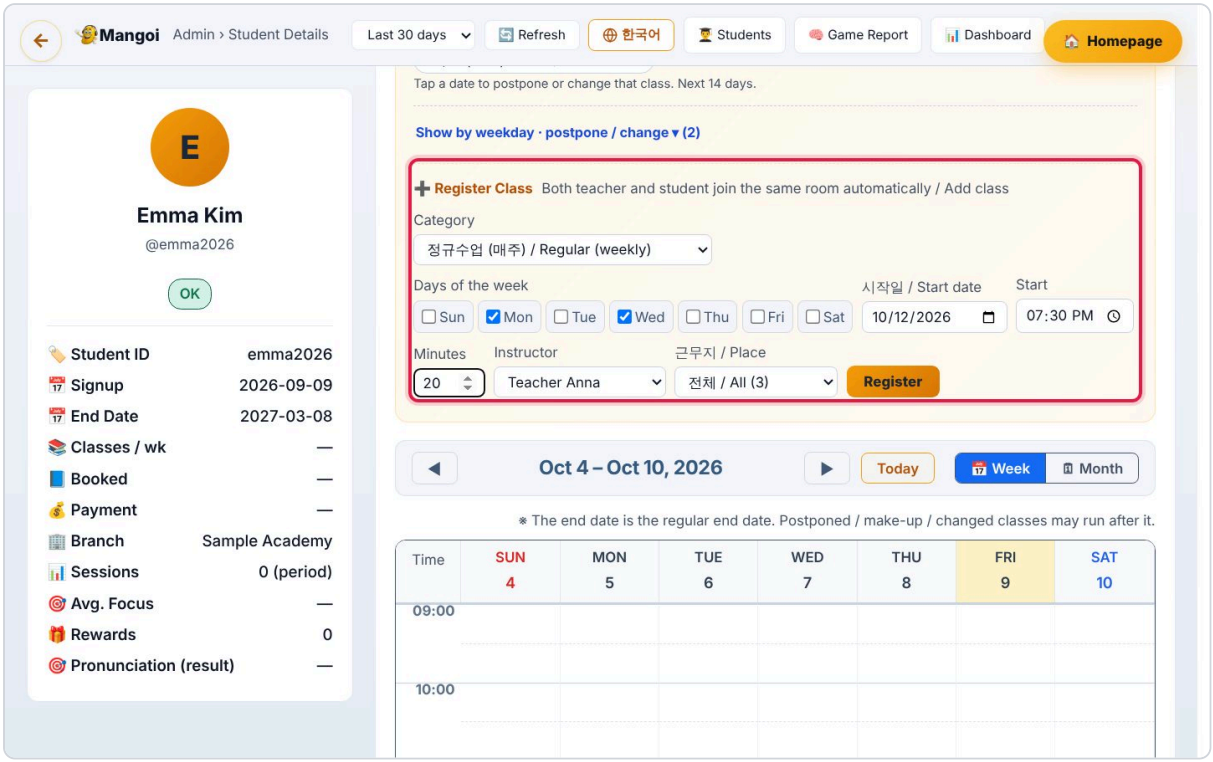

4-1 Student detail › 📅 Schedule

- The **Next class** card shows date, time and teacher.
- A weekly pattern shows as one line, e.g. “2x a week · Mon·Wed 19:30”, with **date chips** for the next 14 days below.
- Each chip shows the teacher’s name, so substitutes are easy to see.

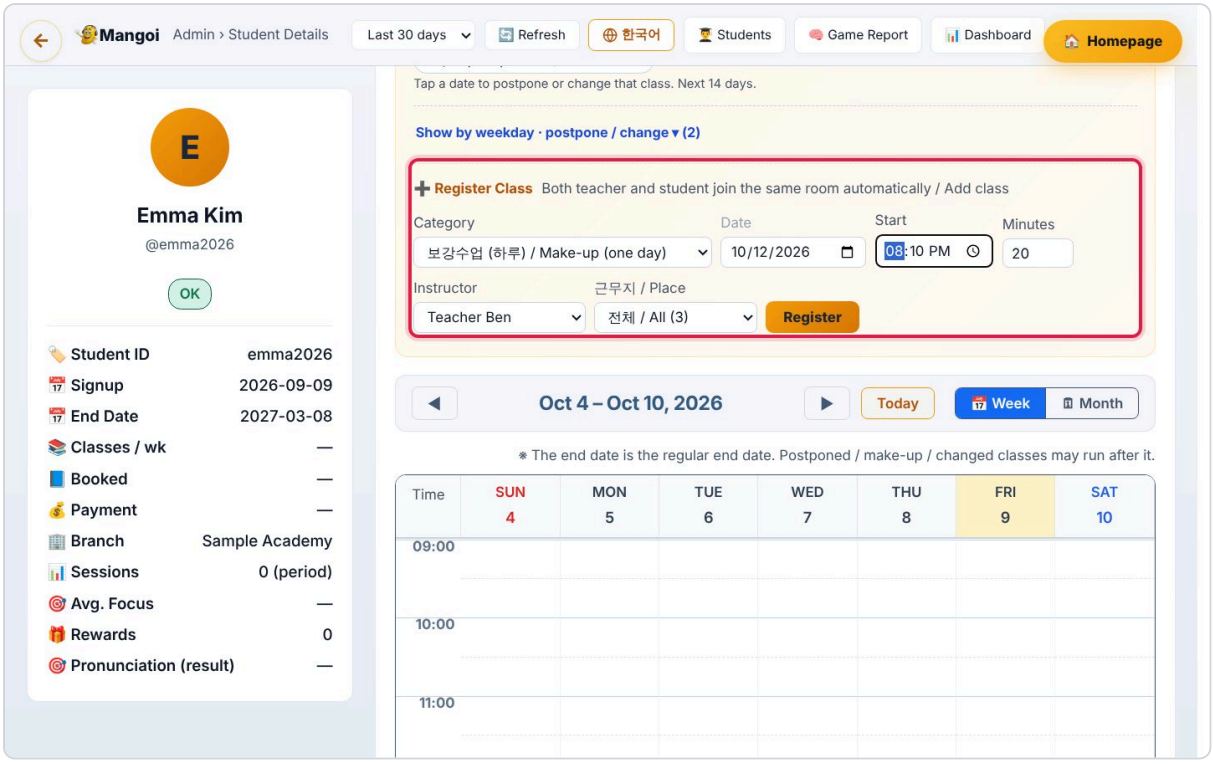

4-2 Add a regular (weekly) class

- In ➕ **Add class**, set **Type = Regular (weekly)**.
- Tick the **days** (e.g. Mon + Wed), the **start date**, **start time (KST)** and **minutes** (usually 20).
- Pick the **teacher**. **Place (All/Home/Office)** narrows the list; teachers who left are hidden by default.
- Press **Add**. If it warns about a clash, check that teacher's schedule first.
- Teacher and student then join the **same room automatically**, no room code.

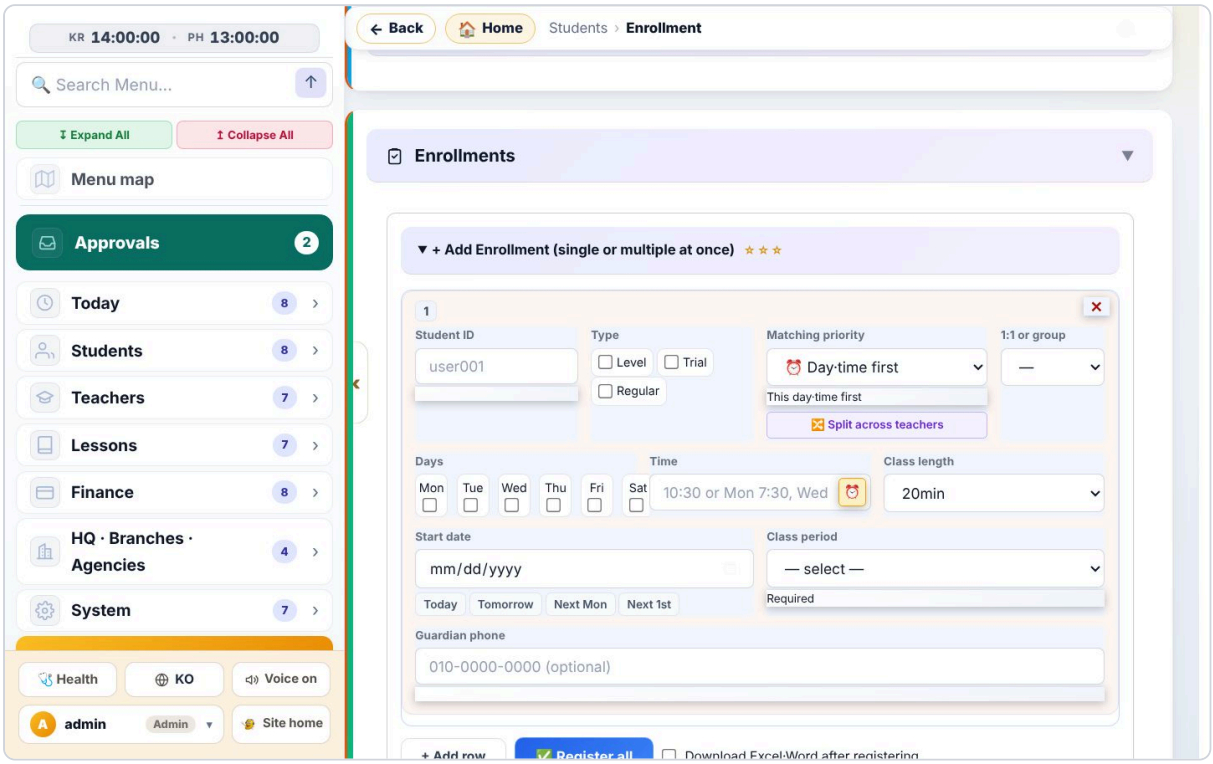

4-3 One-day classes (make-up · trial · level test)

- Choose **Make-up / Trial / Level test**: you pick one **date** instead of days.
- Colours: Regular amber · Make-up purple · Trial green · Level test blue.
- One-day classes show “this day only”, and “⌛ past” after the date.

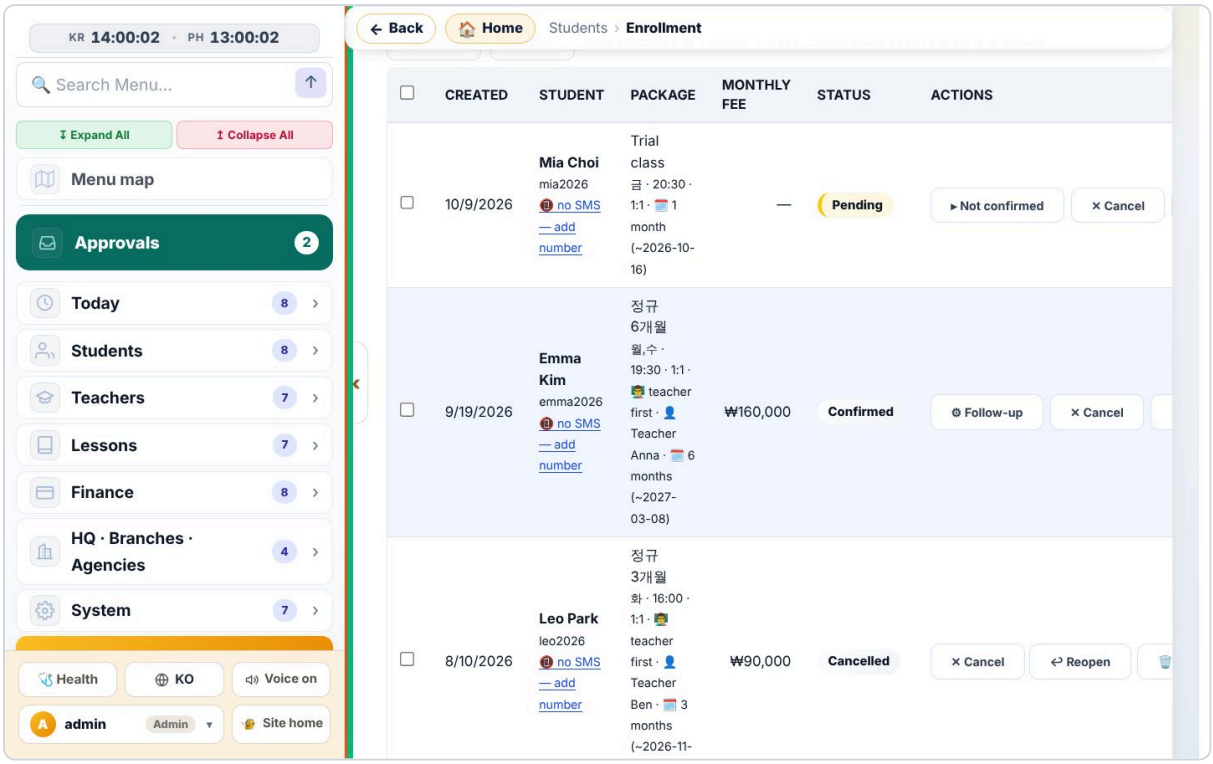

4-4 Enrollment form (many students at once)

- Menu **Students › Enrollment** → **+ Add enrollment**.
- One row per student: ID · level · priority (day/time or teacher) · days · time · length · start date · period · parent phone.
- **+ Add row**, then ✅ **Register all**. You can also download an Excel/Word/Kakao form, fill it in and upload it.
- Registered rows are confirmed automatically and classes are created for the **whole period** (6 months = 6 months of classes).
- Dates where the student already has a class at that time are skipped and reported.

4-5 Enrollment list

- Status: Pending · Confirmed · Active · Cancelled · Ended.
- ▸ **Not confirmed** / ⚙️ **Follow-up** shows the confirmation steps (link student, assign teacher, create classes).
- For ✕ **Cancel** and ↩️ **Restore** see chapter 6.

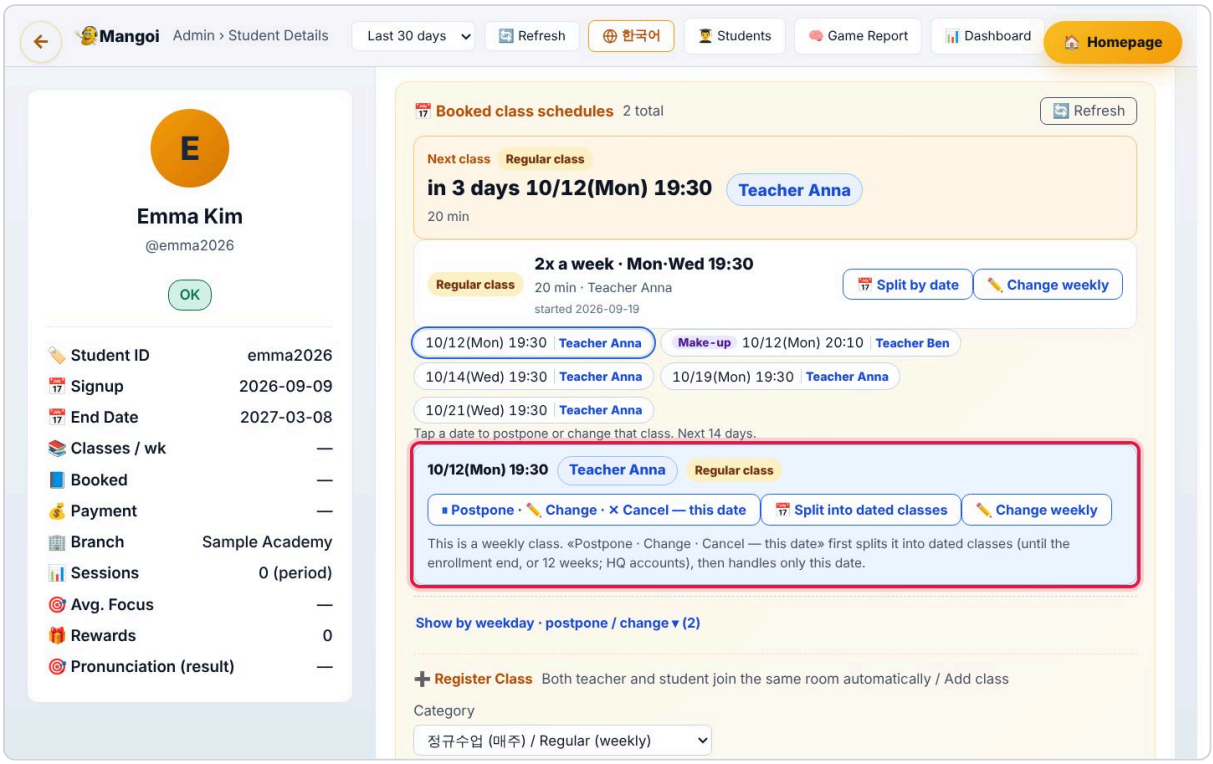

5 Postponing · Changing classes

«Postpone» = move just this one class. «Change» = from this class on, every time. The same window opens from everywhere.

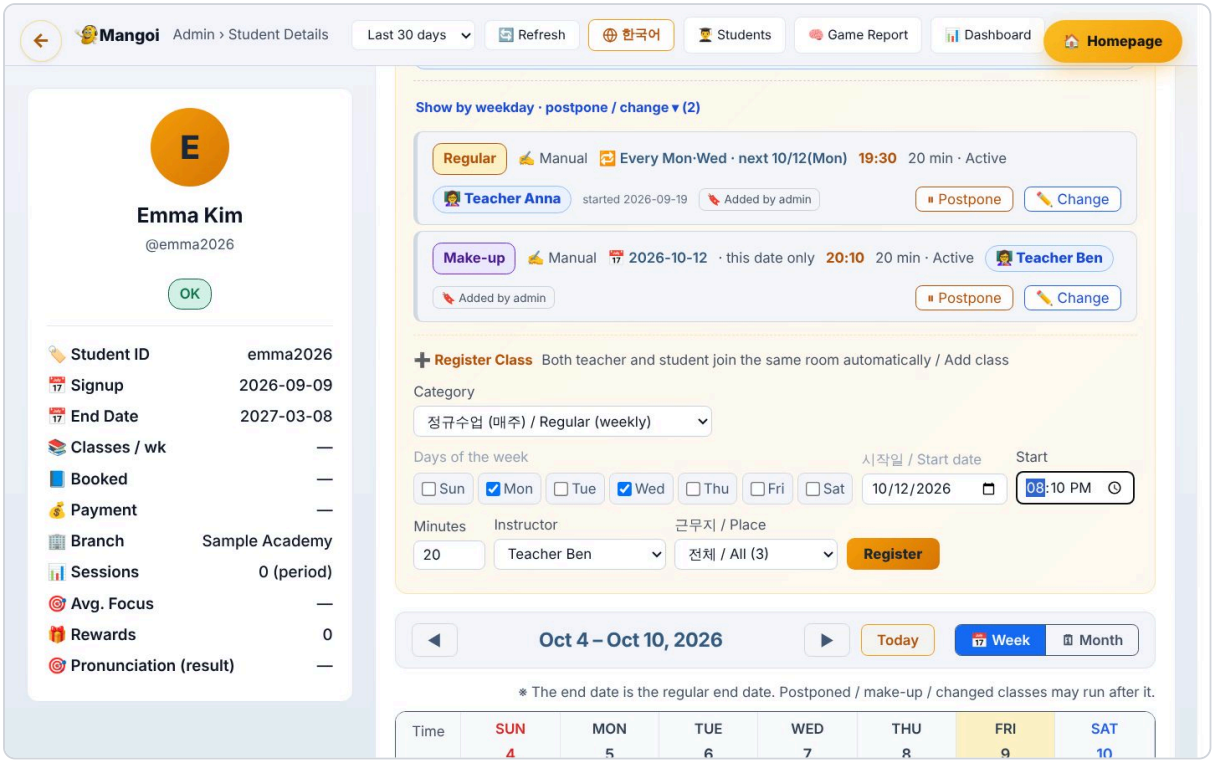

5-1 Way in ① date chips

- In Student detail › 📅 Schedule, press a **date chip**; the actions open below.
- One-day class: ⏸️ **Postpone** · ✏️ **Change** · ✕ **Cancel**.
- Weekly class: **"… — this day only"** — only that week changes, other weeks stay.
- 📅 **Split by date** turns a weekly pattern into separate dated classes (HQ account).

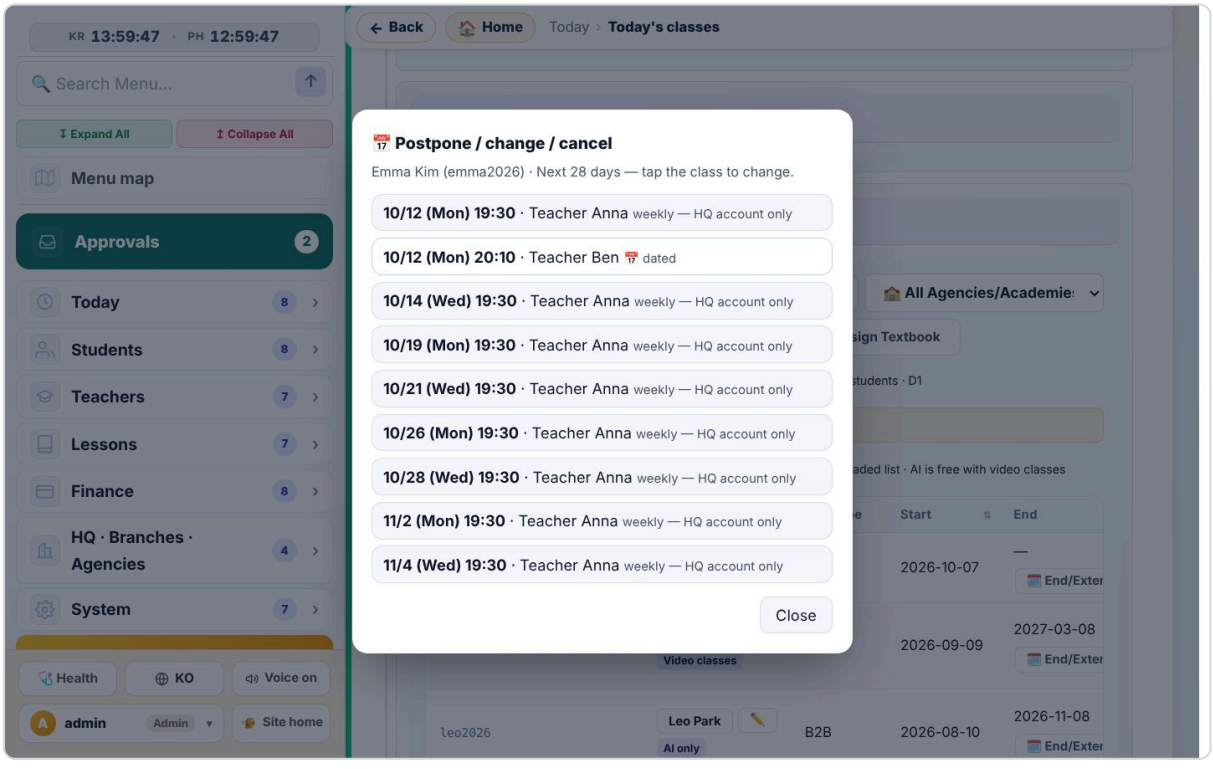

5-2 Way in ② weekly rows

- Open **By weekday · Postpone/Change ▾**: each row has ⏸ **Postpone** and ✏️ **Change**.
- They list the next 28 days of classes; pick a date to open the same window.
- To change the weekly time itself use ✏️ **Change weekly**.

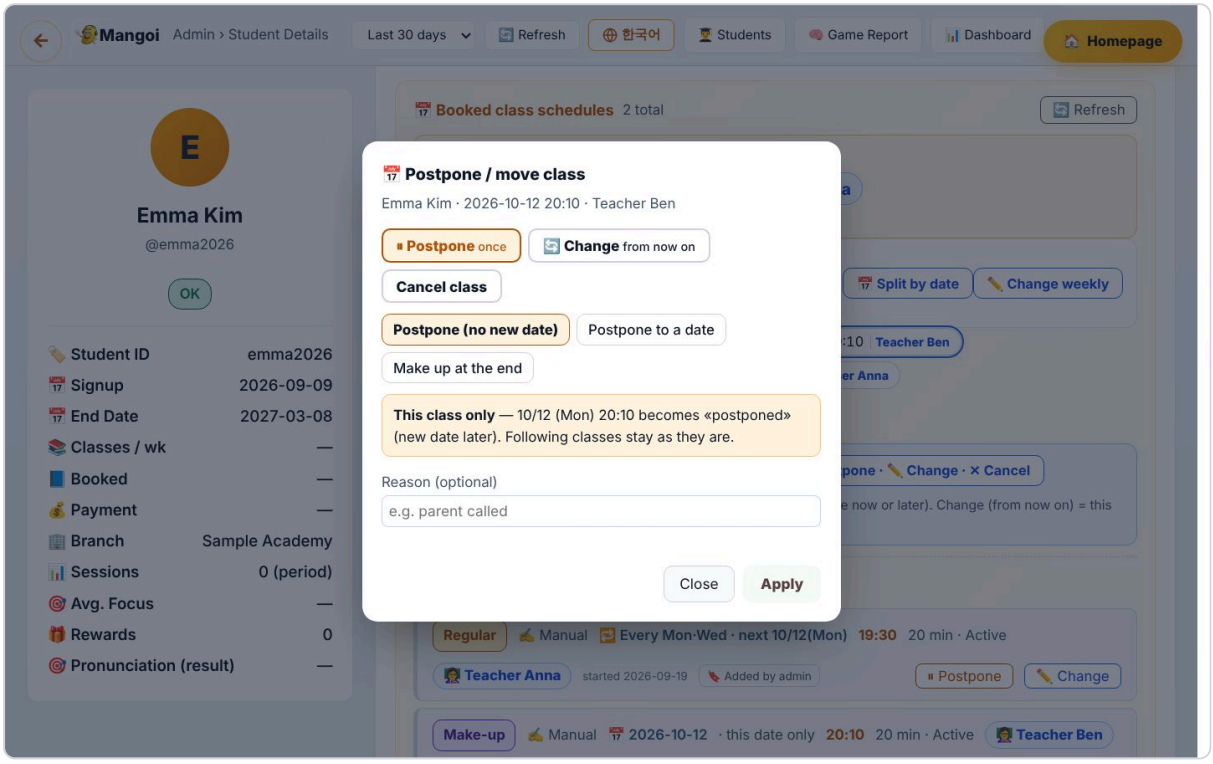

5-3 Way in ③ student list · today's classes

- ⏸ **Postpone** in the student list and 📅 **Postpone/Change** in Today's classes open the same picker.
- "weekly — split first" means that day is separated first, then handled.
- Cafe24 weekly classes must be changed in Cafe24 (the nightly sync would undo it here).

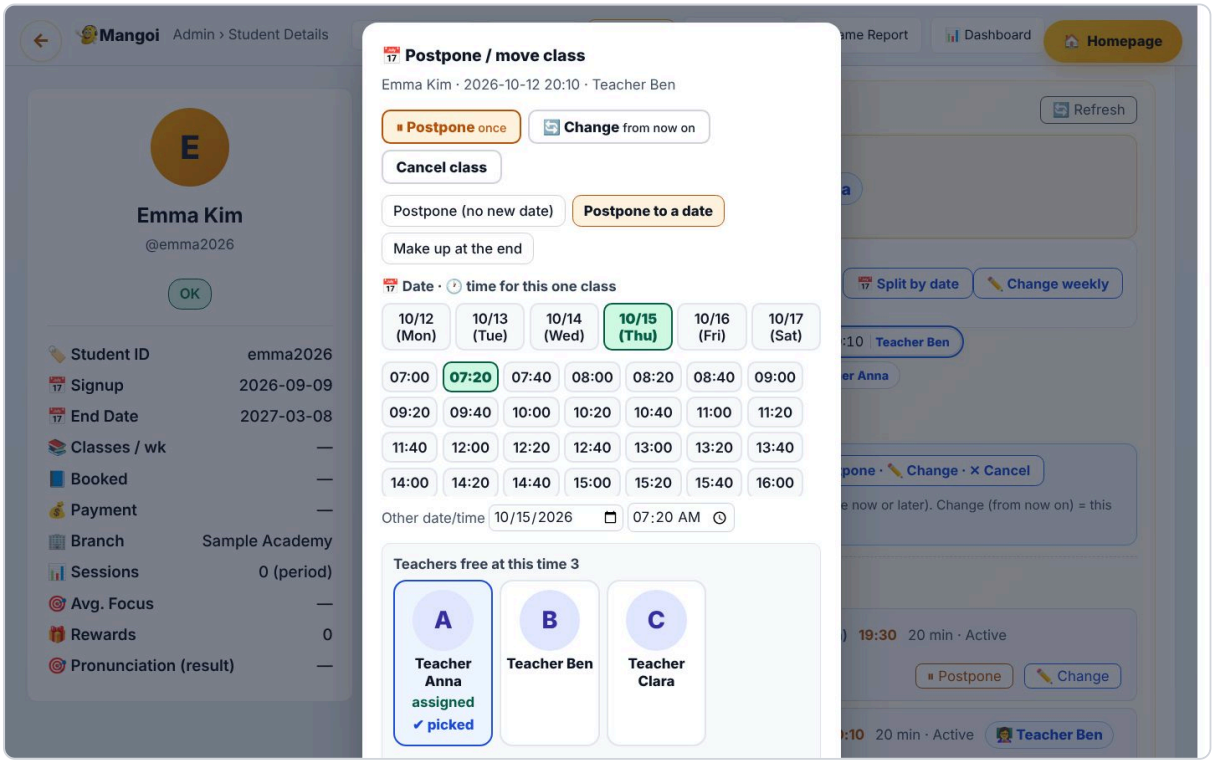

5-4 The postpone/change window

- Top: student · date · time · teacher.
- Three buttons: ⏸ **Postpone (once)** · 🔄 **Change (from now on)** · **Cancel class** (HQ only).
- The **reason** is saved in the history. A confirm box appears before anything is saved.

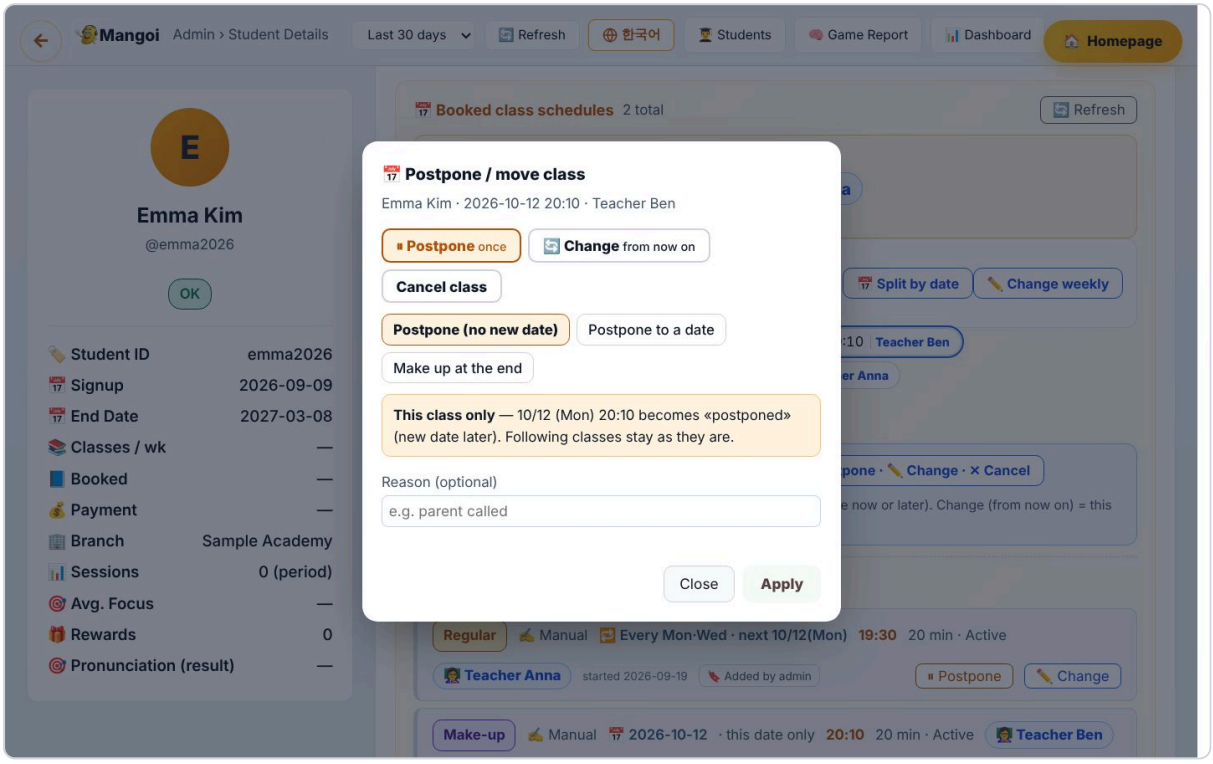

5-5 Postpone ① to a set date

- **Postpone to a date** → pick a day chip and a time chip (10-minute steps), or type below.
- Available teachers appear as cards. If the usual teacher is busy you can pick another (HQ account).
- Teachers who cannot take it (other class, leave, substituting) are left out with the reason.

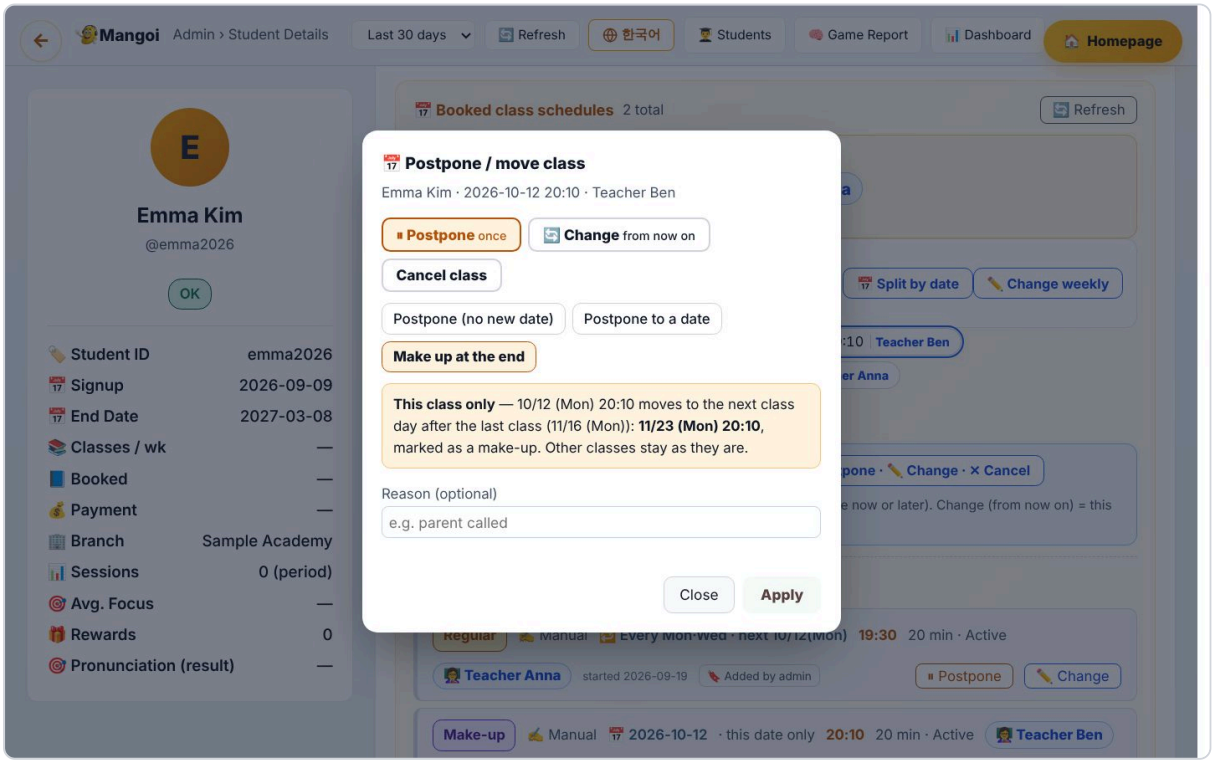

5-6 Postpone ② on hold (no date yet)

- Use it when the new date is not known. The class stays as "⏸ Postponed"; set the date later with 📅 **New date**.
- Postponed classes are left out of Today's classes, joining and absence alerts.

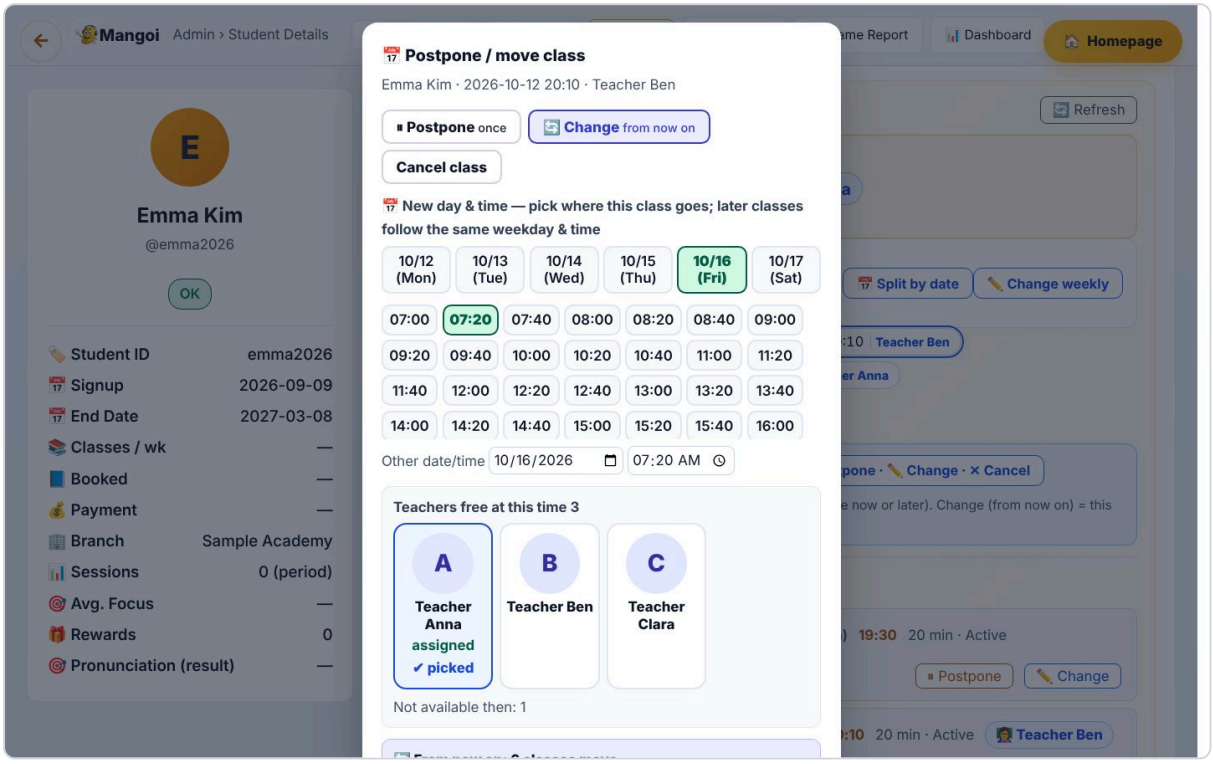

5-7 Postpone ③ make up at the end

- Moves just this class to the next class day **after the last class**, marked "make-up". The server works out the date.
- Other classes stay as they are.

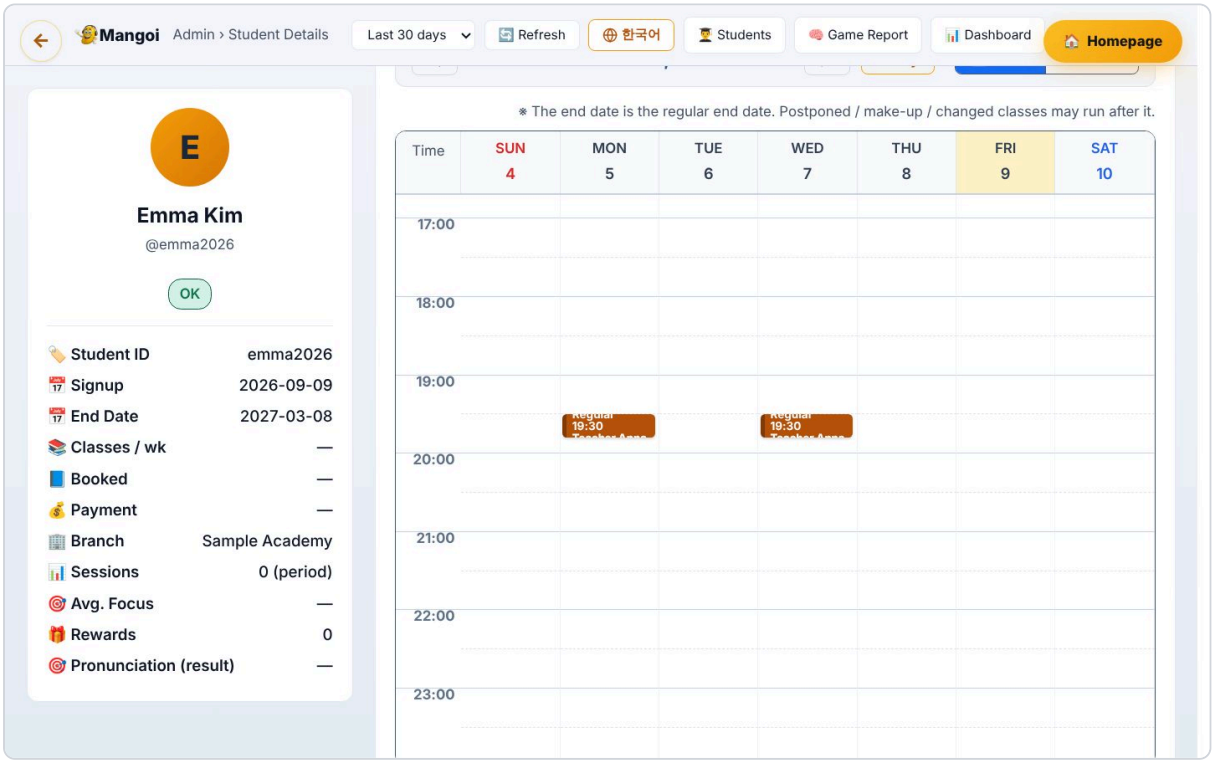

5-8 Change (from now on)

- Pick a new day and time; a **preview** lists every later class that will move (“6 classes move”).
- If any date clashes, nothing moves and the clashing dates are shown.
- Check the preview, then press **Apply**.

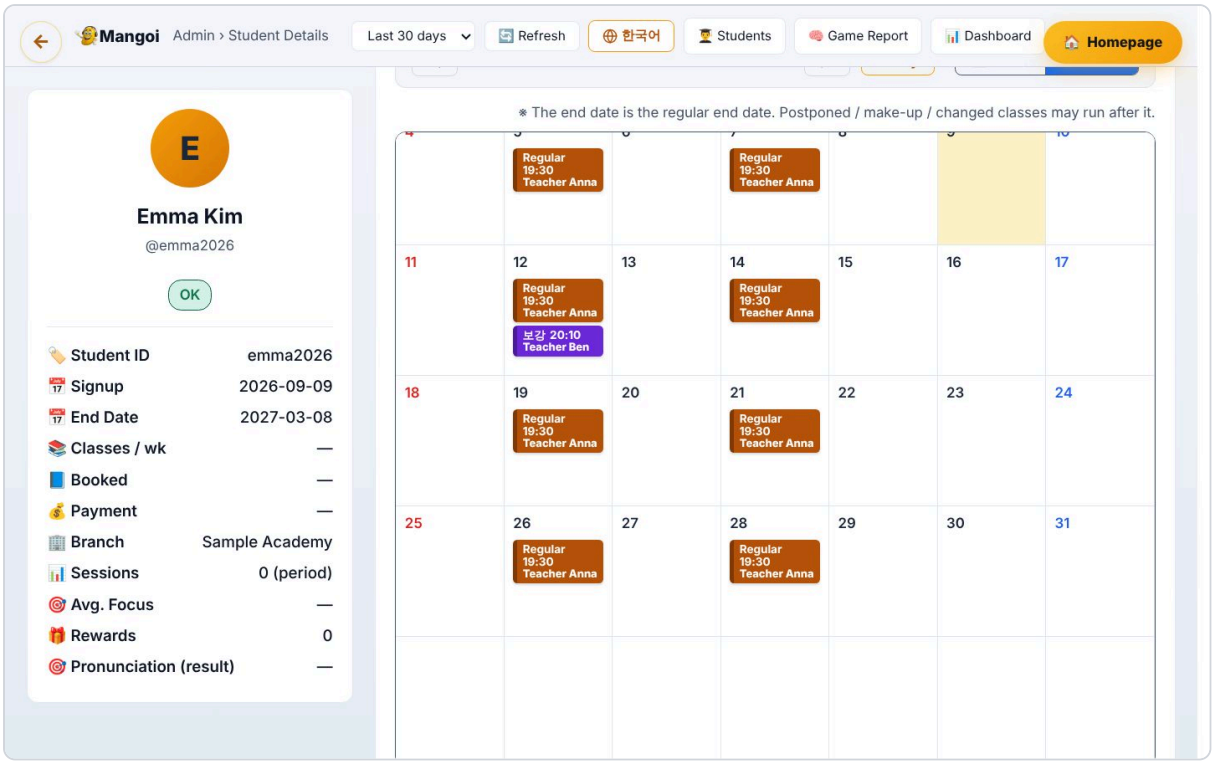

5-9 Check the result in the calendar

- Below the 📅 Schedule tab: **week/month calendar**, cards coloured by type with the teacher’s name.
- Click a card to open the postpone/change window for that day.
- KR/PH public holidays are shown too.

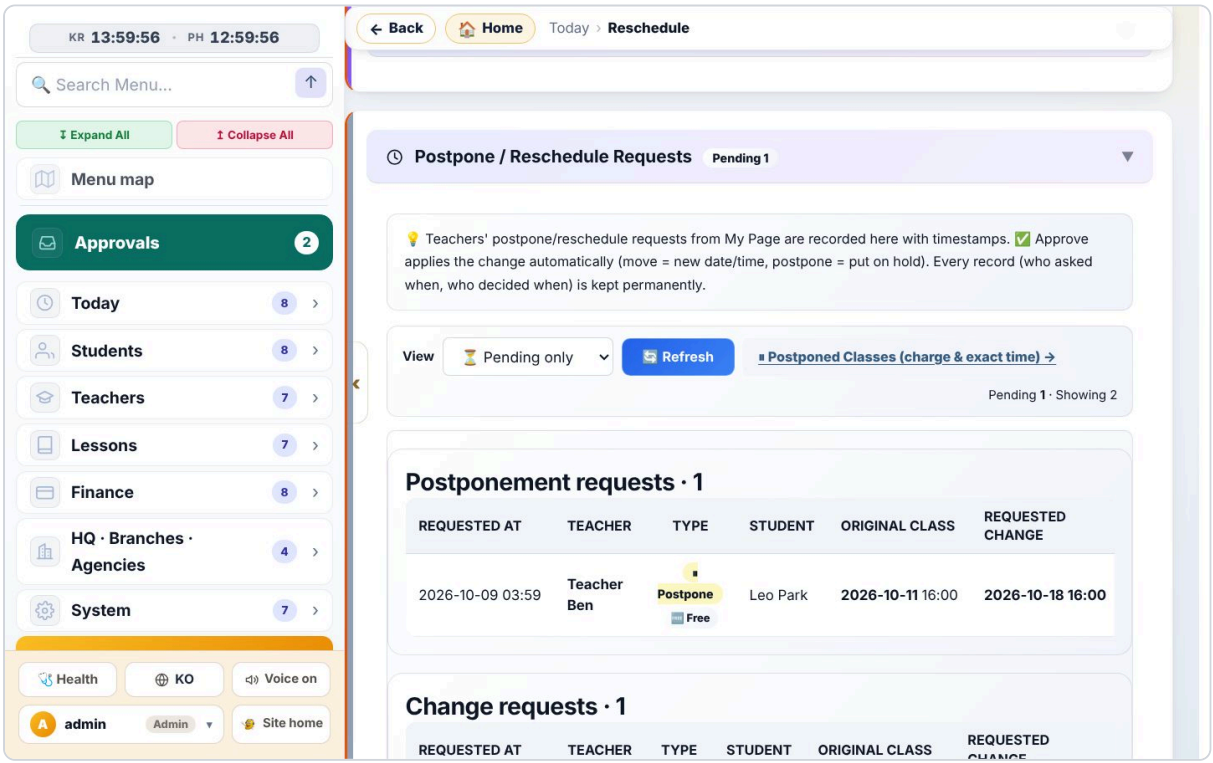

5-10 Month view

- Press **Month** for a whole month at once.
- Enrollments without real classes are not drawn; a note above says how many were left out.

5-11 Postpone/change history

- Menu **Today › Reschedule**: every request from teachers and students, and what admins did, **with times**.
- Students' free postpone/change requests are applied **immediately without approval** and only recorded here.
- Pending requests: **Approve / Reject**. Approving updates the schedule automatically.

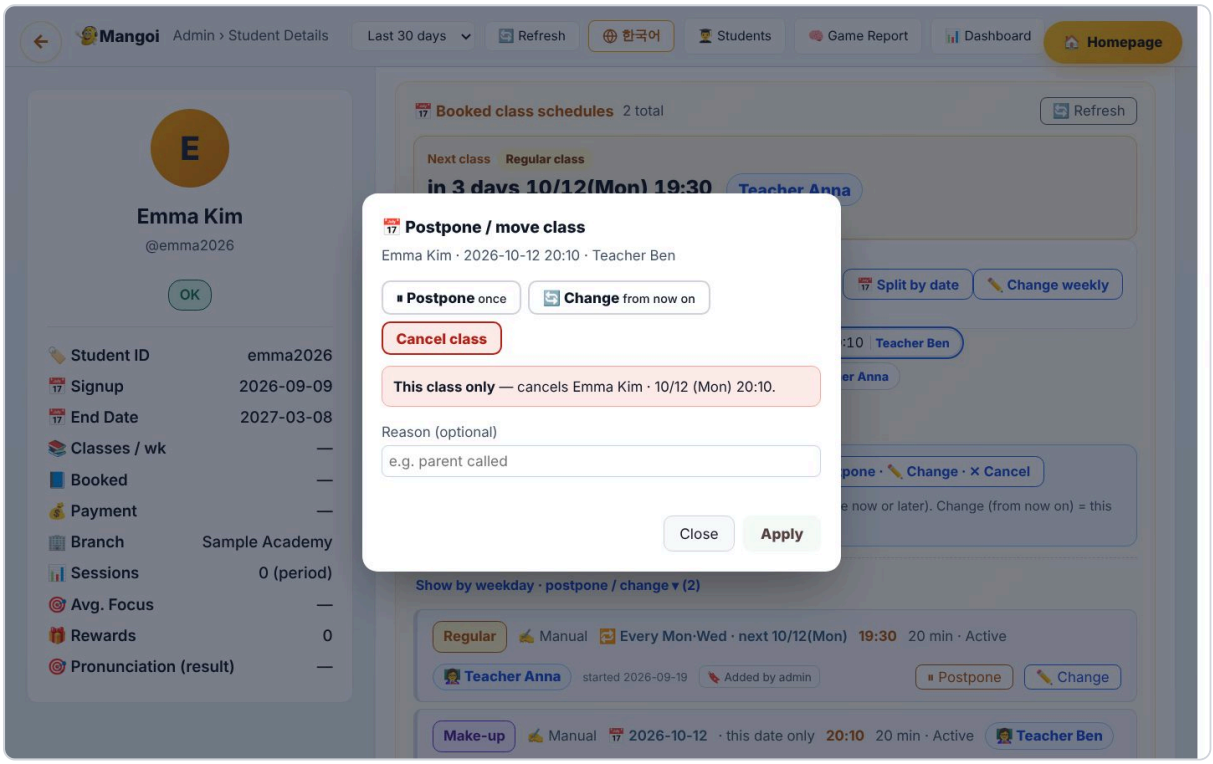

6 Cancelling classes

Cancelling is hard to undo. HQ accounts only, and you are asked to confirm.

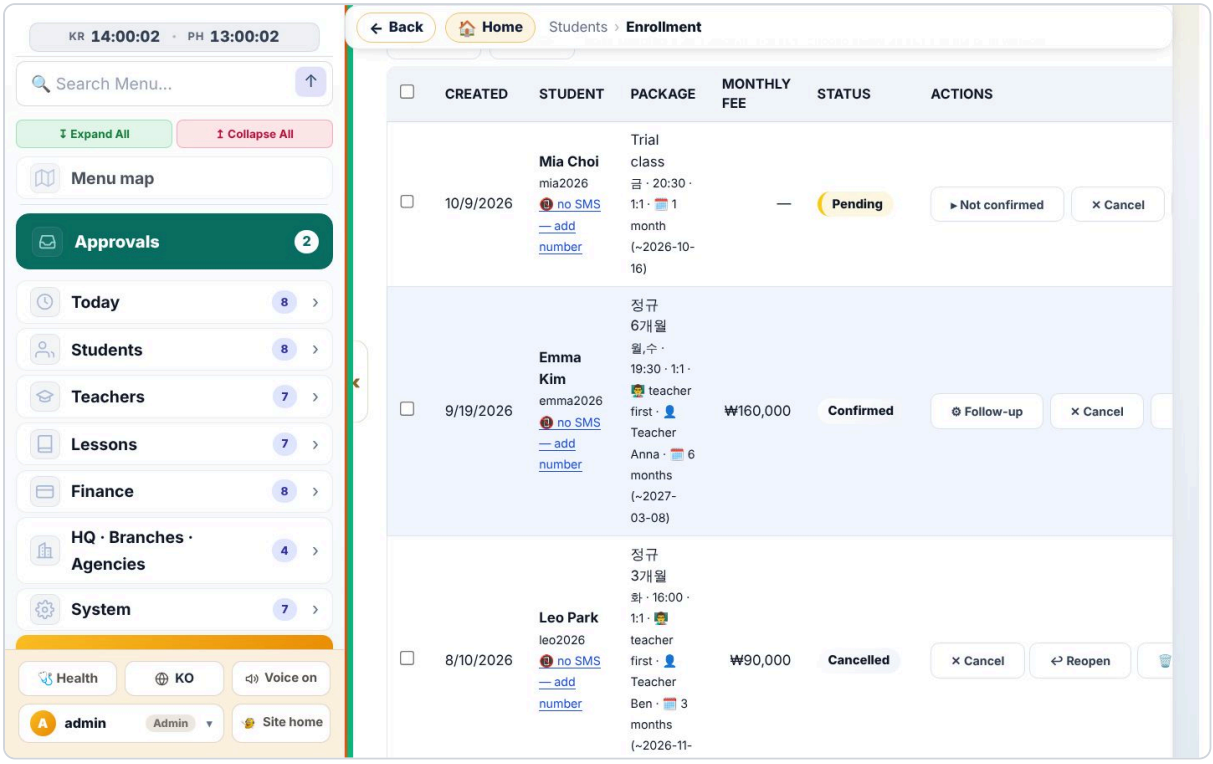

6-1 Cancel one class

- In the window: **Cancel class** → reason → **Apply** → confirm.
- A one-day class is cancelled; for a weekly class **only that day** is separated and cancelled (other weeks stay).
- An already postponed class can also be cancelled with **✕ Cancel this class**.
- Cancelled classes stay in the history.

6-2 Cancel an enrollment → its remaining classes end too

- ✕ **Cancel** in the enrollment list also ends that enrollment's **future classes** ("N remaining classes ended").
- Weekly repeat rows without dates are **kept** (because of payroll) — tidy them in Student › 📅 Schedule.
- ↩️ **Restore** brings back classes this cancel ended, if not past and not clashing. Add any that could not be restored by hand.

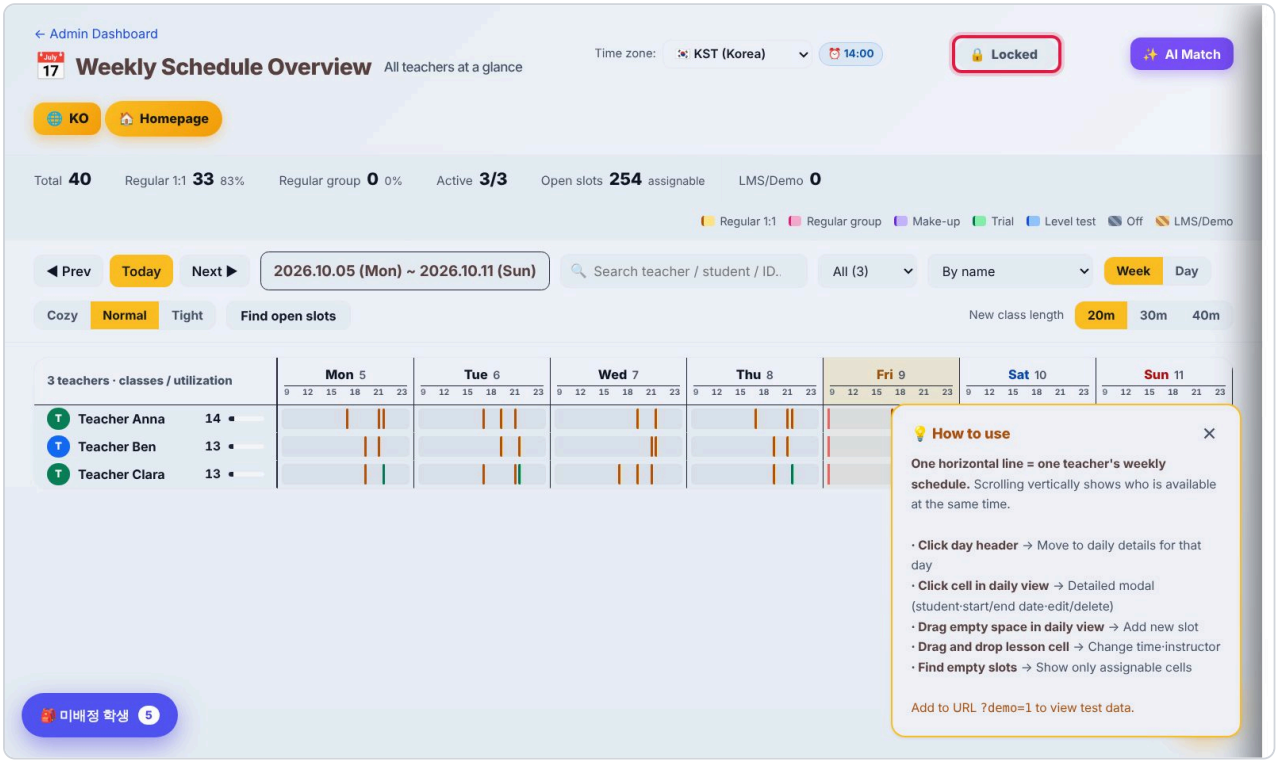

7 Timetable (weekly · daily)

Every teacher's classes on one board; drag to move. It is **locked** by default to prevent mistakes.

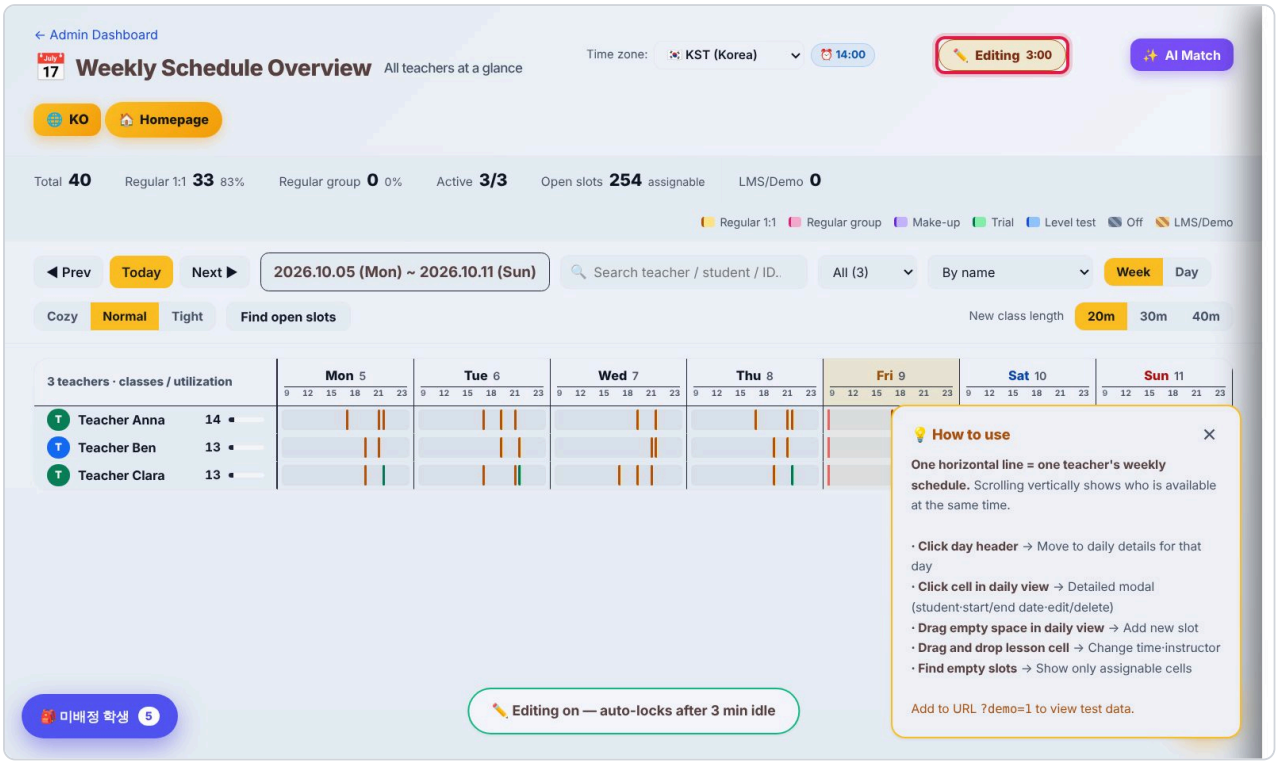

7-1 Weekly timetable

- Menu **Teachers › Schedule**. Across = time, down = teachers.
- Colours: Regular amber · Group pink · Make-up purple · Trial green · Level test blue · Off hatched.
- Top numbers: total classes · regular · active teachers · free slots. **Find free slot** finds empty times.
- 🔒 **Locked** (top right): dragging does nothing while locked.

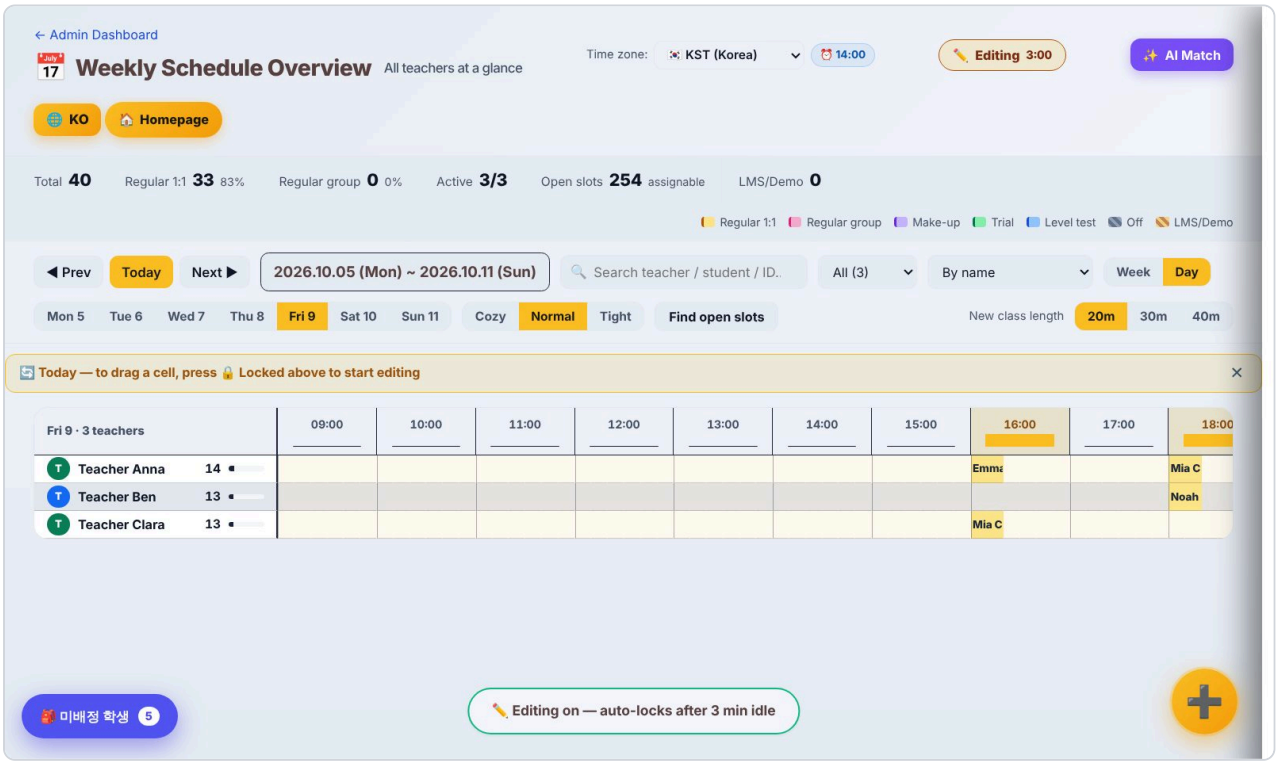

7-2 Turn editing on

- Press 🔒 **Locked** → ✏️ **Editing 3:00**. It locks again after 3 minutes without a save.
- After a save, **Undo** is available for **15 seconds**.

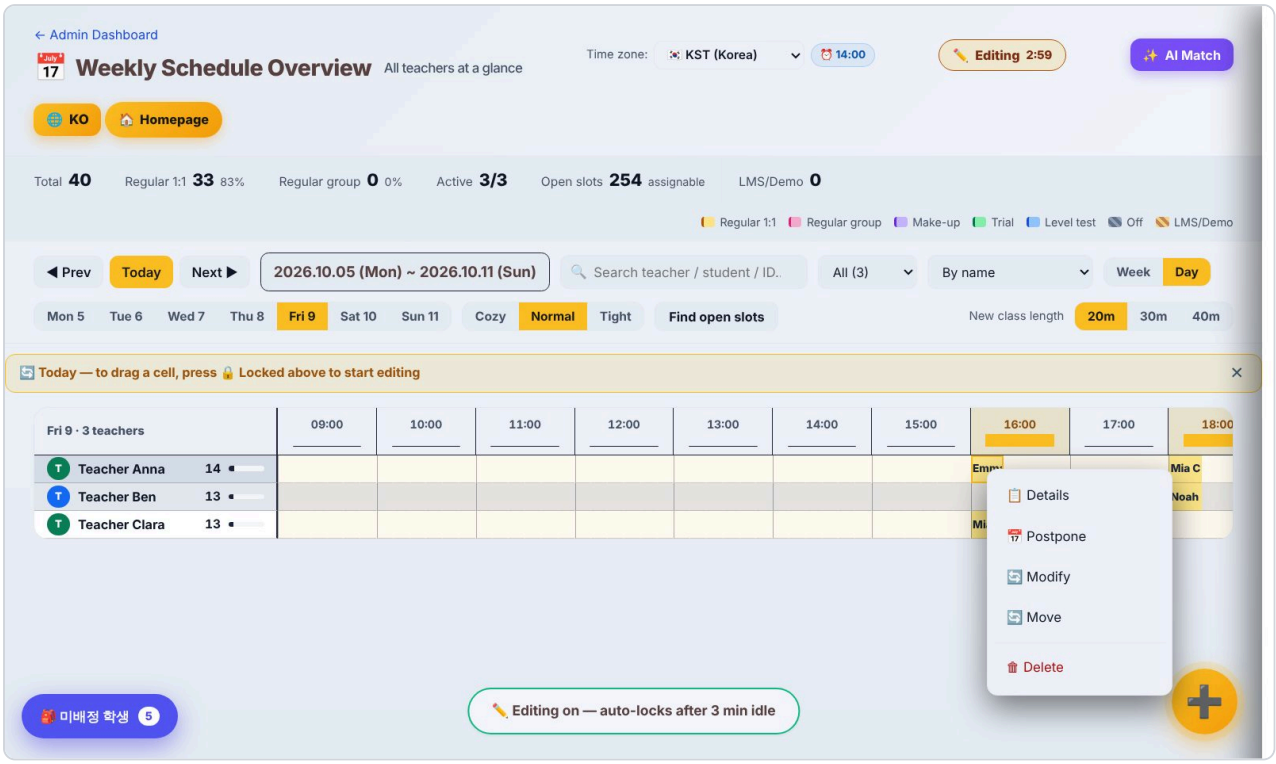

7-3 Daily view · drag to move

- **Day** view (the first screen from the sidebar) shows today large.
- Drag a student card to another time or teacher; it asks **“Postpone or Change?”**.
- **Postpone** = that day only, **Change** = from now on.

7-4 Right-click menu

- Right-click a class: **Details · Postpone · Change · Change time · Delete**.
- Times are picked in 10-minute steps.

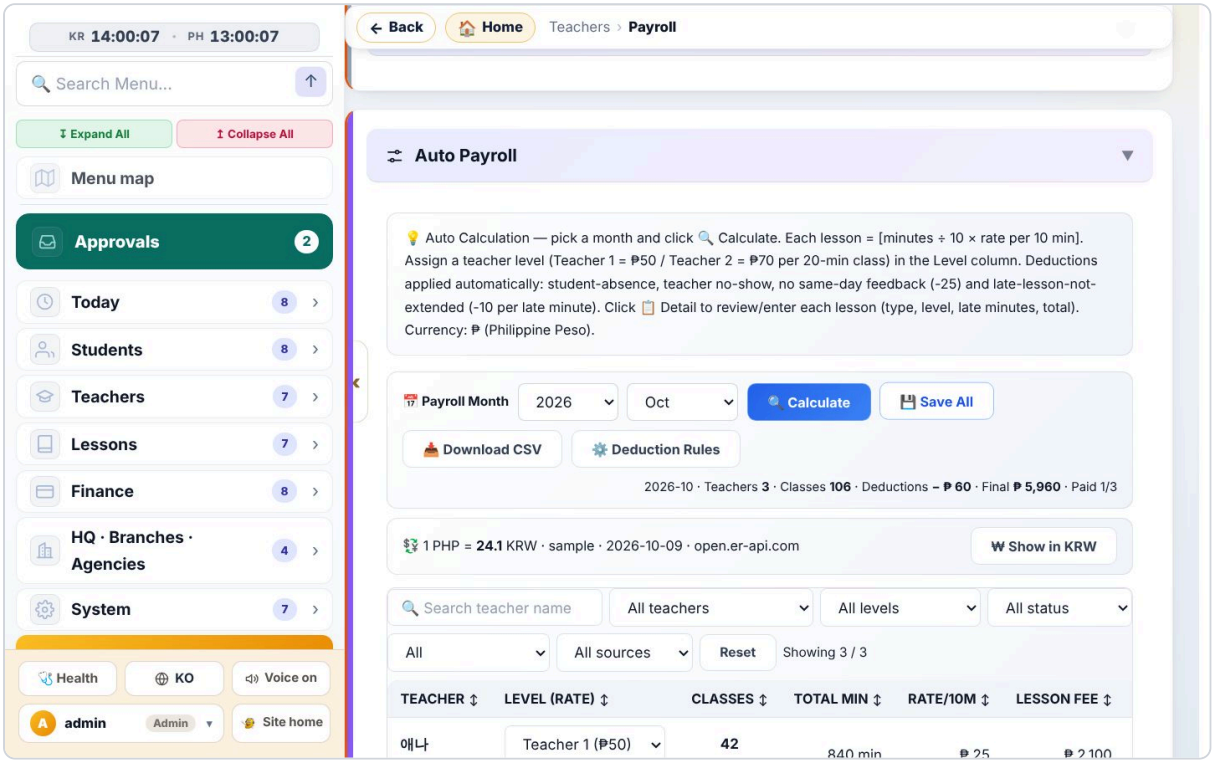

8 Payroll

Teacher pay is calculated automatically from real class records. Amounts are in ₱ (Philippine peso).

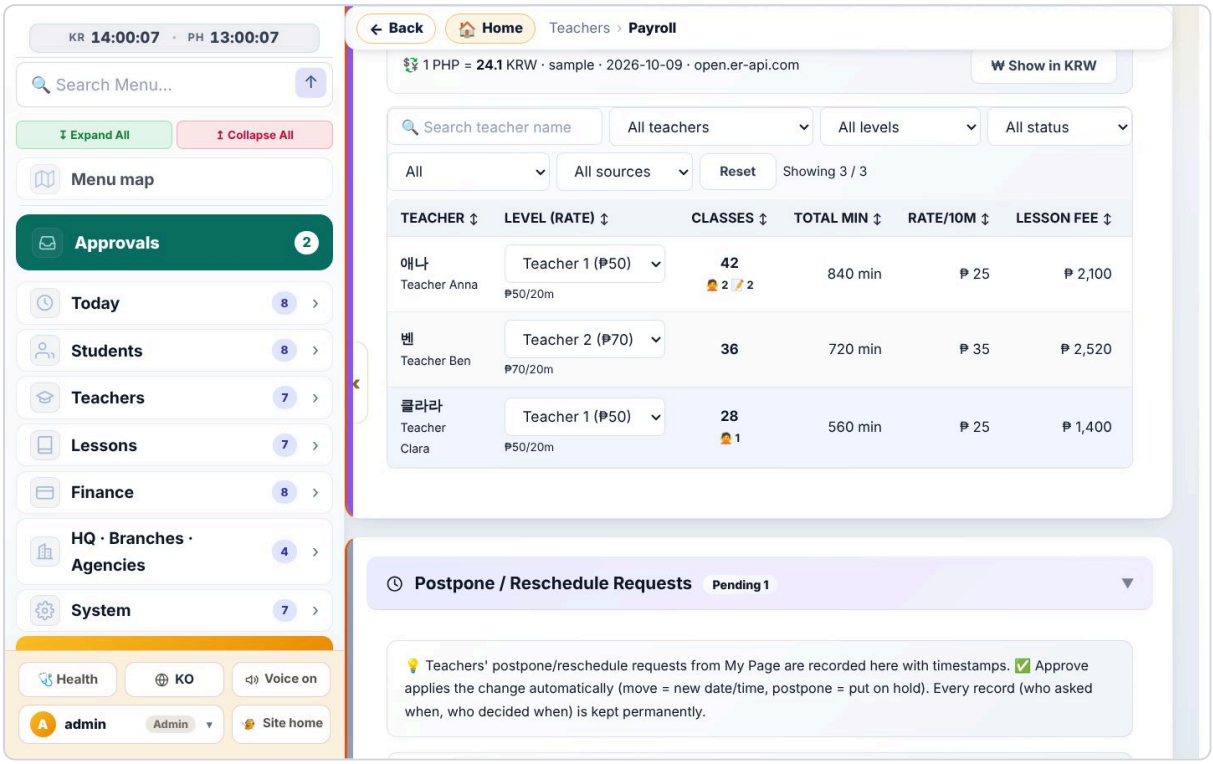

8-1 Automatic payroll — calculate

- Menu **Teachers › Payroll** → 💼 **Automatic teacher payroll**.
- Choose the **month** and press 🔍 **Calculate**.
- Formula: **class minutes ÷ 10 × rate per 10 min**, added up per class. Rates by level (e.g. Teacher 1 = ₱50 / 20 min, Teacher 2 = ₱70 / 20 min).
- Summary: teachers · classes · deductions · final pay · paid. **₩ Show in KRW** converts with the exchange rate.

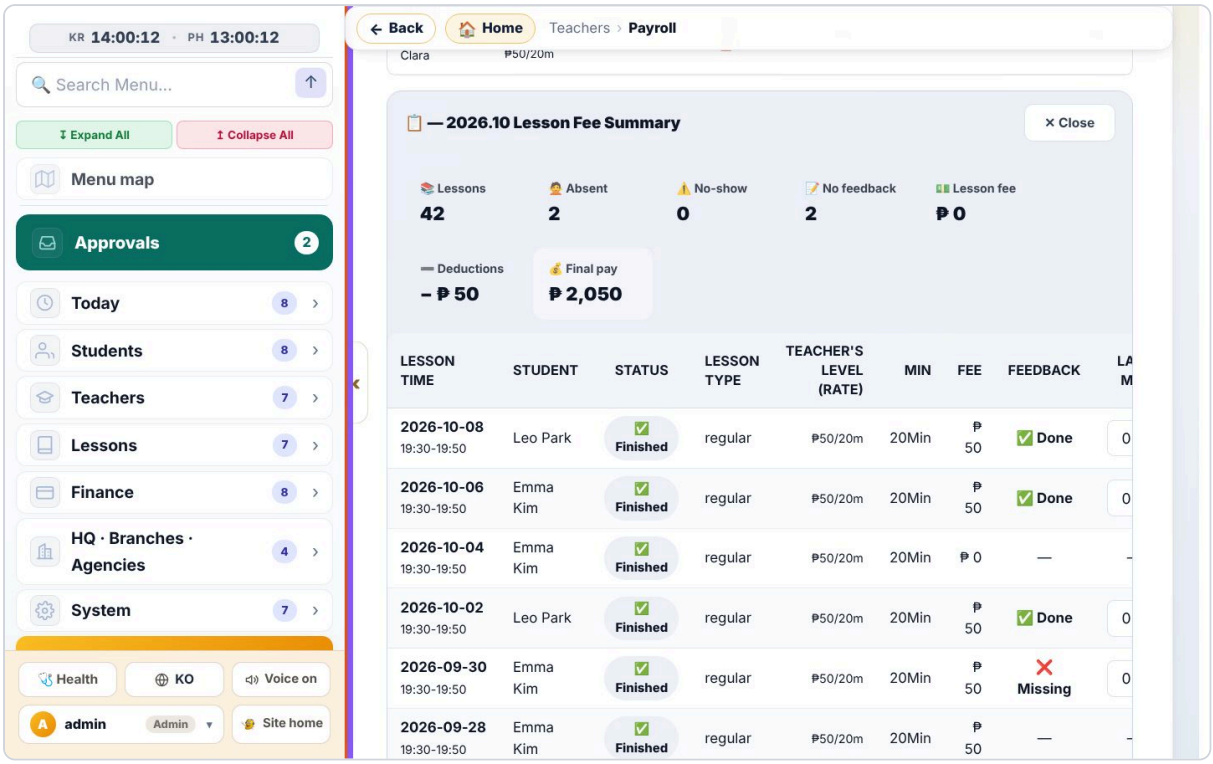

8-2 Per-teacher table

- Per teacher: level (rate) · classes · minutes · rate per 10 min · lesson fee · deduction · **final pay**.
- Change the level right in the table (used from the next calculation).
- Enter an **adjusted amount**, press 💾 **Save all**; after paying press ✅ **Mark paid**.
- 📥 **CSV** downloads it. A “Cafe24” badge means the value came from the Cafe24 monthly sync.

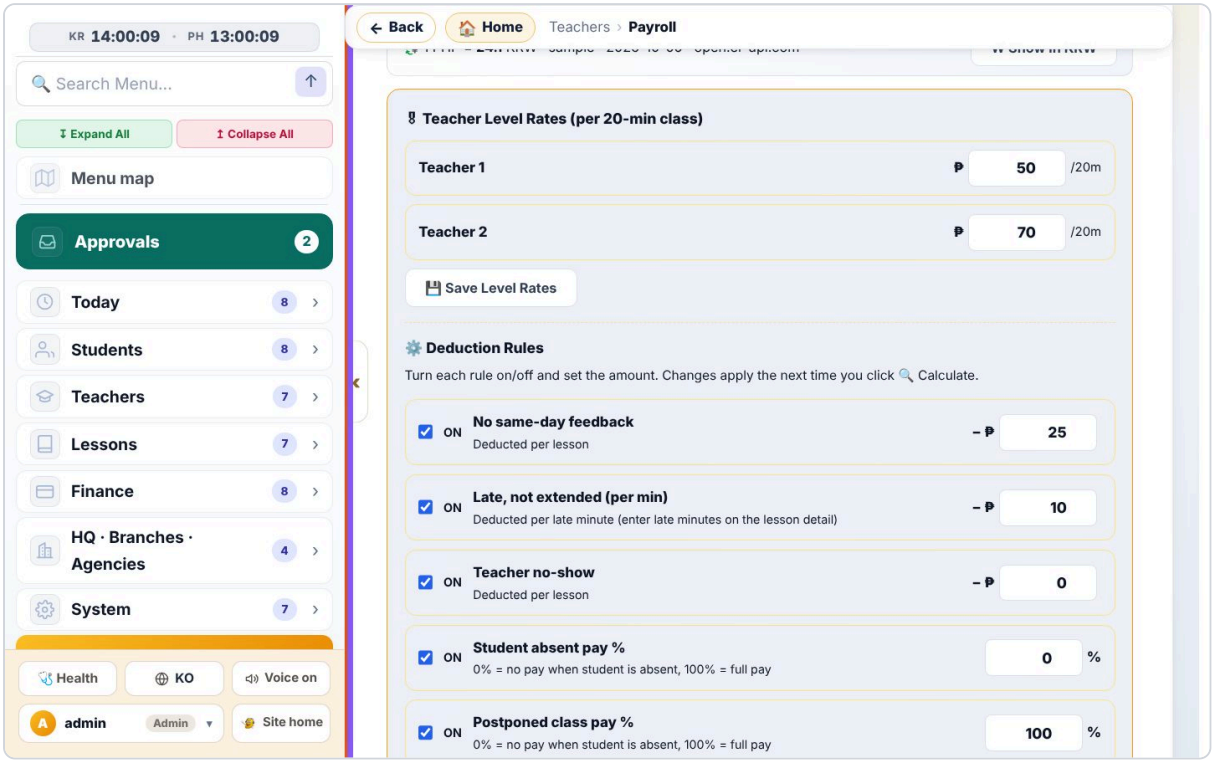

8-3 Class by class (📋 Detail)

- 📋 **Detail** lists each class: date · student · status · minutes · fee · feedback · late minutes · deduction.
- Student absences, teacher no-shows and missing feedback are counted at the top.
- Late minutes can be entered here.

8-4 Deduction rules and postponed-class pay

- ⚙️ **Deduction rules**: edit level rates and deductions, save, then **Calculate** again.
- No same-day feedback −₱25/class · late, not extended −₱10/min · teacher no-show.
- **Student absent pay %** (default 0%), **Postponed class pay %** (default 100%), **Early postpone (30+ min before start) pay %** (default 0%).
- So with the defaults, a class postponed within 30 minutes of start is paid; one postponed earlier is not.

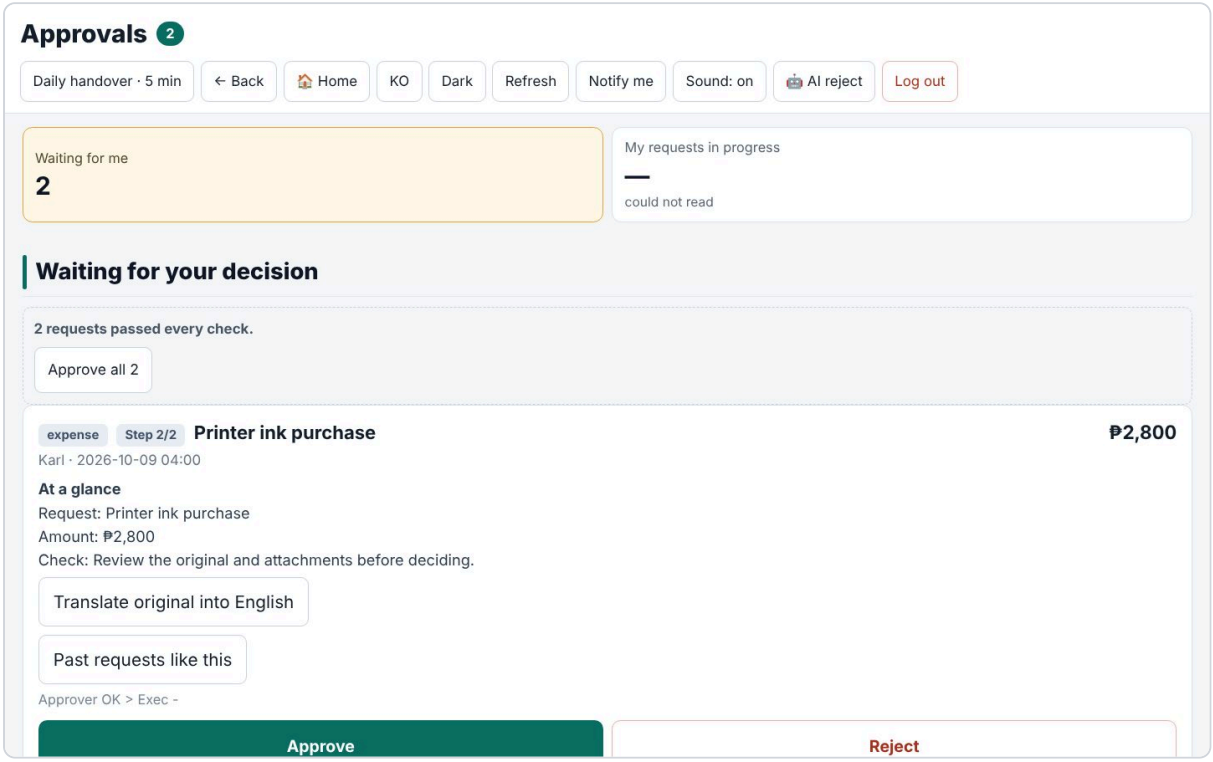

9 Approvals · Daily handover

Spending goes through Approvals; daily work goes in the daily handover.

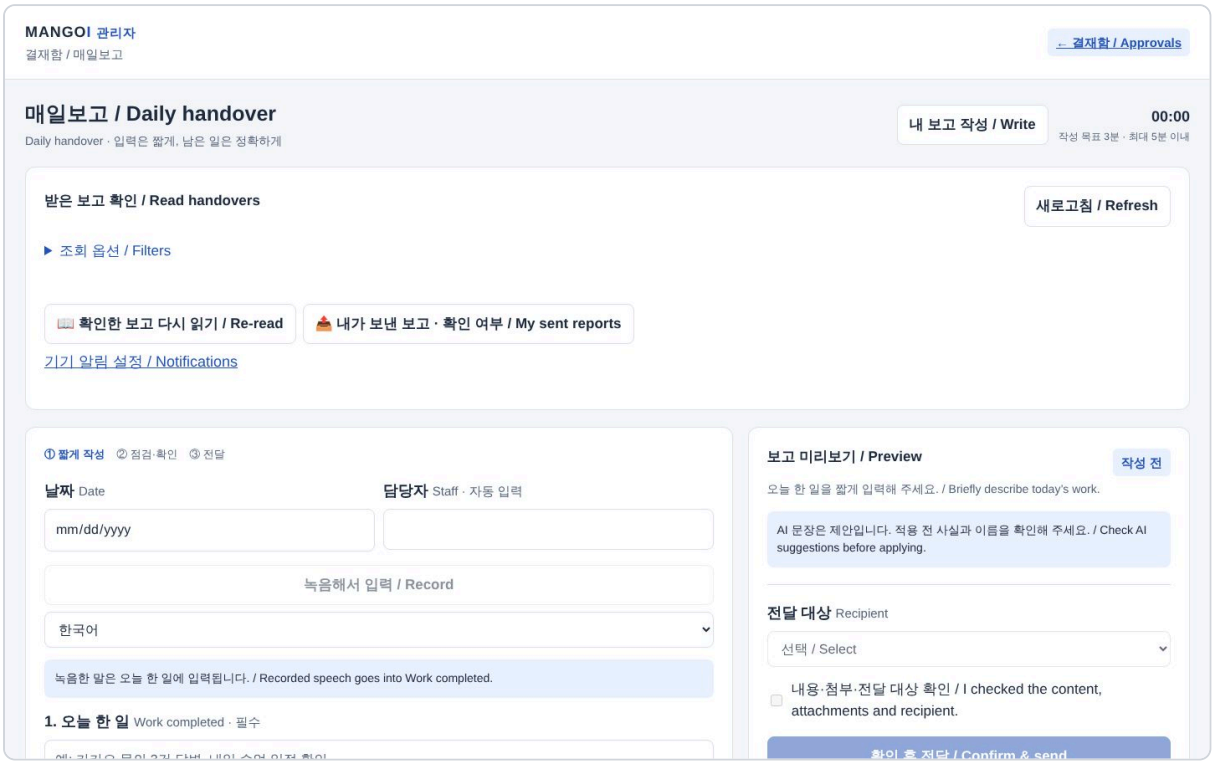

9-1 Approvals

- **Approvals** at the top of the left menu (number = items waiting for you).
- **For me to approve**: check the content, amount and attachments, then **Approve / Reject**. Items that passed every check can be approved together.
- Supplies/expenses of ₱5,000 or more need the approver and then the CEO. Below that the approver decides and the CEO only “acknowledges”.
- If the AI receipt reading looks wrong (e.g. a date far in the past) it is not auto-rejected — it is only marked yellow.

9-2 Daily handover

- **/daily-handover** (also from the banner on the admin home).
- **Write my report**: work done · issues · follow-up → recipient → **Confirm & send**. You can also record your voice.
- Received reports can be read with “Translate to Korean”.
- AI flags lines that need approval; **Move to approval** starts one directly.
- If you skip a workday, you and the CEO get a reminder next morning (holidays excluded).

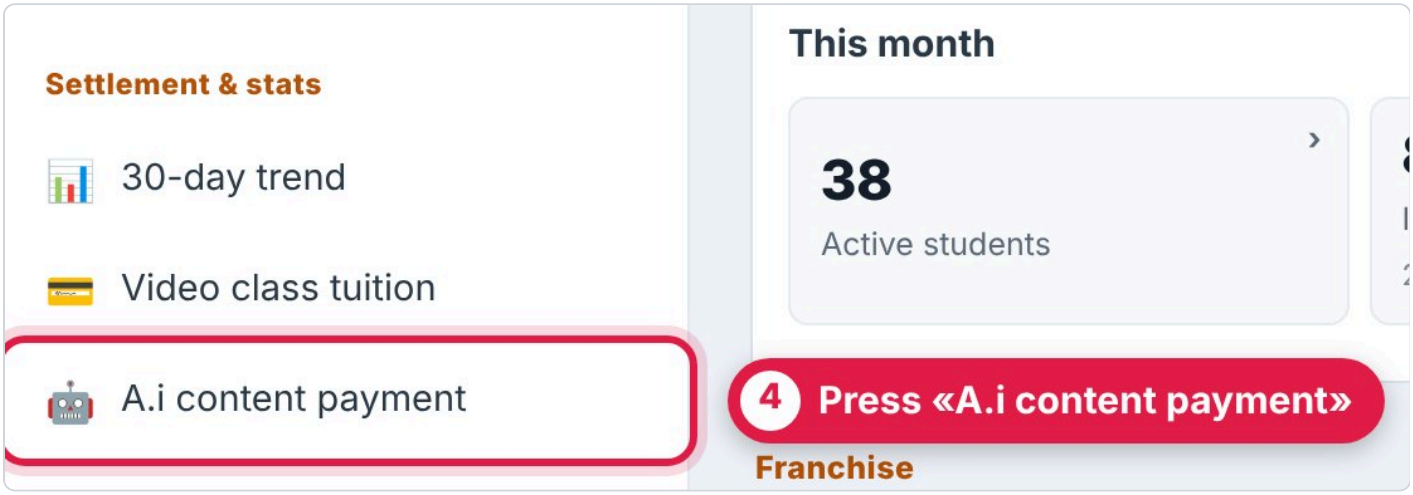

10 A.i content payment (agencies)

Agencies (academies) choose the students who will use A.i next month and pay by card by the last day of this month. Only agency accounts pay — HQ staff should know this flow to answer questions. The 4-page guide to send to agencies is «🤖 A.i Content Payment Guide» in the library.

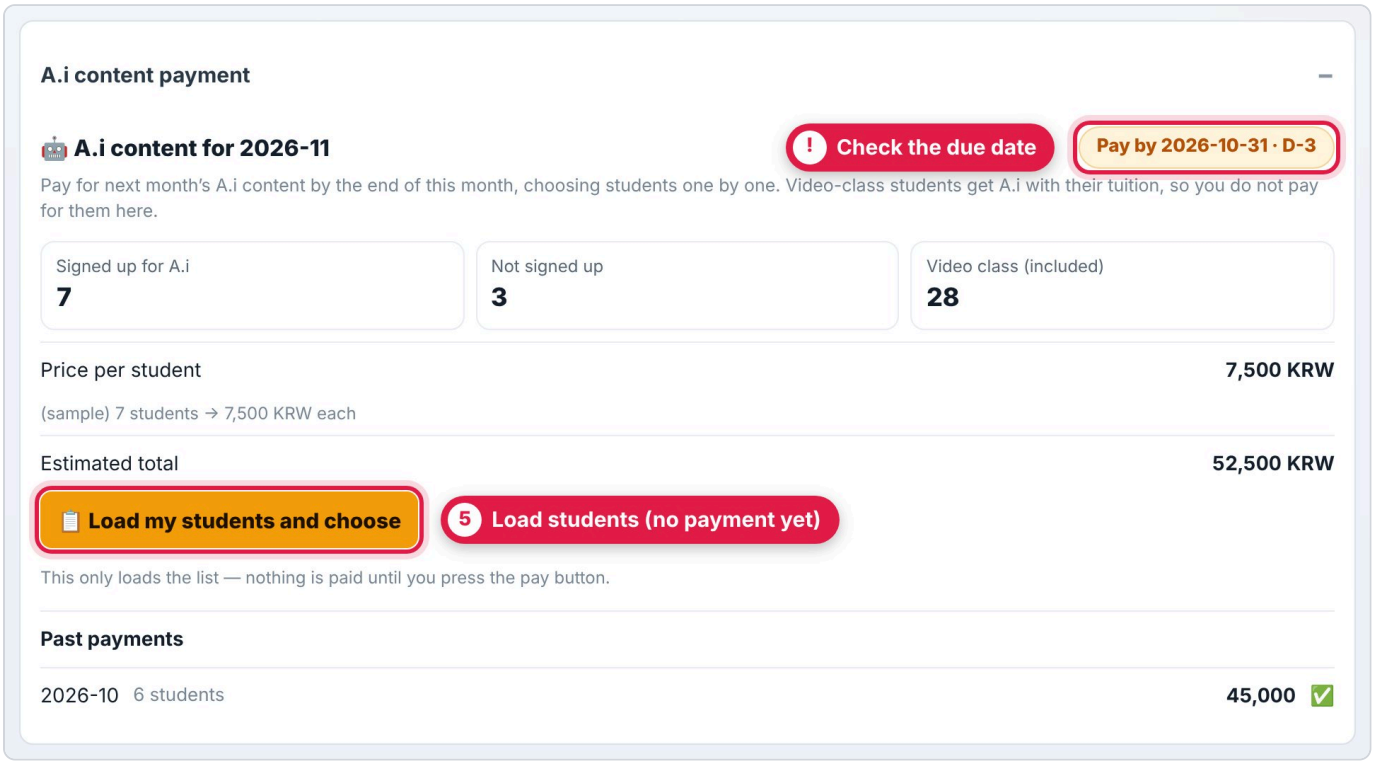

10-1 Agency login · open the menu

- An agency logs in at **mangoi.ai/admin/login** with its agency ID and gets the agency screen.
- ④ Left menu **Settlement & stats** › 🤖 **A.i content payment**. This menu appears **only for agency accounts** (not for HQ or branch accounts).
- HQ uses **Finance** › 🏢 **AI Usage Fee** (A.i Learning Fee Management) to see each academy's headcount and estimated invoice, set custom rates, and **turn auto-billing on or off**. There is no pay button there.

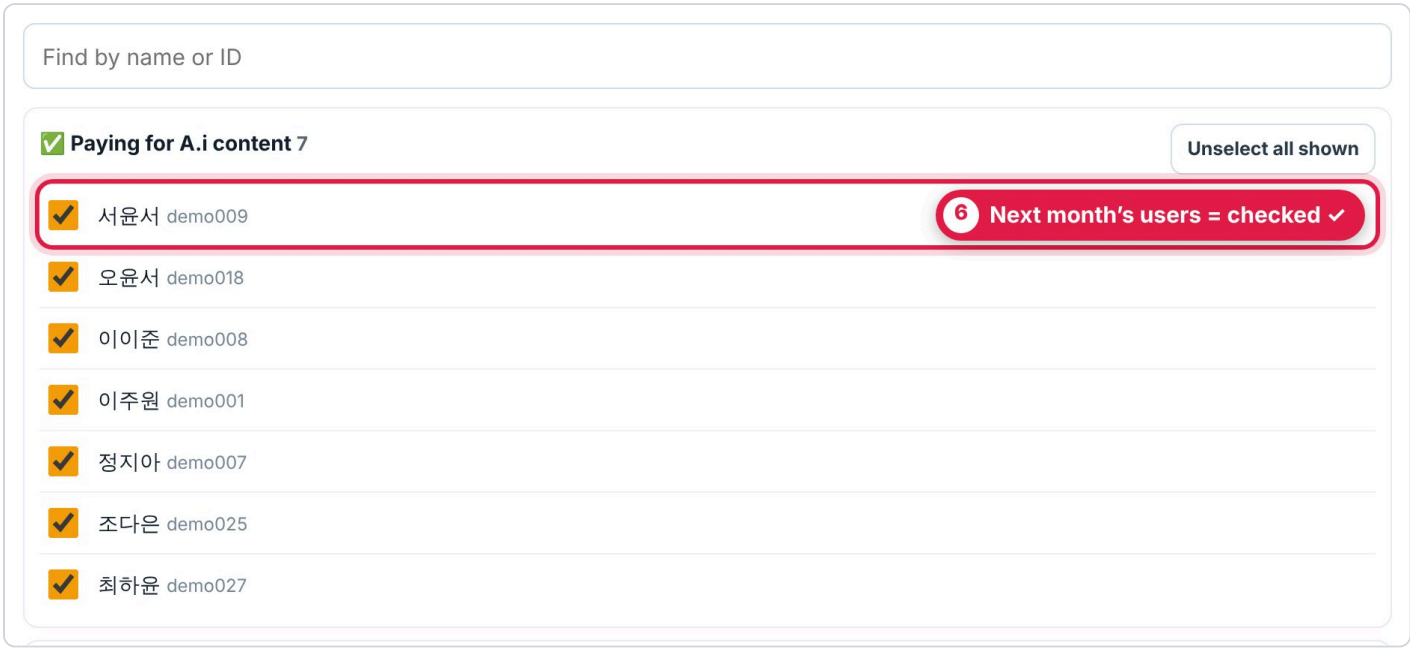

10-2 Load the student list

- Check the **due date** at the top (last day of this month · D-days left). The payment is for **next month**.
- Counters: **Signed up for A.i** (to be paid) · **Not signed up** · **Video class (included)** — video-class students get A.i with their tuition and are not paid here.
- ⑤ **Load my students and choose** only loads the list. Nothing is paid at this point.
- If HQ has not turned on auto-billing yet, the agency only sees «Head office has not opened A.i content payment yet (test period)» — it is not broken.

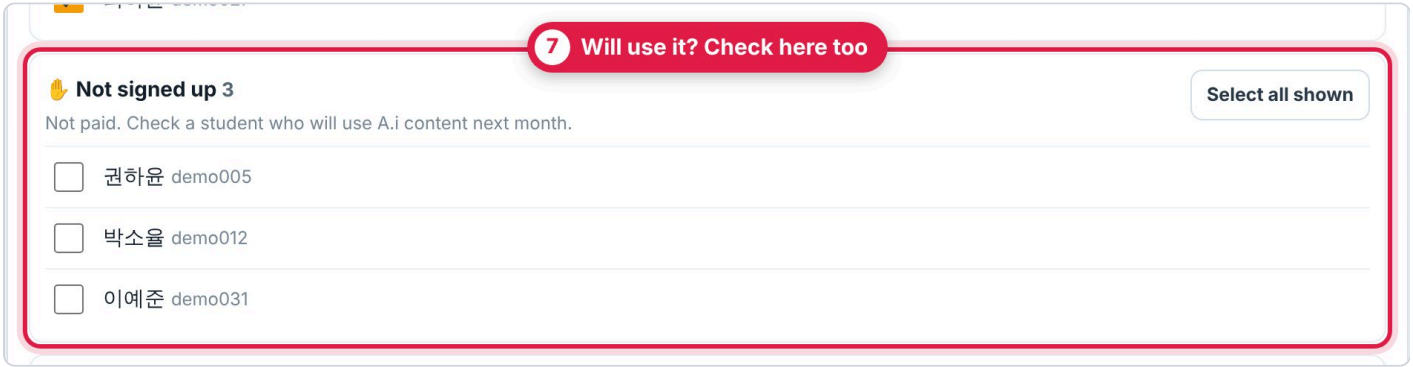

10-3 Choose next month's students

- ⑥ Only students checked under **Paying for A.i content** are paid. Unchecking a student who left removes them before payment.
- Search by name or ID; **Unselect all shown** / **Select all shown** changes many at once (it asks how many first).
- The server recalculates the amount every time a check changes.

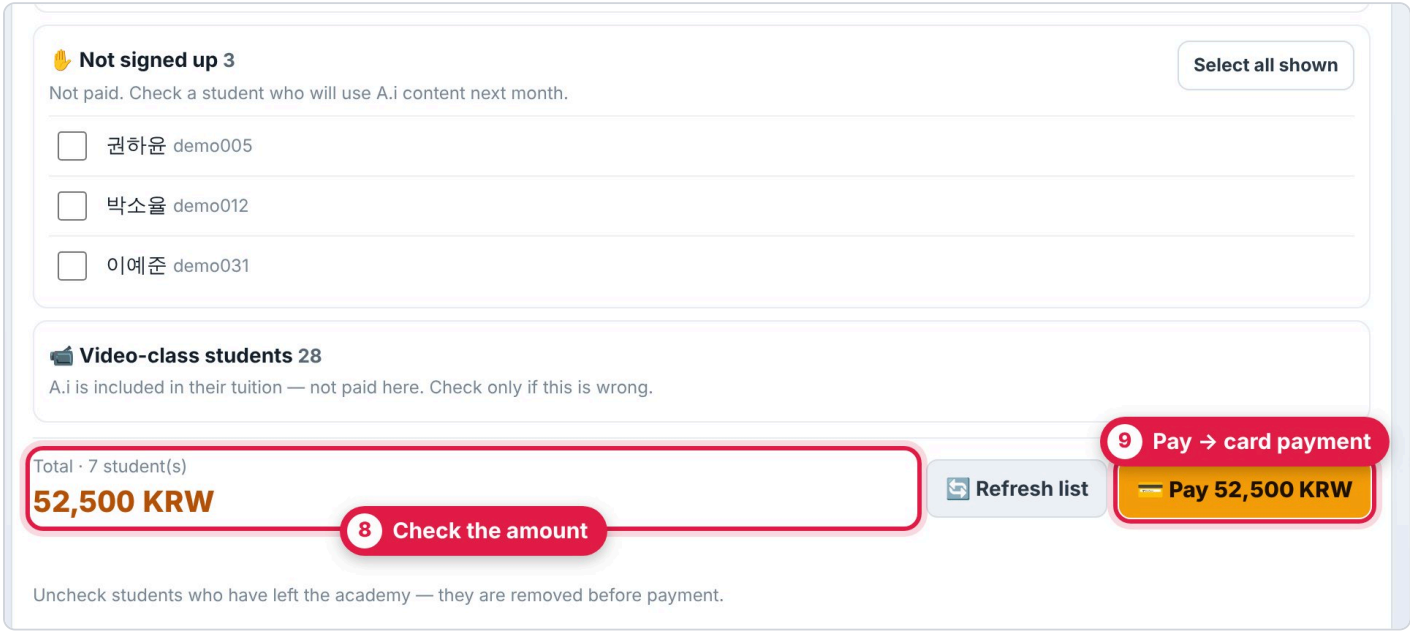

10-4 Not signed up · video-class students

- ⑦ Checking a student under **Not signed up** adds them to the payment.
- 📹 **Video-class students** are folded away. A.i is included in their tuition, so they are not chosen — check one only if the classification is wrong.
- Students the academy changed get a «✔️ confirmed by academy» tag, and automatic classification no longer changes them.

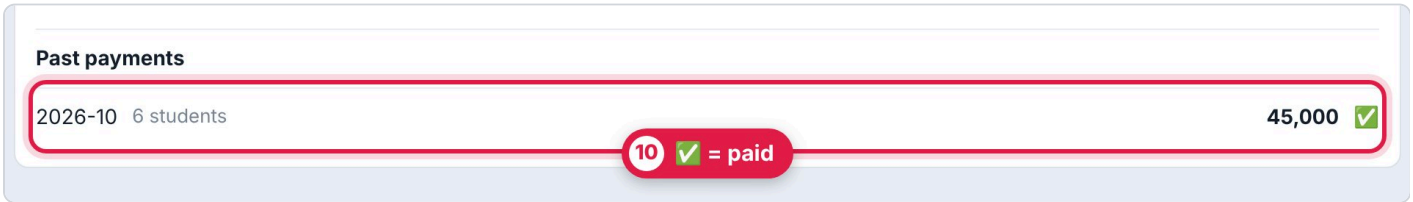

10-5 Check the amount · pay by card

- ⑧ Check the number of students and the total, then ⑨ **Pay OOO KRW** → confirm → pay in the Toss card window.
- Price per student per month: **20 or fewer 7,500 · 21–50 6,500 · 51–70 5,500 · 71 or more 4,500 KRW**. No minimum charge (since 2026-10-26).
- The total never goes down as students are added (e.g. 21–23 students = 150,000 KRW). The server recalculates the amount at the moment of payment — the screen number is for display. Academies with an HQ custom rate pay that rate × students.
- The demo account (testagency) does not open the payment window (sample data).

10-6 Check the payment · extra payment

- ⑩ A ✅ under **Past payments** means paid. After paying, «Paid» appears and paid students are pinned at the top.
- To add students in the same month, check them below and press **Pay extra** — only the added students are charged.
- Students already paid for cannot be removed or changed on the screen. HQ handles refunds.
- If an earlier month is unpaid, a «⚠️ Unpaid A.i content invoice(s)» button appears at the top.

? FAQ

Q. I booked a class but the teacher cannot see it
Check the booking's teacher and the KST time first. For a one-day class check the date too.

Q. What is the difference between Postpone and Change?
Postpone = move this one class. Change = from this class on, every time.

Q. I want to postpone a weekly class for just one week
Date chip → "this day only": only that day is separated and handled, other weeks stay.

Q. I do not see the Cancel button
Only HQ accounts can cancel. Teacher, branch and agency accounts do not get it.

Q. I cancelled the enrollment but weekly classes remain
Weekly repeat rows without dates are kept for payroll. Tidy them in Student › 📅 Schedule.

Q. Dragging in the timetable does nothing
It is 🔒 locked. Press it to edit (locks again after 3 minutes).

Q. How do postponed classes count in payroll?
By "Postponed class pay %" (default 100%) and "Early postpone pay %" (30+ min before, default 0%) in the deduction rules.

Q. Why can't I join a Cafe24 class?
Cafe24 classes do not use the Mangoi video room. Change their times in Cafe24 too.

Q. An agency says it has no «A.i content payment» menu
Check that they logged in with the agency ID. The menu appears only for agency accounts (not branch or HQ).

Q. An agency sees «Head office has not opened A.i content payment yet»
It is not broken. It shows until HQ presses «Turn ON» for auto-billing in Finance › 🏢 AI Usage Fee (test period).

Q. An agency wants to remove a student they already paid for
It cannot be done on the agency screen. HQ handles refunds.
