

ADMIN GUIDE

Mangoi · MANGOI

Admin User Guide

Everything about running your academy, in one book

 Admin User Guide

What is the Admin Page?

The admin page gathers everything you need to run an academy — students, teachers, payments, parents and content — on one screen. In particular, the AI Operations Assistant looks things up and even handles tasks when you tell it by voice or text, making operations much faster. Menus and data scope adjust automatically based on your role (permissions).

AI Ops Assistant

Tell it by voice/text; it finds and handles it.

Feature search · card menus

Type part of a name to jump right there.

Retention Center

Churn risk · contagion · settlement · coaching hub.

Org settlement

HQ → branch → agency auto-settlement.

Today's Key Metrics (example)

Revenue (10k KRW)		82
Enrolled		312
Attendance (%)		94

01

Admin Login & Permissions

Data scope by role, automatically

Logging in with an admin account shows only the menus and data that match your role (director, HQ, staff, etc.). Social login and password reset are supported.

- 1 Log in with **ID and password** (Kakao, Naver, Google also work).
- 2 Forgot your password? Reset via '**Find password**' (SMS/email/Kakao).
- 3 **Visible menus and data scope** change automatically by role.
- 4 New here? Preview with '**View demo account**'.

Key Points

- Permission settings let you split access per staff member.
- Turn on 'Save ID' only on your own trusted PC.

Tip On shared PCs, turn off auto-login and always log out when done.

After login, categories (Teachers, Accounting, Students, Content, System) are organized as cards. Just type a word in the top search box to jump straight to a feature.

- 1 From the category cards (Teachers·Accounting·Students·Content·System), tap the feature you want.
- 2 Type a word in the **feature search box** to jump right there.
- 3 The **number** beside each category is how many features it holds.
- 4 Use **Self-check · Color/Bright · EN** at the top to change screen and language.

✓ Key Points

- If you can't find a feature, search is fastest.
- You can also tell the AI assistant 'open ○○' to jump there.

💡 **Tip** Remember search terms for features you use often to cut clicks.

03

AI Operations Assistant

Tell it by voice/text; it acts

Speak or type into the search/mic and the AI looks up numbers or opens screens. Important actions are confirmed first, and it only does what your permissions allow — so it's safe.

- 1 Speak or type into the center **search/mic**. e.g. 'How's today's revenue?'
- 2 The AI **looks up numbers** or **opens a screen**. e.g. 'Open student management.'
- 3 Important actions are **confirmed with 'Shall I?'** **first**. e.g. 'Push Jung Woo-young's next lesson by 1 hour.'
- 4 The assistant only executes **tasks you have permission for**.

Key Points

- Can't find a button? Just say 'show me ○○'.
- Voice and text both work the same.

Tip When busy, telling it by voice is much faster than clicking.

Even without teaching, admins should know how students and teachers enter so you can answer questions and fix problems. Entry uses a name and a room code (or the shared room).

- 1 On the entry screen, enter a **name** and **room code**, then press **Enter**.
- 2 If the room code is empty, you go to the **shared lesson room**.
- 3 Advise that the browser's **camera/mic permission** is required.
- 4 For trouble, first advise **reconnecting in Chrome/Edge**.

✓ Key Points

- KakaoTalk's in-app browser blocks the camera — 'open in an external browser' is needed.
- Lessons needing room/token management can be checked from the admin screen.

⚠ **Good to know** Most 'can't enter' tickets are browser permission issues — check permissions and browser first.

💡 **Tip** Turn frequent entry questions into an FAQ to cut support load.

05

Understand the Classroom Layout

Screen structure for support

Admins don't teach, but knowing the classroom layout makes support easy. It has a top bar (room info, timer, REC, EN, dark), a center workspace (tab tools), and a bottom control dock (camera, screen share, chat, leave).

- 1 Top bar:** room name · user count · timer · recording (REC) · language (EN) · dark mode.
- 2 Center tabs:** Board · Video · Games · Background · AI Warm-up · Review Quiz + Materials Tools · Writing Tools.
- 3 Bottom dock:** Settings · Camera · Screen Share · Chat · Native · Leave.
- 4** The  **praise basket** at the top-left collects praise during class.

Key Points

- For 'no sound/video' tickets, tell users to check the dock's camera/mic and  Settings.
- The REC indicator shows whether a lesson is being recorded.

 **Tip** Turn common classroom questions into an FAQ with these screenshots.

06

 Understand the Classroom Tools

Board · materials · background · video

Knowing the tools students and teachers use makes guidance easier. The core ones are the board (draw/save), materials tools (upload PDF/photos, library), background (backdrop & face decorations), and video (YouTube/file).

- 1  **Board:** pen, shapes, text, AI shapes, save.
- 2  **Materials Tools:** upload (PDF/JPG/PNG), library, page turning, fit-to-screen.
- 3  **Background:** change backdrop, decorate face.
- 4  **Video:** share YouTube links / video files.

 Key Points

- The materials 'Library' shows textbooks the admin uploaded — it ties into content management.
- Coach teachers on the 'pre-upload materials → share in class' flow.

 **Tip** A well-stocked textbook library helps teachers prep faster.

07

★ In-class Praise Points (give & accrue)

Teacher gives → adds to student points

During class the teacher instantly gives praise points (+1P) to students, and a post-class star rating adds +10P. These sum into the student's total points and are spent in the point shop, roulette, etc. Admins manage the points policy and shop.

- 1 The **teacher** gives **+1P** instantly via the ★ praise button on a student's video.
- 2 It accrues in real time in the student's 🛒 point basket and sums into their total (P).
- 3 A **post-class star rating** gives the student an extra **+10P**.
- 4 Accrued points connect to rewards in the **point shop / roulette**.
- 5 Admins manage accrual/usage policy under **Accounting/Points**.

✅ Key Points

- Instant rewards help participation and re-enrollment.
- Shaping shop rewards lets you tune learning motivation.

⚠️ **Good to know** Praise points are given by the teacher; the points policy and shop are the admin's job.

💡 **Tip** Periodically check that points flow well (given & spent) to manage motivation.

Manage the teacher list, profiles, payroll, matching and reviews in one place. Gather star ratings students leave, by teacher, to use in coaching.

- 1 In **Teachers**, check the teacher list, profiles and matching.
- 2 Manage **payroll**, **MBTI/style** and student↔teacher **matching**.
- 3 Gather each teacher's **lesson reviews (stars)**.

✓ Key Points

- Better matching raises re-enrollment.
- Link low-rated teachers to the coaching tab.

💡 **Tip** Assign top teachers to popular slots first to boost satisfaction.

09

Accounting · Points

Payments · overdue · points · gifts

Manage payments, overdue balances and refunds, plus point/gift accrual and use. Amounts are auto-calculated by policy to reduce mistakes.

- 1 In **Accounting/Points**, process payments, overdue balances and refunds.
- 2 Check **point/gift** accrual and usage history.
- 3 Notify overdue items via **alert-talk/SMS**.

Key Points

- Manage recurring payments and overdue on one screen.
- Points drive learning motivation.

Tip Automating overdue alerts raises collection rates.

The 🌟 praise points a student gets during class and the star rating (+10P) all accrue to the student's total points, leading to point-shop, roulette and gift rewards. Admins manage this accrual/usage flow and the reward line-up.

- 1 **Check accrual paths:** points build from in-class teacher praise (+1P), end-of-class rating (+10P), game learning, etc.
- 2 In **Accounting/Points**, check each student's **accrual/usage history**.
- 3 Manage the **point-shop / roulette rewards** and **gift** line-up.
- 4 If abnormal accrual/errors are suspected, look up the history and adjust.

✓ Key Points

- Instant rewards (praise points) boost participation and re-enrollment.
- Shaping rewards lets you tune motivation and cost together.
- Points are summed into the student's top-bar P and My Page.

⚠ **Good to know** Teachers give praise points; admins configure the shop/reward/gift policy.

💡 **Tip** Setting stock/limits on popular rewards keeps costs stable.

11

Refund Policy & Processing

Auto-calculated by the table

Amounts are auto-calculated per the refund table (100% before the lesson starts, tiered by progress). Discounted payments are recalculated at the list price.

- 1 Check the refund request timing and **calculate by the table**.
- 2 For **discounted payments**, apply the list-price recalculation rule.
- 3 Check the **absence rule** for lessons missed without postponing.

Key Points

- The table reduces disputes.
- Explain the policy to parents before processing.

Good to know For discounted lessons, already-taken lessons are deducted at list price, then the balance is refunded.

Tip Explaining refund/postpone policies at signup greatly reduces conflict.

The screenshot displays the 'Refund Policy & Processing' section in the Mangoi Admin interface. It includes a table for refund rates and two sections for calculation rules.

환불 요구 시기	환불 금액(%)	예시 수업을 100,000원 지불
수업 시작 전	남부금액의 100%	100,000원 환불
총 수업시간의 1/3 미만	남부금액의 70%	70,000원 환불
총 수업시간의 1/3 이상	남부금액의 50%	50,000원 환불
총 수업시간의 1/2 이상	남부금액의 30%	환불 안 됨

2. 환불 전 꼭 확인해주세요

★ 할인받은 수업의 환불 계산
 할인: '정원생 수업 20% 할인'을 받은 학생은 '정원생 수업'의 20% 할인된 금액(20,000원)을 기준으로 환불을 받습니다. (예: 정액 수업 100,000원 - 20% 할인 = 80,000원 기준)

■ 반기신청 없이 배운 수업은 '결제' 처리
 반기신청 없이 배운 수업은 '결제' 처리되어 환불 대상이 아닙니다. (예: 정액 수업 100,000원 - 20% 할인 = 80,000원 기준)

Manage the enrolled roster, attendance and grades. The student list is linked to real member data, and you can see each student's history at a glance.

- 1 In **Students/Parents**, check the enrolled roster.
- 2 View **attendance/reviews/points/chat history** by student.
- 3 Flag students who need counseling/management.

✓ Key Points

- The student list is linked to real members.
- At-risk students link to the Retention Center.

💡 **Tip** Counsel frequently-absent students quickly to prevent churn.

13

Parent My-Page

View learning with just a student ID

Parents can see attendance, reviews, payments and AI-recommended study on one screen just by entering their child's student ID. It reduces support questions and raises satisfaction.

- 1 Share the **my-page link** with parents.
- 2 The parent enters the **child's student ID** and looks it up.
- 3 They see 30-day attendance, points, payments, reviews and the monthly report.

✓ Key Points

- Easy access with just the student ID.
- The monthly report can be printed or saved as PDF.

⚠ **Good to know** Advise parents to manage the student ID like a password.

💡 **Tip** Explaining my-page at signup reduces questions.

A booking screen to assign lesson type, teacher, date and time. You can review and adjust students' booking status.

- 1 In **Booking**, assign lesson type, teacher and time.
- 2 Check empty slots and overlaps and adjust.
- 3 Once confirmed, students and teachers are notified.

✓ Key Points

- Spread popular slots to balance teacher load.
- Recurring bookings can be set.

💡 **Tip** Pre-register each teacher's available times to speed up assignment.

15

Postpone Management

Review & process requests

Review students' postpone/change requests and process them per policy. Last-minute requests outside policy link to the absence/deduction rule.

- 1 Check students' **postpone/change requests**.
- 2 If within policy (advance notice), **adjust the schedule**.
- 3 Changes are **auto-announced to both sides**.

Key Points

- Clearly announce the postpone cutoff.
- Guide out-of-policy requests per policy.

Tip Enforcing the postpone cutoff reduces no-show losses.

16

Content · Curriculum

Levels · textbooks · game reports

Manage the Levels 1–10 curriculum, textbook status and game learning reports (weak words). Improve content based on learning data.

- 1 Check the **Levels 1–10 curriculum** structure.
- 2 Review textbook upload status.
- 3 Find weak words in the **game learning report**.

Key Points

- Surface weak words more in games/reviews.
- Clear level goals raise achievement.

Tip Reviewing the curriculum at the start of the year makes it easy.

17

Retention Center

Churn risk · contagion · settlement · coaching

A hub to find students likely to quit early and to prevent chain churn spread through family, joint lessons and referrals. Manage four tabs in one place.

- 1 Find at-risk students with the **churn-risk graph**.
- 2 Prevent chain churn with the **churn contagion network**.
- 3 Deliver review-based feedback in the **teacher coaching** tab.
- 4 Intervene on at-risk students with **alert-talk/counseling**.

✓ Key Points

- Intervening early raises retention.
- Manage family/referral relationships together.

💡 **Tip** Just caring for the top at-risk students weekly noticeably cuts churn.

Revenue and commissions auto-settle down the org tree, and the monthly report shows branch/agency performance. AI insights summarize the state.

- 1 Revenue/commissions **auto-settle** down the **org tree**.
- 2 Check branch/agency performance with the **monthly report**.
- 3 Watch **today's revenue, enrollment and attendance** daily on the dashboard.

✓ Key Points

- Distributing the settlement report early builds partner trust.
- A 5-minute daily check of the metrics is recommended.

💡 **Tip** The sooner you catch warning signs (revenue drop, attendance dip), the easier to respond.

19

Support · FAQ Operations

Inquiries · refunds · postpone

Guide phone, email, Kakao and remote-support channels, and organize frequent questions into an FAQ to reduce inquiries.

- 1 In **Support**, guide channels and hours.
- 2 Share **refund/postpone policies** with students/parents.
- 3 Add repeat questions to the **FAQ**.

✓ Key Points

- Growing the FAQ cuts support load.
- Help directly with remote support for hard issues.

💡 **Tip** Turn repeat questions like 'can't enter' into an FAQ with screenshots.

20

Korea·Philippines Dual Clock

Two countries' time on screen

A clock on screen shows KR Korea and PH Philippines time together. It lets you check the time difference instantly when coordinating lessons between Philippine teachers and Korean students.

- 1 On the on-screen **dual clock**, see KR Korea and PH Philippines time at once.
- 2 **Drag** the clock to move it anywhere you like.
- 3 **Tap (click)** the clock to go to the home screen.

✓ Key Points

- The Philippines is **1 hour behind** Korea (−1 hour).
- You can check booking/entry times in both countries' time.

💡 **Tip** When a lesson time is confusing due to the time difference, this clock clears it up instantly.

21

cn Chinese Pronunciation Coach

Darakwon Chinese Master Lv1–20

Mangoi offers not only English but also a **Chinese course**. With a Darakwon Chinese Master (Lv 1–20) pronunciation coach (characters+pinyin, AI voice recognition, native comparison), you can attract and manage students who want Chinese.

- 1 In the AI voice coach, pick the **CN Chinese** level (or go to the Chinese pronunciation coach).
- 2 Choose a **Master series (1–6, HSK 1–6)** and a unit.
- 3 Read the sentence (**characters + pinyin**) and compare with 'Play native audio'.
- 4 Practice hard sounds/tones with **repeat and slow (0.85x)**.

Key Points

- Characters and pinyin appear together, so it's easy to read.
- The AI recognizes your voice and compares it to a native speaker.
- The learning games hub supports Chinese too.

Tip Listen slowly and repeat clearly to nail the four tones.

This **merges the old 'Poster Maker' and 'Popup Notice' tools into one place.** In the ①**Create** tab you design a notice/event poster, then hand it straight to the ②**Publish-Popup** tab to show it as a **popup** in your academy's student app.

- 1 Go to the admin menu **Notification Center** →  **Notice Studio**.
- 2 In the ①**Create** tab, design a poster with text, images, and video (resize · save on server · reuse).
- 3 Press ' **Publish as popup**' on the finished poster to auto-switch to the ②**Publish-Popup** tab.
- 4 In the publish tab, set the **display period / stop** and publish it as a student-app popup.

Key Points

- Poster creation and popup publishing flow through **one screen, two tabs** — no more confusion.
- Posters you make can be **saved and reused**.
- Whichever route you enter from — AI assistant or sidebar search — the **correct tab opens**.

⚠ Good to know Existing posters/popups are preserved (it was only merged, nothing was deleted).

 **Tip** Promoting an event takes just one flow: 'Create → Publish as popup' right away.

23

Command the AI Operations Assistant

Navigate with one phrase: "Take me to ○○"

Type what you want to do into the **top search bar (or the bottom-right AI assistant)** in plain language, and the AI understands and **jumps straight to that screen**. It now reliably follows navigation commands like **'Take me to teacher ○○'s schedule'** or **'Open auto-scheduling'**.

- 1 Type a command in the top **search bar** or speak with the mic.
- 2 e.g. **"Take me to teacher Kim Minji's schedule"** → auto-finds that teacher in the weekly schedule and opens it.
- 3 e.g. **"Open auto-scheduling," "Go to settlement"** to navigate menus.
- 4 Press **'Go now →'** on the AI response card to move to that screen.

✓ Key Points

- Navigation commands **actually navigate** — far fewer 'explain only, do nothing' replies.
- Searching a schedule by teacher name **auto-fills the search box + filters + scrolls**.
- For data/statistics questions it also helps with **card-style answers**.

⚠ **Good to know** Commands that actually change things — 'register · send · modify' — ask for one more confirmation (a safety guard).

💡 **Tip** When you can't recall a menu name, just say what you want to do — it finds its way there.

View the **AI voice diaries** students leave, right from the admin screen. Per student, check the **transcript** · **AI correction** · **encouragement** · **score** by month to encourage consistent writers and gauge their learning.

- 1 Open the **Voice Diary (monitor)** card in the admin menu.
- 2 Enter the **student UID**, **pick the month** to look up, and press '**Search**'.
- 3 Open an entry from the list to see the **transcript** · **correction** · **encouragement** · **score**.

✓ Key Points

- It only shows up **once a student actually writes** a diary (the entry point is the card on the student home).
- Find consistent writers and connect them to **praise/rewards** to lock in the habit.

Tip 'Nothing shows up' usually just means that student hasn't left a diary yet.

25

🤖 Teacher AI-Coaching Review (Ops)

Collected per-class AI coaching · quality scores

After every class, the AI leaves the teacher a **coaching card** (strengths · areas to improve · a class-quality score). From the admin screen you can see these **gathered by most-recent**. Use it as a **growth-support / coaching-quality** tool — not surveillance.

- 1 Go to admin 📁 **Retention Center** → 📁 **Teacher Coaching** tab.
- 2 In the '🤖 **Per-class AI coaching (recent)**' section, review each teacher's latest coaching.
- 3 Use each card's **quality score** · **talk ratio** · **improvement point** to plan coaching and training.

✅ Key Points

- See every teacher's recent coaching **at a glance**.
- Admins get a **monthly rollup** focus, so it's low-pressure.

⚠️ **Good to know** Coaching text is for a teacher's personal growth. We recommend using it as a **support tool**, not for evaluation/discipline.

💡 **Tip** For teachers whose quality score stays low, coach them together with the teacher training manual.

Post an **attendance QR code** at the entrance, and the moment a student scans it with their phone, **attendance is recorded automatically**. The admin dashboard shows **today's attendance in real time** — no more paper rosters.

- 1 Open the **QR Attendance** card in the admin menu and generate **your academy's QR code**.
- 2 Print the QR and post it at the **entrance or front desk**.
- 3 Students scan with their phone camera and check in on the **check-in screen**.
- 4 Watch today's arrivals and times live on the dashboard's **attendance view**.

 Key Points

- Arrival times are recorded automatically — **fast and accurate**.
- Attendance data flows into student management and reports.

 **Good to know** The QR code is unique to your academy. Keep it from being shared outside.

 **Tip** Stand a tablet at the desk during arrival hours so students can scan without queuing.

27

📞 Consultation Booking Management

From new inquiries to scheduled consults

Take **consultation bookings** from parents and prospects and **manage them on one screen**. Track each booking's **schedule and status (pending/done)** and carry the consult onward toward enrollment.

- 1 Open the **Consultation Booking** card in the admin menu.
- 2 Register a **new booking** (name, contact, preferred time) or review incoming ones.
- 3 After the consult, set the **status to done** and leave a note.
- 4 Carry it forward: consult → **level test** → **enrollment**.

✅ Key Points

- Bookings live in one place, so **no consult slips through**.
- Consult history makes **repeat inquiries easy** to handle.

💡 **Tip** A quick follow-up call the day after a consult noticeably lifts enrollment conversion.

See the **referral status** of enrolled students bringing friends, and **process reward payouts**. Who referred whom, and whether the reward was paid — all on one screen, turning word-of-mouth into a system.

- 1 Open the **Referral Rewards** card in the admin menu.
- 2 Review the list of **referrer · referred friend · enrollment status**.
- 3 For qualifying cases, process the **reward payout** (points, gift vouchers, etc.).

Key Points

- Referral history is kept as data — **transparent, no disputes**.
- Linking rewards to student points and the shop multiplies the effect.

Tip Pair it with a 'refer a friend' event before each semester and watch inquiries jump.

29

Approving Postpone/Change Requests

Review and approve teacher-submitted requests

Class postpone and time-change requests submitted by teachers gather on the admin screen in real time. Check the reason and **approve or decline** — the schedule updates immediately, replacing phone-and-messenger juggling with one screen.

- 1 Open the **Class Postpone/Change Requests** card in the admin menu.
- 2 Review each pending request's **teacher · class · reason**.
- 3 Press **Approve** or **Decline** — the result flows to the schedule and the teacher.

✓ Key Points

- Request and decision history is kept, so everything stays **transparent**.
- For changes parents should know about, follow approval with a notification.

💡 **Tip** Clearing pending requests every morning prevents same-day confusion.

Every guide and video in the library now has a 'Copy KakaoTalk link' button. Attaching a file to KakaoTalk crushes the quality, but sending a link plays the original as-is. One tap copies the link — guiding parents and teachers gets much easier.

- 1 In the admin **Library**, press **Copy KakaoTalk link** next to the file.
- 2 **Paste** it into the KakaoTalk chat room.
- 3 Recipients tap the link to watch or download in **original quality**.

✓ Key Points

- For videos, **link sharing = original quality**; file attachments degrade it.
- Works the same for PDFs, PPTs, and videos anywhere in the library.

⚠ **Good to know** Anyone with the link can open it. For internal-only material, check who you share with.

💡 **Tip** In a parents' group chat, one video-guide link does all the explaining.

31

Enrolment & payment → automatic lesson creation

Once payment is confirmed, every session is scheduled

On the **Enrolment screen** a student picks teacher, days and time and pays — and **all lesson sessions are created automatically the moment payment is confirmed**. The old manual timetable entry after payment is gone. If the slot **clashes with an existing lesson, the conflict is detected before payment**.

- 1 Send students and parents the **enrolment link**.
- 2 They choose **teacher → lesson options (weekly count, term, length) → days & time**.
- 3 The **slot check must pass** before the pay button unlocks (payment is blocked on a clash).
- 4 On confirmed payment, **all sessions are created at once** — verify in the admin lesson list.
- 5 Head-office prices and discount rates are managed on the **pricing screen**.

Key Points

- **Idempotent** — a duplicated payment callback will not create the sessions twice.
- Clashes with holidays or existing lessons are **pushed back** so the session count is still met.
- Term discounts (6 months -5%, 12 months -10%) are applied to the amount automatically.

 **Good to know Stage 1 (enrol → pay → auto-create sessions)** is live today. Later stages will follow.

 **Tip** Consultation → level test → send the enrolment link is the smoothest conversion path.

You can **sit in on a live lesson without the student or teacher knowing**. No join notification is sent, so the lesson isn't disturbed — use it for **mentoring new teachers, quality checks and parent complaints**. Every observation is **permanently written to the audit log**.

- 1 Open the **Class Observation (Live)** card in the admin menu.
- 2 Enter your **admin UID** and the **room ID**.
- 3 Write an **observation reason** — this is required (e.g. new-teacher mentoring).
- 4 Press **Start observing**; press **Stop observing** when done.
- 5 Past sessions are listed under **Observation log**.

Key Points

- While observing, **your audio and video are not transmitted**.
- **A reason is mandatory** — this is student privacy policy.
- Who observed, when and why is **fully recorded**.

Good to know This touches student privacy directly. Use it **only when there is a business need**, and write a specific reason.

Tip Observe new teachers once a week for their first two weeks, then coach — quality stabilises quickly.

33

**A refreshed admin screen**

Collapsible sidebar · lighter background · line icons

The admin screen is now **easier on the eyes and wider**. The left menu collapses to a **narrow icon rail** via the < **Collapse** button, and the background is now a **consistent light tone**. Menu icons were redrawn as **line icons** so labels read clearly.

- 1 Press < **Collapse** at the top of the left menu — it shrinks to an icon rail and **the content gets wider**.
- 2 Press the > button in the same place to expand it again.
- 3 The collapsed state is **remembered for your next visit**.
- 4 Too many menus to find one? Type its name into **menu search** at the top.

**Key Points**

- Screens full of tables and lists gain **a lot of horizontal space**.
- 15 sub-pages were moved onto the **same light theme**, so the colour jump between screens is gone.
- The collapse animation was **removed** so low-spec PCs don't stutter.

Tip Wide-table screens like settlement and payroll are far easier to read with the menu collapsed.

Filipino teachers and overseas staff now **start in English from the first screen**. The interface language is decided from the account's **nationality**, and teacher accounts are **always English** regardless of name or previous choice. You can still switch any time with the  **EN / KR** button at the top.

- 1 If the account has a **nationality** on file, the right language appears automatically at login.
- 2 To change it manually, press the  **EN / KR** button at the top.
- 3 A manual choice is stored **per account** — several people can share one PC without interference.
- 4 Teacher guide slides and manuals **switch to the English editions** with it.

✓ Key Points

- **Teacher accounts are always English** — no more getting lost in a Korean screen.
- Accounts with an English name no longer flip to Korean because of a Korean job title.
- Language choice is **isolated per account**, so an overseas account isn't overwritten by someone else's pick.

 **Good to know** Accounts with no nationality fall back to the old name/ID heuristic. Please fill in nationality when registering teachers.

 **Tip** Enter nationality when registering a new teacher and their very first login is in English — fewer support requests.

35

Running Judgment Training (student judgment index)

Not memorisation but judgment — a new outcome metric

In **Judgment Training**, a student picks the expression that fits a situation and explains why. Results accumulate into a **judgment index** across 5 axes — evidence you can show in parent consultations that answers “**how well do they judge for themselves**”, not just “what did they memorise”.

- 1 The feature lives at **AI Learning Tools** → **Judgment Training** on the student screen.
- 2 Per-student results appear on the **My Growth** screen and in learning reports.
- 3 Show the **index trend chart** as supporting evidence during consultations.

Key Points

- **Recent answers are weighted more** (half-life weighting), so current ability shows up fast.
- **Partial credit** means one wrong answer doesn't crash the index.
- Questions combine **24 topics × 12 angles**, so students get different questions.

⚠ **Good to know** Read the judgment index as a **growth trend**, not an exam score. The direction matters more than the absolute number.

💡 **Tip** This is the best material to answer the classic parent question: “They know the words but can't speak.”

Teacher Management, redesigned (roster filters · groups · detail tabs)

Easy-to-search roster · detail at a glance

The teacher-management screen is now **easier to search and read**. Scattered menus are **grouped into four bundles** in the sidebar, and above the roster there are **status/group dropdown filters** with **applied-filter chips**. Tapping a teacher opens a detail view split into **Profile / Payroll / Evaluation tabs**, with a **manager badge** and **employment status (active / on-leave / left)** shown at a glance.

- 1 Open **Teachers** in the admin menu (menus are tidied into four bundles).
- 2 Filter to just the teachers you want with the **status/group dropdowns** above the roster.
- 3 Applied filters show as **chips**; remove a chip to clear it.
- 4 Tap a teacher to open the **Profile / Payroll / Evaluation** detail tabs.
- 5 The **summary numbers on the payroll/evaluation tabs** load only as needed when opened.

✓ Key Points

- **Managers** are marked with a badge, and status shows as **active / on-leave / left (3 states)**.
- A blank name **falls back to the ID**, so there are no empty cells.
- Detail tabs **reuse existing APIs** for speed, and the screen is bilingual (KO/EN).
- The duplicate payroll entry was tidied and **bug reports moved to a separate system**.

⚠ **Good to know** This is a filtering/detail cleanup. Registering, editing and deleting teachers works exactly as before.

💡 **Tip** The more teachers you have, the more the status/group filters help. Keep your usual conditions filtered.

Preview the 5-axis report, then share the link

The **monthly report** sent to parents is renewed as a **pentagon 5-axis graph** — **Pronunciation & Fluency / Vocabulary / Sentence Building / Class Attitude / Participation** — at a glance, with attendance, judgment and a teacher's note. Admins and teachers enter a student ID and month to **preview**, then send the **KakaoTalk link**.

- 1 Open the **Monthly Report** screen.
- 2 Enter a **student ID** and **month**, press **View Report** to preview.
- 3 Check the pentagon and teacher's note; top up evaluations if needed.
- 4 Append **?uid=ID&period=YYYY-MM** to the URL and send the **KakaoTalk link**.

Key Points

- **Only axes with real records** are filled, so it's trustworthy.
- Compiled on a **two-month cycle** — conveys change without tiring parents.
- The Print/PDF button makes a paper report for consultations instantly.

 **Good to know** Report access passes an **approval gate** — admins via their login session, parents only via the issued link (token).

 **Tip** Sending the report link ahead of a booked consultation makes the meeting much smoother.

39 Admin Feature Categories

Category	Key features	Count (ex.)	Core benefit
Teachers	Payroll·matching·reviews·MBTI	11	Efficient teacher mgmt

40 ? Frequently Asked Questions (FAQ)**Q. Where do I log in?**

A. Log in at admin.mangoi.co.kr. Phone, tablet and PC all connect right from the web.

Q. I can't see a feature.

A. Menus vary by role. Use the top feature search or ask the AI assistant by name.

Q. A student can't enter a lesson.

A. Usually a browser permission issue. Advise reconnecting in Chrome/Edge and allowing camera/mic. Inside KakaoTalk, open in an external browser.

Q. Does the AI assistant execute tasks?

A. Look-ups happen instantly; important actions are confirmed with 'Shall I?' It only does what you have permission for.

Q. Refund math is confusing.

A. It's auto-calculated by the refund table; discounted payments are recalculated at list price.

Q. I'm worried about churn.

A. Find at-risk students early with the Retention Center's churn-risk/contagion network and intervene via alert-talk/counseling.

✓ Daily Operations Checklist

☐ Did you check today's revenue, enrollment and attendance?

☐ Did you handle new counseling/inquiries?

☐ Did you check overdue and refund items?

☐ Did you check the live (LIVE) lesson status?

☐ Did you care for students whose churn risk rose?

☐ Did you reflect teacher reviews/coaching feedback?

☐ Did you add repeat questions to the FAQ?

41 · Conclusion

Conclusion · A Practical Guide to Stable Academy Operations

You've now reviewed every feature of the admin page. Finally, here's one page on how a day of operations flows and the principles to keep for stable running. Keep just this rhythm and operations get much lighter.

The Flow at a Glance

Morning (5 min)

Check today's revenue, enrollment and attendance on the dashboard; read the AI insight summary

Late morning

Handle new counseling/inquiries; check overdue/refund items and send alert-talk

Class hours

Monitor live (LIVE) lessons; for 'can't enter' tickets, guide browser/permission first

Afternoon

Care for at-risk students in the  Retention Center; reflect teacher reviews/coaching

Weekly · Monthly

Distribute org settlement/monthly reports, check points/rewards (shop/gifts), improve the FAQ

★ Key Principles

- 1 **Metrics, 5 minutes each morning** — catching revenue/attendance signals early makes response easy.
- 2 **Intervene on churn early** — the sooner you care for at-risk students, the higher retention.
- 3 **Announce policies upfront** — sharing refund/postpone policies at signup greatly cuts disputes.
- 4 **Turn repeats into FAQ** — make frequent questions into an FAQ with screenshots.
- 5 **Decide with data** — judge and improve by metrics/graphs, not gut feeling.

Remember

- Log in at **admin.mangoi.co.kr**; menus and data scope change by **role (permissions)**
- The **AI assistant** looks up instantly, confirms important actions, and only does **what you're permitted**
- Most 'can't enter class' tickets are **browser and camera/mic permission** issues
- **Praise points** → **student total** → **shop/gifts**; the policy and rewards are the admin's job

Good operations come not from fancy features but from 'small daily checks.' Watch your metrics, prevent churn early, and announce policies clearly. The AI Operations Assistant and Retention Center help you do it. Questions? Contact support anytime — cheering on your steadily growing academy! 🍊

Let's grow together with Mangoi!
