

Textbook Upload Request

So the AI Warm-up can ask students about **today's actual lesson** — not random daily topics.

Why we need this

Before each class, students now chat with an AI friend for a few minutes. We just added “**Today's textbook**” — the student picks their book and the AI asks questions about that book's topic.

The catch: **the AI only knows what your folder names say**. For BTS it can read the topic. For SIU it knows nothing at all. And no book has any sentences from its pages.

What we have today

GROUP	FILES	LEVEL	TOPIC	UNIT	TEXT
BTS — named books	7,568	yes	yes	no	no
BTS — “BTS Books”	5,215	yes	no	no	no
SIU — “SIU BOOKS”	734	no	no	no	no

Read from the Mangoi database on 2026-09-14 (active files only). Every SIU file is named [SIU BOOKS] / Page N.jpg — and the same Page 12.jpg appears from several different books.

A Re-upload SIU, organized by book and lesson

MOST URGENT

SIU/ ← top folder

SIU 1 (Greetings and Introductions)/

Lesson 1/

p01.jpg

p02.jpg

Lesson 2/

p01.jpg

SIU 2 (Family and Friends)/

Lesson 1/

p01.jpg

- ✓ Put the **topic inside parentheses**. This exact text is what the AI reads.
- ✓ Topics in English — 1–4 short phrases, separated by commas.
- ✓ Upload the **top folder** (SIU/), not individual files.
- ✗ Never name a **book** folder just 001 or Lesson 1 — that name becomes the book name and different books get merged into one.
- ✗ Don't upload flat again. That is what produced the 734 unusable files.
- ! **Don't guess a topic**. Write SIU 4 with no parentheses. A wrong topic is worse than none — the AI would ask about the wrong thing for the whole warm-up.

B Send us the topics of BTS 10 and BTS 11

We already have the topic for **32 of 34** BTS books, read from their file names. These two went in under the unnamed BTS Books group (337 images), so we cannot read them.

Just reply with two lines, in the same style as the others (e.g. BTS 12 — Jobs, Going to work):

BTS 10 —

BTS 11 —

C Send 5–10 key sentences per book

MOST VALUABLE

Right now the AI only knows the *topic*, so it invents its own sentences. With the **real sentences from the book**, it can have the student say them out loud before class — then change them into their own story. One spreadsheet, one row per sentence:

BOOK	LESSON	SENTENCE	KOREAN_MEANING
BTS 3	1	This is my family.	optional
BTS 3	4	How old are you?	optional
BTS 13	2	I visited my grandparents.	optional
SIU 1	1	Nice to meet you.	optional

- ✓ Copy sentences **exactly as printed**. Do not simplify or rewrite them.
- ✓ Pick sentences the student is expected to **say** — target sentences and key questions. Skip instructions like “Listen and repeat”.
- ✓ Korean meaning is optional. Leave it empty if unsure — we will fill it in.
- ✗ Don't mix two books in one row, or put several sentences in one cell.
- ! **You do not need all 34 books**. Start with the books used most — even **5 books** is enough for us to switch this on and show you a sample conversation.
