

Maimai's August Checklist

Hi Maimai! Thank you for all your reports. You found real problems, and your numbers were correct. Here is what we did, what we could not do, and what we need from you.

August 14, 2026 · from your reports of August 7–14 · 34 items

✓ **Everything below is already live. Please refresh your page first.**

Press **Ctrl + Shift + R** (hold Ctrl and Shift, then press R) one time. This makes your computer throw away the old screen and get the new one. If you do not do this, you may still see the old page.

1. Please help us with these 7 things

This is the most important part. We cannot finish without your answers. You can just reply **Yes** or **No** to each one.

☐ **Are the books the right size now?**

Open **BTS 1 001** in the library. It should show **23 pages**, not 115. Please check one or two other books too.

→ **Please tell us: Yes / No**

☐ **Does the page list show the page names now?**

Open a book, click  **Pages**. Before, every line looked the same (“1. [BTS 6 Korea (Bedroom, li...)”). Now each line should show the **real page name** (like “Slide12.JPG”), the same idea as BODA.

→ **Please tell us: Is it easy to read now?**

☐ **Please press the  button and look around.**

We found **23 places** that stayed in Korean even after you pressed 🌐. We fixed all of them. Only teachers in the Philippines could see this problem, so we need your eyes.

→ **Please tell us if you still see any Korean word.**

☐ **Are the 5 folders gone from Server Textbook?**

(Others) · 004. I visited my grandparents · 007. Commercials · Mangoi Books · Shake it up 2-18-25. They are **hidden, not deleted**. We can bring any of them back in one second.

→ **If you need one of them back, just tell us the name.**

☐ **Please send us the Google Drive links for Phonics and BTS 2-34.**

We must **upload them one more time** so they split into small books (“Mangoi Phonics A”, “Mangoi Phonics B”... and “BTS 2 001”, “BTS 2 002”...). The head office will do the uploading — we only need the links.

Don’t worry: the system now blocks the same file twice, so the pages will not double again.

→ **Please send the folder links.**

☐ **Please tell the teachers about the postpone rule.**

If a class is postponed **more than 30 minutes before** the class, the pay is **0 PHP**. If it is postponed **within 30 minutes**, the pay is **full (50 PHP)**. This starts with **this month’s salary**.

→ **Please tell the teachers before payday.**

☐ **Please use the computers for one more week before we buy RAM.**

You said the system is slow. We found the real reason: the books had **2 to 3 times too many pages**. We removed them. The books are much smaller now, so the computers may be fine.

→ **After one week, please tell us: still slow? Then we buy the RAM.**

2. Done — please check these

34 requests · 30 finished · 4 need one more step

Here are the newest ones. The older ones (August 7-12) are already working on your screen.

✓ **The books had too many pages. Fixed.**

"THE BOOK IS NOT SLOW ONLY THAT THE PAGES AT THE LIBRARY TRIPLED OR DOUBLED"

You were **right**, and our first answer was **wrong**. We thought the books were slow. The real problem was that the **same page was saved many times**.

What we counted	Before	Now	Times
All textbook files	38,922	17,170	2.3×
BTS 1 001 (the book you found)	115	23	5.0×
BTS 2	762	246	3.1×

✓ **The same file cannot be uploaded twice any more.**

Before, if someone uploaded a book two times, the book became two times bigger. Now the system **skips** the file it already has, and says “**New: 20 · Already there, skipped: 5**”. Nothing is lost — nothing is doubled.

✓ **The page list now shows page names.**

Before, every line showed the long book name and the page number was cut off. Now the line shows the page name, and the number stays (1. 2. 3.). Put your mouse on a line to see the full name.

✓ **The page window stays open, and you can make it bigger.**

It closes only with the × button. Pull the bottom-right corner to make it bigger. The system **remembers your size** for next time.

✓ **The button now works everywhere (23 places).**

The class page had **two language helpers** inside, and 23 places were listening to the wrong one. That one never changed to English. Now they all listen to the same one.

The book card said “0 and · 781”. Fixed.

✓ That was a translation mistake. Now it says “**7 units · 246 pages**”.

✓ **MES is hidden — and we found a second copy of it.**

LEVEL 1 to LEVEL 7 were hidden yesterday. Today we found that “**Mangoi Books**” was the **same MES pages with a different name** — all 797 pages matched, one by one. That is why you crossed it out. It is hidden now too.

Nothing is deleted. Old class records still work.

✓ **Phonics A-Z: the rule is fixed (but see part 3).**

The uploader only understood folders with **numbers** (001, 002). Your folders use **letters** (Mangoi Phonics A, B, C...), so it put all 26 folders into one book. Now it understands letters too.

3. Not done yet — and why 2 things

We want to be honest with you. These two are only **half done**.

! **Old books are still in one big piece.**

You asked: “please separate the book per unit — BTS 1 001, BTS 1 002 and so on.” **New uploads will do this.** But books that are **already inside** cannot be split, because the computer **did not save which unit each page came from**. That information is gone.

37 books · 15,580 pages are like this today. The only way is to **upload them again** from your Drive folders. That is why we asked you for the links.

! **The BTS placement test is not in the library yet.**

The teachers were not doing it wrong. The screen said “ Saved!” but the file **only went to their own computer**. The screen was not telling the truth. **That lie is fixed** — now it says “ Saved on this computer only”.

The head office will upload the real file, so all teachers can see it.

4. Things a person must do not the computer

**Upload Phonics and BTS 2-34 one more time.**

Head office. Just drag the Drive folders into the uploader. Then the books split by themselves.

**Upload the BTS placement test.**

Head office. We do **not** give teachers permission to upload to the shared library — all teachers share it, so one mistake would hurt everybody.

**Tell the teachers about the postpone rule.**

Manager (you). It changes their pay this month.

**Decide about the RAM after one week.**

Owner. Please try the lighter books first.

Thank you, Maimai. Your report from August 14 changed our whole plan. We thought the books were slow. You told us the pages were doubled — and you were right. Because of you we found and removed **21,752 extra pages**, and we also found a second hidden copy of MES.

If anything on this list is still not working, please write the **number** (for example “1-2 is still bad”) and send a picture. That helps us very much.
