

# Lesson Pay Rules — Full Text

All the rules, written in plain English

July 2026

## Whoever has the problem covers that one lesson

Your problem, your lesson. Our problem, our lesson. And only that lesson.

### Base The five ideas behind all of this

**One.** Whether it is a technical problem or a personal one, **the side where it happened covers that lesson's fee.**

**Two.** But **only that one lesson.** You never lose the lessons before or after it.

**Three.** Office work carries **a separate allowance for your time on site.** So even when the fault is ours, **we pay for the lesson that was interrupted — not for lessons that never happened.**

**Four.** If a power cut hits both sides, an office outage is our building's problem, so **that lesson is paid in full. Lessons after the power returns are paid normally.**

**Five.** **A lesson fee is payment for one lesson.** It is never counted by day, by hour, or by period.

**What if something is not written here?** Ask two questions: **whose side was the problem on?** and **is it just that one lesson?** That answers almost everything.

### Table Every situation at a glance

| What happened?                                       | That lesson's pay           | What you do                                    | Rule     |
|------------------------------------------------------|-----------------------------|------------------------------------------------|----------|
| The student never came, with no notice               | <b>Paid in full</b>         | Wait until the scheduled end                   | 2-1      |
| The student postponed 30+ minutes ahead              | <b>Paid on the new day</b>  | Nothing (it moves to another day)              | 2-3      |
| The student arrived late                             | <b>Paid in full</b>         | Teach whatever time is left                    | 3-1      |
| <b>You</b> joined late                               | <b>Paid in full</b>         | Add the lost minutes + <b>lateness penalty</b> | 4-1, 4-3 |
| <b>Your home</b> internet dropped (home)             | <b>Not paid</b>             | Later lessons are normal again                 | 5-2      |
| The <b>office</b> internet dropped (office)          | <b>That lesson, in full</b> | Tell the supervisor right away                 | 6-2      |
| Lessons that <b>never started</b> during that outage | <b>Not paid</b>             | Normal again after it is fixed                 | 6-3      |
| Our system would not let you in                      | <b>That lesson, in full</b> | Message your manager at once                   | 8-1      |
| Another teacher covered your lesson                  | <b>Not paid</b>             | That teacher is paid (it works both ways)      | 9-2, 9-3 |
| A power cut hit both of you (home)                   | <b>Not paid</b>             | Tell your manager                              | 5-4      |
| A power cut hit both of you (office)                 | <b>That lesson, in full</b> | Tell the supervisor                            | 6-5      |

**How the numbers work** The big numbers are **1, 2, 3...** The smaller ones inside them are **1-1, 1-2...** If something splits further it keeps going, like **10-3-1**.

## 1 The basic rule

everyone

**1-1** Whether it is a technical problem or a personal one, **the side where it happened covers that lesson's fee.**

**1-2** That covers **one lesson only**. Lessons before or after it are not affected at all.

**1-3** **A lesson fee is payment for one lesson.** We never count it by day, by hour, by period, or by number of sessions.

**1-4** Lessons you teach normally **after the problem is fixed** are **always paid in full**.

**1-5** Anything not written here is decided using **1-1** and **1-2**.

## 2 When the student does not come

everyone

**2-1** If the student **simply does not come, you are paid in full.**

Whether a student shows up is **not something you can decide**.

**2-2** In return, **please stay in the classroom until the scheduled end time**, so you can start the moment they appear.

**2-3** If the student tells us **more than 30 minutes before the start**, the lesson **moves to another day automatically**. You are paid **on the day you actually teach it**.

The lesson is **moved, not lost**.

**2-4** If they tell us **less than 30 minutes before**, it does not move — it counts as an **absence**, and you are still **paid in full**.

By then you are already prepared and waiting.

## 3 When the student arrives late

everyone

**3-1** Even if the lesson starts late because of the student, you are **paid in full**.

**3-2** **Please teach whatever time is left.** Even if only five minutes remain, please start.

What we care about is not **how many minutes** but **whether the lesson happened**. English grows through **repetition and frequency**, and those five minutes may be that student's **only English of the week**.

**3-3** You **do not have to extend** to recover the lost time. There is **no penalty at all** if you do not.

The lesson became shorter because of **the student's own situation**.

**3-4** If you do extend, please keep it **within about 10 minutes**.

A long extension **makes your next class late, and the next student suffers the same way**.

## 4 When you are late

everyone

**4-1** If the lesson started late because of you, **please add the lost minutes at the end.**

This is not extra work — it is **keeping the lesson you promised**. The student **did nothing wrong and waited**; a shorter lesson on top of that means **losing twice**.

**4-2** If you make up the time, you are **paid in full**.

The student received **the whole lesson** they were promised.

**4-3** However, **there is still a penalty for the lateness itself**. Making up the time and the lateness penalty are **two separate things**.

**4-4** If the lesson ends without the time being made up, **the minutes the student did not receive are reflected in that lesson's fee**.

**4-5** If your next class starts right away and you cannot make it up, **do not force it — tell your manager**. We arrange a make-up lesson for the student.

## 5 Working from home

home

**5-1** The **internet and computer you use at home are ones you chose and look after**, so problems with them count as **your side**.

**5-2** If a lesson stops because of your internet or computer, **that lesson's fee is not paid**.

**5-3** But it is **only that one lesson**. Lessons after your connection comes back are **paid normally**.  
**You do not lose the whole day.**

**5-4** If a power cut disconnects **both you and the student**, a lesson at home is still **not paid**. **Please tell your manager**.

**5-5** The company shows you **how to switch to your phone's internet (tethering)** and helps you **check your line**.

## 6 Working in the office

office

**6-1** The **internet, computer and power in the office are provided and looked after by the company**, so problems with them are **our side**.

**6-2** If a lesson **already running** is cut off, **that lesson is paid in full**. **You do not need to make up the time**.

**6-3** If the problem continues and later lessons **never start, those are not paid**.  
No lesson took place — and office work already includes **a separate allowance for your time on site**.

**6-4** Lessons after it is fixed are **paid normally**.

**6-5** If a power cut disconnects **both of you**, an office outage is **our building's problem**, so **that lesson is paid in full**. Other lessons are not, and **lessons after the power returns are paid normally**.

**6-6** When something goes wrong, **tell the office supervisor right away**.

The record is what saves you from having to **prove anything later**.

**6-7** We **switch you to another connection straight away** so the lesson can continue. If it takes long, that time becomes **other work or an early finish**.

We **do not just leave you sitting there**.

## 7 The office computer

office

**7-1** The office computer is **for teaching**. Please do not:

- save **videos or large files** unrelated to work
- install **programs or apps from unknown sources**
- use **USB drives or downloads** that could bring in a virus
- install software **the company did not provide**

**7-2** If this makes the computer slow or broken and a lesson is disrupted, **it becomes your responsibility even though the computer is ours**.

Because **you decide what gets installed**. The internet and the hardware itself are **entirely our responsibility**.

**7-3** If you need a program for teaching, **just ask us — we will install it for you**.

**7-4** **The first time, we only give guidance**. You are not held responsible straight away.

**7-5** We **do not look through what you did personally**. We only check the cause when something has actually gone wrong.

## 8 When our system fails

everyone

**8-1** If the classroom will not open, your account is **blocked from entering**, or a system fault stops the lesson, **that lesson is paid in full**. The same at home or in the office.

**8-2** It is **not recorded as lateness**, and there is no penalty.

**8-3** **Do not wait — message your manager right away.**

**8-4** We **arrange a make-up lesson** for the student.

**8-5** Lessons that never started afterwards are handled **the same way as 6-3**.

## 9 When another teacher covers

everyone

**9-1** If a problem stops the assigned teacher, **another teacher may step in** so the student's lessons do not stop.

**9-2** The fee goes to **the teacher who actually taught it**. The originally assigned teacher **does not receive it**.

**9-3** This works **both ways**. Next time **another teacher has a problem, you cover their lesson and receive that fee**.  
Cover work **flows in both directions**, so over time it balances out.

**9-4** Cover work goes to **whoever is free at that hour** — home-based or office-based, it makes no difference.

**9-5** Before asking someone to cover, we **first try another connection so the original teacher can continue**.  
Because **changing teacher is itself a break for the student**.

**9-6** The covering teacher receives a short note with the **student's name, progress and anything special to know**.

## 10 If your line keeps dropping

home

**10-1** If your home internet **keeps dropping** and students' lessons keep suffering, we **move you to office-based work**.

**10-2** **This is not a punishment**. At home, a dropout means **that lesson is not paid**. In the office, **it becomes our responsibility and the lesson is paid**.  
A **burden moves off you and onto the company**.

**10-3** Here is how it goes:

**10-3-1** we **show you your own connection record** — information, not a warning

**10-3-2** you talk with your manager and we **check the line**. If it is solved here, it ends here

**10-3-3** if not, **four weeks of office work**

**10-3-4** once your connection is better, **you can work from home again**

**10-4** **The way back is always open**. A move is always for a set period, never open-ended.

## 11 Records and corrections

everyone

**11-1** Start and end times, interruptions, and who covered a lesson are **recorded automatically**. **You do not need to fill in any form**.

**11-2** Even when your internet dies, **the times stay in the student's record**. So **you never have to prove anything**. No need to send photos or screenshots.

**11-3** If a record is wrong, **tell us within 7 days through My Page**. Your manager will check it and correct it.

**11-4** **Asking never counts against you in any way**.

## 12 We tell students and parents too

everyone

**12-1** Booking screens and parent notices say: **"To postpone, tell us at least 30 minutes before — it moves automatically. Joining late may make the lesson shorter, but your teacher waits until the scheduled end."**

We **do not write rules only for teachers**. Students have the same rules.

**12-2** If the same student is **late three or more times in a month**, we **contact the parent**. **You do not have to**.

**Why these rules exist** Not to punish you, but to make clear **where each side's responsibility ends, so that nobody is treated unfairly**. If anything is unclear, **please ask your manager at any time**.
