

# Register a student and schedule classes

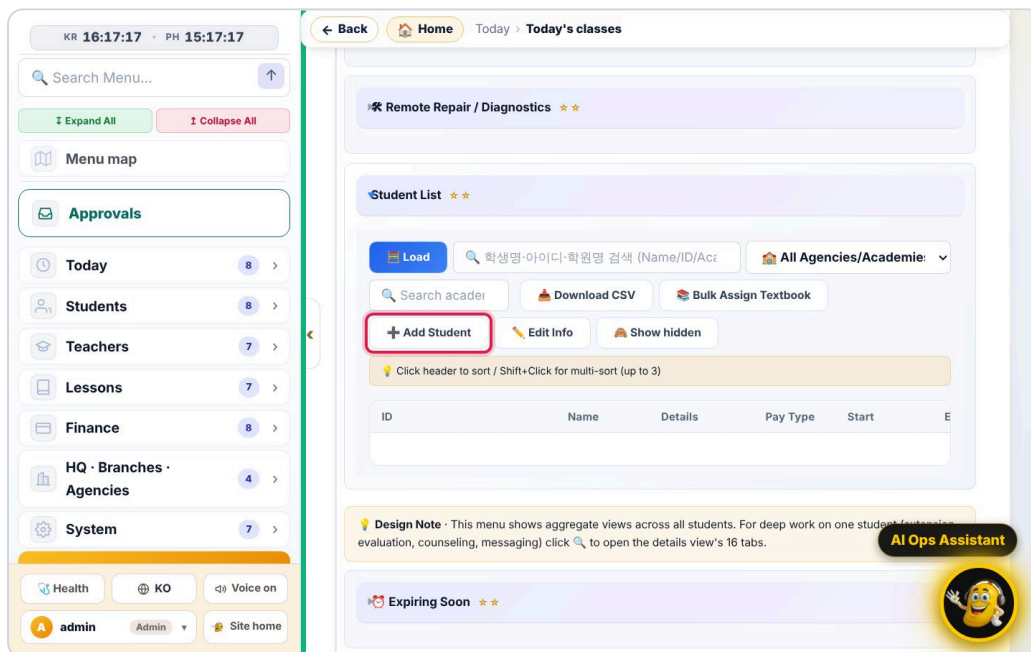

Step-by-step guide for HQ / office staff · Admin page (mangoi.ai)

## Before you start

- Use an **HQ or office staff** account. Teacher, branch and agency accounts cannot register students (the server refuses).
- All class times are **Korea time (KST)** — Philippine time is 1 hour earlier. (KST 19:30 = PH 18:30)
- This guide is for **one student at a time**. For many students at once, use **Students › Enrollment** (download a form → fill it in → upload → «Register all»).
- The screenshots use **sample data** (student “Emma Kim”, “Teacher Anna”). Your screen shows real names.

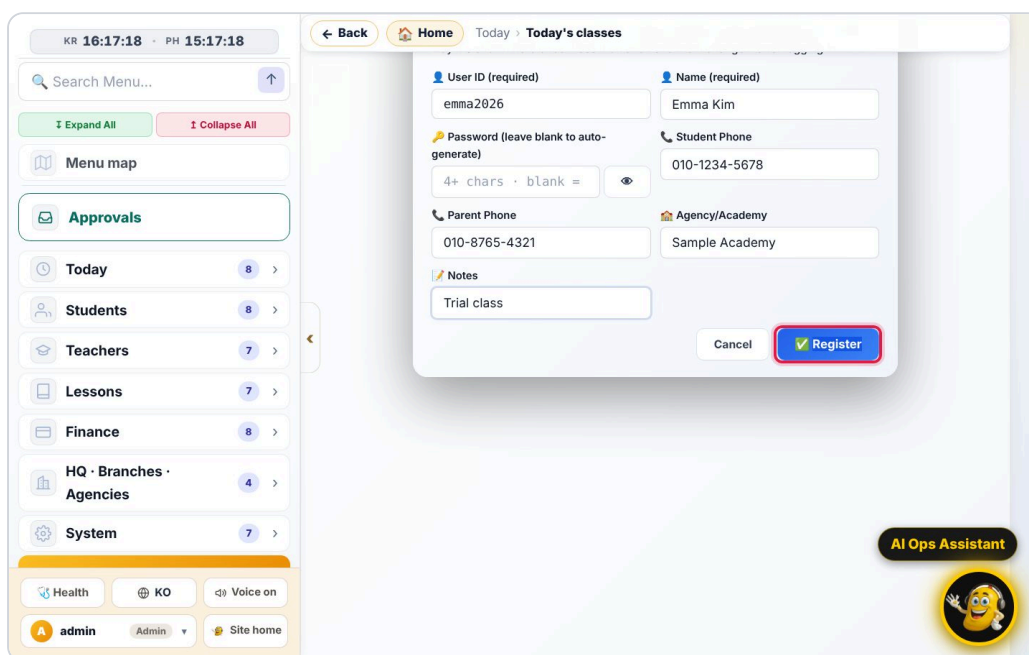

## 1 Open the student list and press «+ Add Student»

- Left menu **Students** → **Student Management** → open **Student List**.
- Press **+ Add Student** (red box).
- Tip: search the name first. If the student is already in the list, **do not create a second account** — skip to Step 4.

## 2 Fill in the student's information

- **User ID** (required) — 4–20 characters, letters / numbers / underscore only. Use small letters (phones add capital letters by themselves).
- **Name** (required).
- **Password** — leave blank and the system makes a temporary one for you.
- **Parent Phone** — please fill it in. Class reminder texts go to this number; with no number, no text is sent.
- **Agency/Academy** — type a few letters and pick from the list. **Notes** — e.g. “Trial class”.
- Press  **Register**. If you see “a student with the same name and phone already exists”, use that existing ID instead (only press “Register anyway” for a different child, e.g. a sibling).

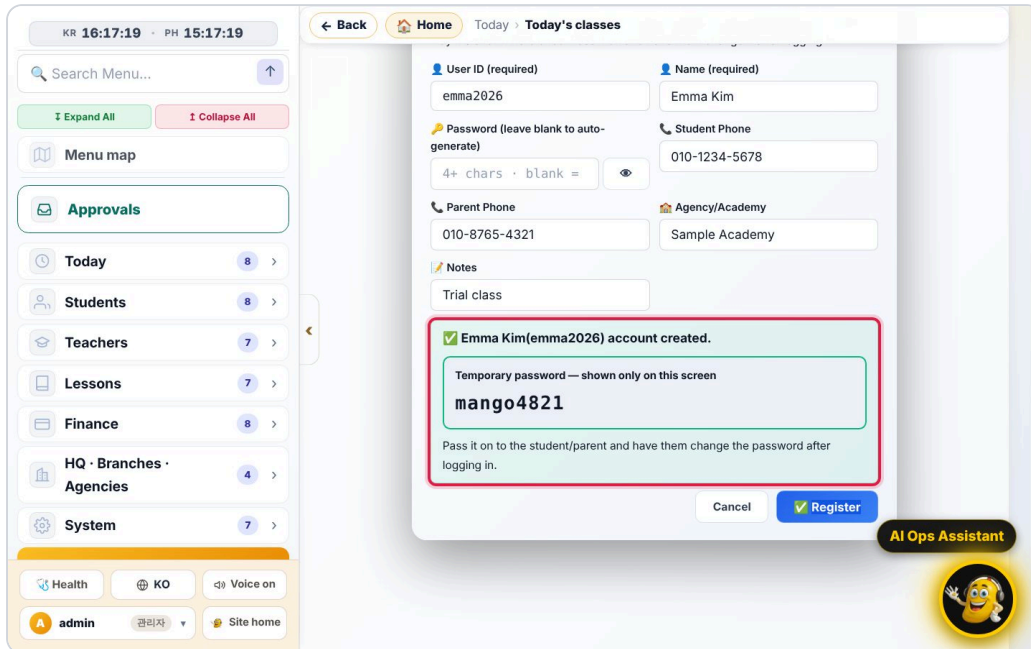

The screenshot shows a mobile application interface for student registration. On the left is a sidebar menu with options like 'Approvals', 'Today', 'Students', 'Teachers', 'Lessons', 'Finance', 'HQ · Branches · Agencies', and 'System'. The main screen displays a registration form titled 'Today's classes'. The form includes the following fields:

- User ID (required)**: emma2026
- Name (required)**: Emma Kim
- Password (leave blank to auto-generate)**: 4+ chars · blank =
- Student Phone**: 010-1234-5678
- Parent Phone**: 010-8765-4321
- Agency/Academy**: Sample Academy
- Notes**: Trial class

At the bottom right of the form are two buttons: 'Cancel' and a blue 'Register' button with a green checkmark icon, which is highlighted with a red box. In the bottom right corner of the app, there is an 'AI Ops Assistant' button with a cartoon character icon.

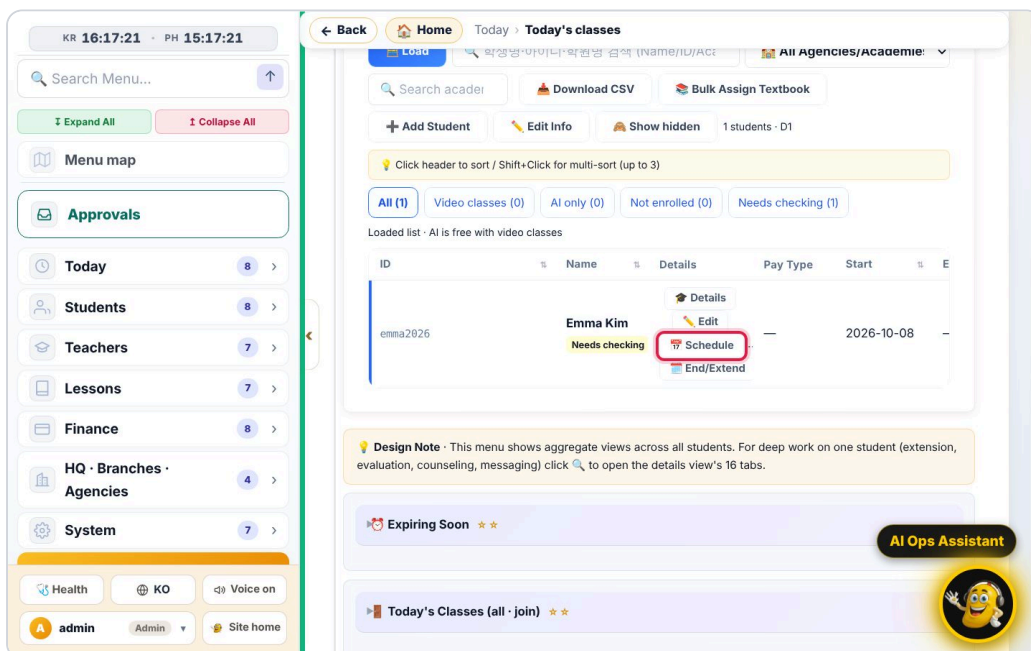

### 3 Copy the password — it is shown only once

- “ ... account created.” appears with the **temporary password**.
- Copy the ID and password now and send them to the parent. It is **not shown again** after you close this window.
- Close the window with X. The new student now appears in the list.

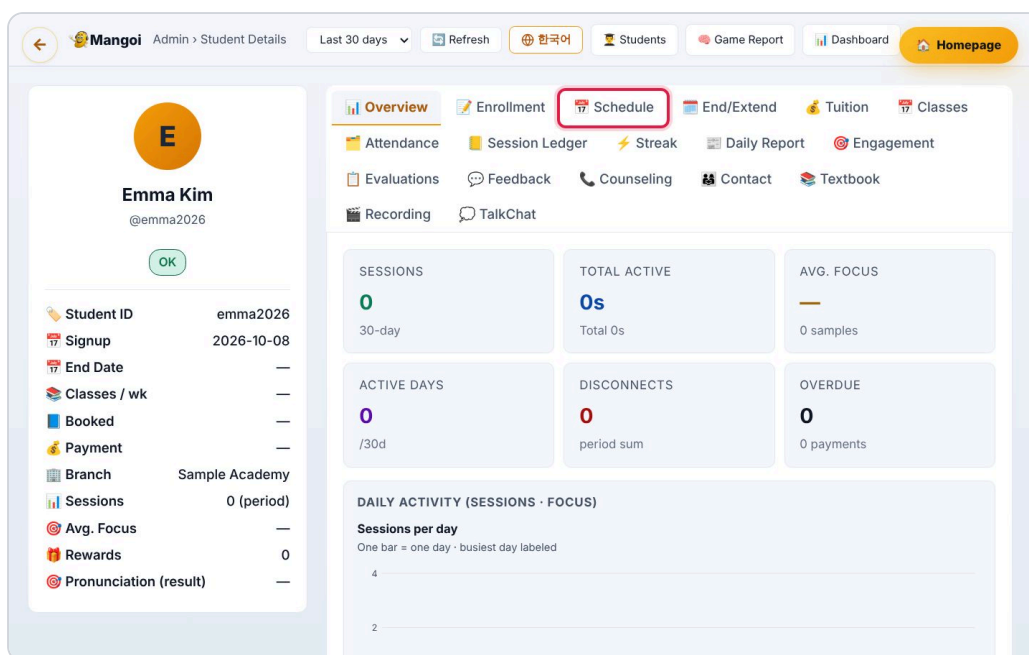

### 4 Open the student's Schedule

- In the student's row, press  **Schedule** (red box). The student detail page opens in a new tab, directly on the Schedule tab.
- You can also press  **Details** and then the  **Schedule** tab (next picture).

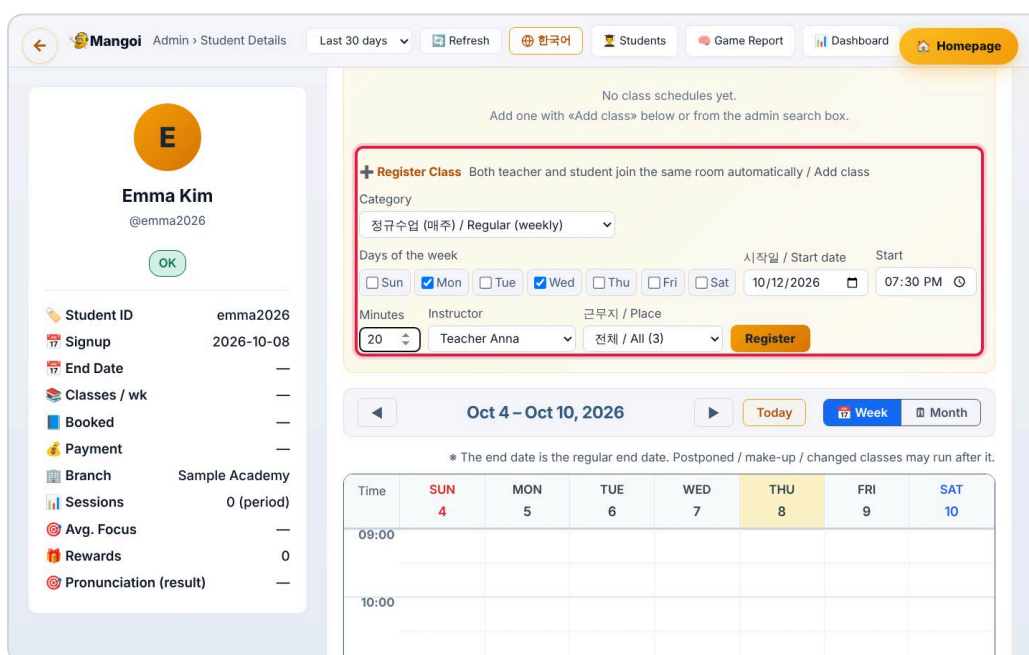

## 5 (Other way) Student detail → «<sup>July 17</sup> Schedule» tab

- On the student detail page, the tab bar is at the top. Press <sup>July 17</sup> **Schedule**.

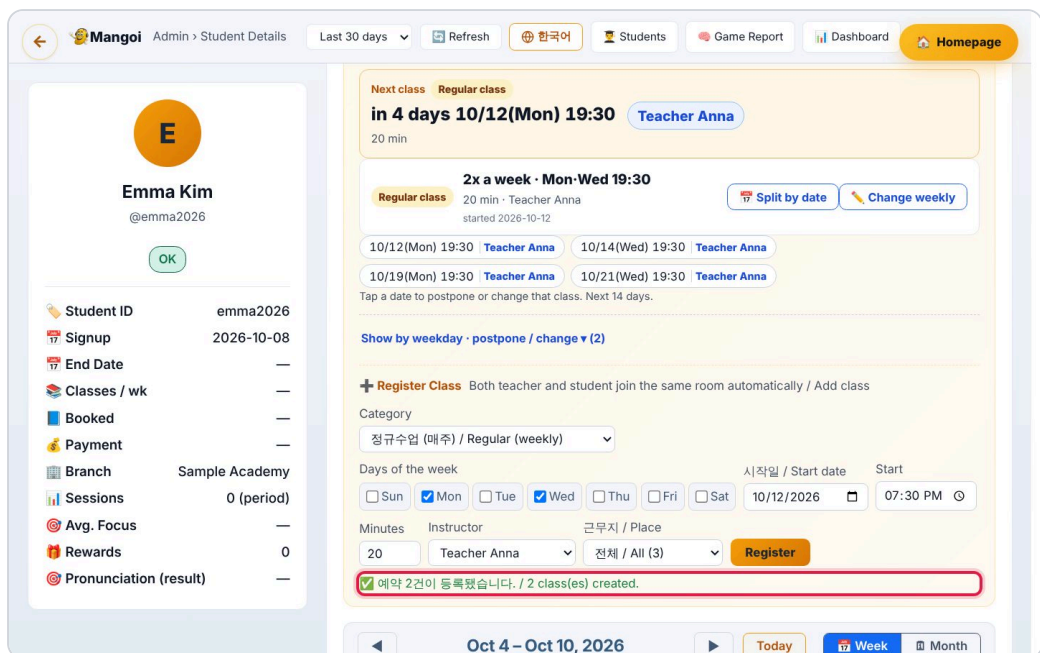

## 6 Fill in «Register Class» and press «Register»

- Scroll down to **+ Register Class**.
- Category** — **Regular (weekly)** repeats every week. **Make-up / Trial / Level test** are for **one day only** (then you pick one **Date** instead of days).
- Days of the week** (Regular only) — tick every class day, e.g. Mon + Wed.
- Start date** — the first class day. **Start** — class time in **KST**. **Minutes** — usually 20.
- Instructor** — pick from the list. **Place** filters the list (Home / Office). Teachers who left are hidden.
- Press **Register**. If it warns “there is already a class at the same time”, check that teacher’s schedule first — only choose “Register anyway” if you are sure.

## 7 Check the result

- “ 2 class(es) created.” appears, plus the **Next class** card and the next class dates.
- Regular classes show as “2x a week · Mon·Wed 19:30”. To change **one day**, tap that date; to change **every week**, press  **Change weekly**.

## 8 Done — teacher and student meet in the same room

- The booking is now on the teacher’s page and the student’s home screen.
- At class time, both just press **Join class** — they enter the **same room automatically**, no room code needed.
- If a class is missing on the teacher’s screen, check the **Instructor** and the **KST time** of the booking first.
